Appendix I: Research Summary

1.0 Introduction

1.1 PURPOSE

Wenck Associates, Inc. (Wenck) was authorized by Mr. J. Michael Noonan, Senior Department Administrator of Hennepin County, to conduct this Phase I Environmental Site Assessment (ESA) of the commercial property located at 2225 East Lake Street, Minneapolis, Hennepin County, Minnesota (the Subject Property). The Subject Property consists of 6.38 acres (278,041square feet) occupied by a commercial building with a footprint of approximately 24,000 square feet, landscaped areas, and a paved parking lot and drive areas. Access to the Subject Property is from East Lake Street, 22nd Avenue South and East 31st Street. The Subject Property location is depicted in Figure 1. A Site Detail Map of the Subject Property is included as Figure 2.

Wenck understands that Hennepin County may purchase the Subject Property. The conclusions contained in this report have been made to assist Hennepin County in evaluating environmental conditions at the present time at the Subject Property. In addition, the report is intended to satisfy the requirements of "all appropriate inquiry… consistent with good commercial or customary practice" referenced in the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. § 9601(35)(B).

1.2 SCOPE

This ESA was prepared in accordance with the ASTM Phase I Standards (the American Society for Testing and Materials (ASTM) Phase I Environmental Site Assessment Process, Designation E-1527-13, which meets or exceeds the ASTM Phase I Environmental Site Assessment Process, Designation E-1527-05) and All Appropriate Inquiry (AAI) Rule (40 CFR Part 312) to identify, to the extent feasible and in accordance with the processes described herein; recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions in connection with the Subject Property.

As defined in ASTM E-1527-13, the term recognized environmental condition (REC) means "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to a release to the environmental; (2) under conditions of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

As defined in ASTM E-1527-13, the term controlled recognized environmental condition (CREC) means "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

As defined in ASTM E-1527-13, the term historical recognized environmental condition (HREC) means "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls."

A summary of the general scope of work for this project is described in the following tasks:

Task I. Records Retrieval and Review of Records: Wenck obtained publicly available, practically reviewable and reasonably ascertainable federal, state, county, and city information about the Subject

Property and other properties within established minimum search distances of the Subject Property. These sources were searched for any information about recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions or business-related environmental risks relative to the Subject Property. This search reviewed Superfund sites; waste treatment, storage, and disposal facilities regulated under RCRA; spills or discharges of hazardous substances, toxic materials, or petroleum products; and known or recorded landfills; well databases; etc.

Task II. Site Reconnaissance: Wenck visually inspected the Subject Property to evaluate the Subject Property for any recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions and business-related environmental risks. The structures and/or grounds of the Subject Property were observed for filling, subsidence, unusual land or surface forms, colorations, odors, indications of any dumping, and evidence of suspect environmental features on the Subject Property such as tanks, drains, drywells, etc. Observations pertaining to adjacent property use were also recorded where such observations pertained to recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions or business-related environmental risks relative to the Subject Property.

Task III. Interviews of People with Knowledge of the Subject Property: Wenck interviewed people with knowledge of the history of the Subject Property and of the surrounding properties. Interviews were completed in order to obtain information pertaining to recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions relative to the Subject Property. Interviewees included the Subject Property owner(s) and occupant(s), as well as local government officials.

Data gathered in the course of performing the above three tasks was used in concert to determine if information from one source indicated the need for additional information from another source.

Task IV. Reporting assessment of the Subject Property: Wenck completed this Phase I ESA by combining the information retrieved through data searches with the observations that were made during the Subject Property reconnaissance and interviews. Photographs were taken to document the overall status and current use of the Subject Property and specific areas of concern.

1.3 DEVIATIONS

No intentional deviations from the ASTM Phase I Standards were made in preparing this report.

1.4 LIMITATIONS AND EXCEPTIONS

The results of this study, performed by Wenck, are based on the scope of work defined in Section 1.2, subject to any project-specific limitations or project-specific additional non-scope considerations described herein.

As is the case with any investigation of finite scope, this review is intended to reduce, but cannot eliminate, the uncertainty regarding the potential for recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions in connection with the Subject Property. Therefore, the possibility of the presence of some localized substances that may be classified as hazardous cannot be ruled out completely. However, it is Wenck's opinion that the conditions observed at the Subject Property are representative of existing conditions at the time of the site reconnaissance.

1.5 SIGNIFICANT ASSUMPTIONS

Wenck assumes that Hennepin County and/or their representatives have provided accurate information that will assist Wenck in determining appropriate inquiry, including but not limited to actual knowledge, previously prepared reports, environmental cleanup liens, and title review information. In addition, Wenck assumes, for the purposes of the site reconnaissance, adequate information has been provided to accurately establish the physical boundaries of the real property being evaluated.

1.6 SPECIAL TERMS AND CONDITIONS

The purpose of this report is to aid in the environmental assessment of the Subject Property and not to evaluate the structural condition of buildings or other features of the Subject Property.

Wenck has performed its work in a manner consistent with the care and skill ordinarily exercised by members of the environmental profession. The conclusions contained in this report represent our professional opinions. These opinions were arrived at in accordance with currently accepted engineering practices at this time and location. Wenck does not offer any form of warranty or guarantee that the Subject Property contains no hazardous substances, pollutants or contaminants.

Wenck assumes no responsibility for the accuracy of information that was obtained from other sources, including, without limitation, regulatory and government agencies, persons knowledgeable about the Subject Property, persons knowledgeable about adjacent properties, and vendors of public practice.

1.7 USER RELIANCE

This report has been prepared solely for the information and use of Hennepin County and L & H Station Development, LLC. Others wishing to rely on the findings of this report, not having a contractual relationship with Wenck, do so without permission and at their own risk. Our professional recommendations made to the addressee(s) are exclusive to that party's disclosed intended or proposed consideration with respect to the Subject Property at the present time.

2.0 Site Description

2.1 SITE INFORMATION

Site Address/Location	**Address:** 2225 East Lake Street	**City:** Minneapolis		
	County: Hennepin	**State:** Minnesota		
	Township: 128 North	**Range:** 24 West	**Section:** 1	**Quad Description:** NE 1/4 of the NW 1/4
Property Information	**Size:** 6.38 acres			
	Property Identification Number: 0102824210105			
Improvements	The Subject Property has one commercial building, a playground, paved parking and drive areas and landscaped areas.			
Building Information	**Size:** Approximately 24,000 square feet (building footprint)	**Year of Construction:** 1986		
	Description: The building consists of three floors and is constructed of masonry with metal supports.			
Use of the Property	**Current Use:** The Subject Property has been in use as a public school since the currently existing building was constructed in 1986.			

	Past Use: According to fire insurance maps and aerial photographs, several stores were located on the north portion of the Subject Property (facing East Lake Street) from at least 1912 until at least 1969, and the Subject Property was mostly in residential use and contained several dwellings from at least 1892 until at least 1969. Then the dwellings were razed. A small commercial building existed on the southeast portion of the Subject Property from at least 1925 until sometime between 1966 and 1969. The 1925 fire insurance map identifies the building as Northwestern Telephone Exchange Company. The building was later renovated for use as a paint factory and then as a machine shop. A larger commercial building existed on the northeast portion of the Subject Property from at least 1940 until sometime between 1969 and 1972. Fire insurance maps indicate that this building was used as a grocery store and a bowling alley. City directories indicate that a gas station occupied one of the store fronts on the north portion of the Subject Property from at least 1930 until at least 1940. From at least 1972 until 1986 the Subject Property was vacant, undeveloped land.
Ownership and Operation of the Property	**Current Ownership and Operation:** The Subject Property is owned by Special School District Number 1 and occupied by Southside Adult Education Center.

The Subject Property location is depicted in Figure 1. A Site Detail Map showing the Subject Property is provided in Figure 2.

2.2 CURRENT USE OF ADJOINING PROPERTIES

The following land uses were noted on adjoining properties:

Direction	Description
North	East Lake Street and commercial property (Wells Fargo, Little Caesar's Pizza) beyond
South	East 31st Street and residential property beyond
East	Hiawatha Avenue and vacant land beyond that was historically used as the Hiawatha Substation
West	22nd Avenue South and a commercial building (YWCA) beyond

2.3 PHYSICAL SETTING

2.3.1 Topography

The Subject Property gradually slopes from west to east and ranges in elevation from approximately 864 to approximately 851 feet above mean sea level. Site surface drainage is to the east towards areas of lower elevation and towards the stormwater sewer system associated with adjoining streets. Historic development may have included grading or filling of the Subject Property to improve the location for construction and drainage.

2.3.2 Geology

Published references describe the surficial geology at the Subject Property as upper terrace deposits of sand, gravelly sand and loamy sand, overlain by thin deposits of silt, loam, or organic sediment (Meyer and Hobbs, 1989).

Bedrock in the vicinity of the Subject Property consists of Decorah Shale characterized by green, calcareous shale with thin interbeds of limestone (Olsen and Bloomgren, 1989).

2.3.3 Hydrogeology

The general direction of regional groundwater flow in the area of the Subject Property is presumed to be to the east-northeast toward the Mississippi River (Kanivetsky, 1989). Local conditions may vary due to surface water features, perched groundwater conditions or artificially created drainage systems.

3.0 User Provided Information

3.1 TITLE RECORD INFORMATION

A title commitment record for the Subject Property was not provided to Wenck during preparation of this Phase I ESA, and a title search was not within the scope of this ESA.

3.2 USER QUESTIONNAIRE

User provided information includes a copy of the ASTM User Questionnaire completed by Mr. J. Michel Noonan, Senior Department Administrator of Hennepin County. The following sections include the information obtained from the completed User Questionnaire, which is included in Appendix A.

3.2.1 Environmental Liens or Activity and Use Limitations

No independent review of environmental liens was undertaken by Wenck as a part of this scope of work. No activity and use limitations were disclosed to Wenck during preparation of this ESA.

3.2.2 Specialized Knowledge

No prior assessments regarding the Subject Property were provided by the user at the outset of this scope of work. Wenck staff have conducted investigation and remediation work in the general area of the Subject Property and are aware of arsenic impacts that have been identified in soils due to a historical pesticide facility that was located north of the Subject Property. The larger area that includes the Subject Property has been referred to by environmental professionals as the "arsenic triangle."

3.2.3 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable environmental information was found relevant to this study, with the exception of known arsenic impacts to soil in the general area of the Subject Property.

3.2.4 Valuation Reduction for Environmental Reasons

No valuation reduction for environmental reasons was disclosed at the outset of this study.

3.3 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

According to tax information, the Subject Property is owned by Special School District Number 1. The Subject Property building is currently occupied by Southside Adult Education Center.

3.4 REASON FOR PERFORMING PHASE I ESA

This Phase I ESA is being performed as a component of due diligence activities and to determine whether *recognized environmental conditions, controlled recognized environmental conditions*, and *historical recognized environmental conditions* affect the Subject Property.

4.0 Records Review

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Wenck requested and reviewed a search of files from federal and state databases from GeoSearch™ for the Subject Property (the GeoSearch™ Radius Report). Files were searched from Federal and State environmental records databases within minimum search distances as specified in the ASTM Phase I Standards, and the GeoSearch™ Radius Report included a more extensive database list than those minimally identified as required by the ASTM Phase I Standards. A summary of the sites identified in the GeoSearch™ Radius Report are discussed below, along with information regarding the significance of the listing for the Subject Property. The GeoSearch™ Radius Report, which contains more information regarding database descriptions and search distances, is included in Appendix B.

4.1.1 Subject Property

The Subject Property **was** identified on the following reviewed regulatory databases in the GeoSearch™ Radius Report: Facility Registry System (FRSMN) as Anishinabe Academy at 2225 East Lake Street and Agricultural Spills Listing (AGSPILLS) as a portion of the South Minneapolis Neighborhood Soil Contamination site. There are five AGSPILLS listings that identify pesticide impacts within the larger AGSPILLS site that includes the Subject Property. There is also a National Priorities List (NPL) site associated with the South Minneapolis Soil Contamination site (discussed below in Section 4.1.2). Wenck has conducted investigation and remediation work in the area of the Subject Property, and is familiar with arsenic impacts that have been identified in soils in the general area of the Subject Property. Large quantities of pesticide were historically stored uncovered at a facility located approximately 1/4 mile northwest of the Subject Property. Wind forces caused the pesticide to spread and settle on soils throughout the area. Most of the investigations have occurred at residential properties near the Subject Property. According to the 2007 Remedial Investigation Report for the Arsenic Triangle that is available on the EPA website, the Subject Property, the right-of-way west of the Subject Property, and the residential property to the south of the Subject Property were sampled for for arsenic and all samples contained less than ten milligrams of arsenic per kilogram of soil. However, because only two soil samples were collected and analyzed at the Subject Property, there remains a potential for arsenic impacts at the Subject Property. Because a material threat of release has occurred at the Subject Property, potential arsenic-impacted soils at the Subject Property are considered to represent a REC for the Subject Property.

Wenck did not review State/County/City files for these database listings because sufficient information was available from other sources to determine the potential for RECs, CRECs, and/or HRECs at the Subject Property.

4.1.2 Surrounding Properties

A regulatory database review was requested to provide information about verified or potential sites of regulatory interest near the Subject Property.

Additional mapped sites of regulatory interest identified within the search radii defined by the Practice, include:

Number of Sites	Regulatory Database	Comments
1	No Longer Regulated RCRA Generator Facilities (NLRRCRAG) sites	Listing not considered to represent a REC, CREC or HREC for the Subject Property based on type of database.
4	Resource Conservation and Recovery Act - Generator Facilities (RCRAGR05) sites	Listings are not considered to represent RECs, CRECs or HRECs for the Subject Property based on type of database, location relative to the Subject Property, violations status, and/or regulatory status.
1	Brownfields Management System (BF) sites	The BF site is identified as Outlot A, Minnehaha Industrial Park, (approximately 0.39 miles north of the Subject Property). According to the database report, the site and surrounding area were used as a railroad yard facility for approximately 80 years (from the 1880s until the 1950s/ 1960s). The database report states that the yard was primarily used for maintenance and repair activities. Fire insurance maps from 1892 and 1914 identify a roundhouse approximately 0.30 miles north of the Subject Property. Because the BF site is not located upgradient from the Subject Property with respect to the presumed direction of groundwater flow, it is not likely to affect conditions at the Subject Property. Therefore, the BF site is not considered to represent a REC, CREC or HREC for the Subject Property.
1	Comprehensive Environmental Response, Compensation & Liability Information System (CERCLIS)/No Further Remedial Action Planned (NFRAP) site	The CERCLIS site is identified as the 3rd Precinct Police Station at 3000 Minnehaha Avenue (approximately 0.20 miles east of the Subject Property). According to the database report, the CERCLIS site was discovered in 1984, preliminary assessments were completed in 1985 and 1988, and the decision was made that no further remedial action is planned, and the site was archived in March 1988. Because the CERCLIS site is not located upgradient with respect to the presumed direction of groundwater flow, it is not considered to represent a REC, CREC or HREC for the Subject Property.

Number of Sites	Regulatory Database	Comments
1	National Priorities List (NPL) site/Record of Decision System (RODS) site	The NPL site identified is the South Minneapolis Residential Soil Contamination site that was discovered to have concentrations of arsenic in the soil and groundwater above state and federal health risk screening criteria. The South Minneapolis Residential Soil Contamination Site was entered onto the National Priorities List in September 2007. Information revealed in the GeoSearch Radius Report indicated the identified source of the arsenic contamination was from a site located 1/4 mile northwest of the Subject Property and the extent of the release is noted in the GeoSearch Radius Report as including the Subject Property. Wenck staff have conducted investigation and remediation work in the general area of the NPL site. Remediation activities conducted by the US EPA included the excavation of twelve inches of top soil from approximately 197 residential properties within the identified 1,400-acre deposit area, and each property was backfilled with clean topsoil. This site is also discussed above in Section 4.1.1. Because there is a material threat of release at the Subject Property, soils that are potentially impacted by arsenic are considered to represent a REC for the Subject Property.
2	Spills Listing (PCASPILLS) sites	The closest PCASPILLS site is identified as spill # 56407 at the intersection of 23rd Avenue and East 31st Street (adjoining property south). According to the database report, a snow plow punctured its tank on the vehicle causing the release of approximately 35 gallons of light fuel oil and diesel. The release was contained to the street, and the fire department responded with a sand truck. The release received regulatory closure from the MPCA in March 2002. Due to the regulatory status and extent of the release, the PCASPILLS site is not considered to represent a REC, CREC or HREC for the Subject Property. The other PCASPILLS site is identified as spill # 15479 at the intersection of Hiawatha Avenue and Lake Street (adjoining property east). According to the database report, the spill occurred in October 1991, and the spill received closure in January 1996. No information is provided regarding the source, quantity, or product released. Because the PCASPILLS site is not located upgradient from the Subject Property with respect to the presumed direction of groundwater flow, and because the spill received regulatory closure from the MPCA, it is not considered to represent a REC, CREC or HREC for the Subject Property.

Number of Sites	Regulatory Database	Comments
4	Institutional Controls (IC) sites	The closest IC site is the Minnehaha Mall at 2500 East Lake Street (approximately 0.18 miles east of the Subject Property). According to the database report, the soil and groundwater are impacted by heavy metals and solvents, and a restrictive covenant is in place at the site. The next IC site is the Minneapolis 3rd Precinct at 3000 Minnehaha Avenue South (approximately 0.20 miles east of the Subject Property). According to the database report, soil is impacted by arsenic, trichloroethylene, and lead (among other impacts) and the groundwater is impacted by trichloroethylene and diesel range organics. An affidavit identifying impacted areas is required as a condition of the limited no action letter issued by the MPCA. The next IC site is located approximately 0.21 miles northwest of the Subject Property near the intersection of 29th Street East and 21st Avenue South. According to the database report, the site was historically used as a chemical and medical manufacturing facility, a foundry, a machine shop. a possible truck garage, and residential property. Reportedly, Phase II investigations completed in 1994 indicate that shallow surface soil is impacted by lead, arsenic and mercury and that groundwater is impacted by arsenic. The final IC site is identified as Resource Center of the Americas at 3012-3028 27th Avenue South (approximately 0.24 miles east of the Subject Property). According to the database report, the site has an environmental covenant that restricts land use to commercial or light industrial uses, and that prohibits disturbance of soils, basement walls, the concrete floor slab, and extraction of groundwater. The contaminants are not specifically identified. Because the IC sites are not located adjacent to or upgradient from the Subject Property, they are not considered to represent RECs, CRECs or HRECs for the Subject Property.
12	Registered Storage Tank (UAST) sites	UAST sites are not necessarily indicative of a release or a material threat of release, therefore, these listings are not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs, CRECs or HRECs for the Subject Property. Registered Leaking UAST sites are discussed below.

Number of Sites	Regulatory Database	Comments
21	Agricultural Spills Listing (AGSPILLS) sites	Four of the closest AGSPILLS sites are residential properties within the contamination plume of the above referenced South Minneapolis Residential Soil Contamination Site. Each of the remaining AGSPILLS sites are located at least 0.14 miles from the Subject Property at either a sidegradient or downgradient locations, with respect to groundwater flow. Based on the locations and/or status, these listings are not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs, CRECs or HRECs for the Subject Property. As stated above in Section 4.1.1, soils that are potentially impacted by arsenic as part of the South Minneapolis Residential Soil Contamination site are considered to represent a REC for the Subject Property.
4	Agricultural Contingency (CONTINGENCIES) sites	The four CONTINGENCIES sites are associated with AGSPILLS listings discussed above. Because none of the CONTINGENCIES sites is located upgradient from the Subject Property with respect to the presumed direction of groundwater flow, and because none of the CONTINGENCIES sites adjoins the Subject Property, the sites are not considered to represent RECs, CRECs or HRECs for the Subject Property.

Number of Sites	Regulatory Database	Comments
35	Registered Leaking Storage Tank (LUAST) sites	The closest leak site is identified as the former Clark Oil Service Station located at the intersection of Hiawatha Avenue and Lake Street (adjoining property east). According to the database report, a release of leaded gasoline was discovered in August 1991 (LEAK # 8324). In order to obtain more information about the release, Wenck reviewed the information available on the MPCA's "What's in My Neighborhood?" online database. According to the online database, during removal of the Hiawatha line for local redevelopment, a leaking tank was discovered. Reportedly, the tank, dispenser and piping were affected by corrosion and were identified as the source of the release. Free product was recovered from groundwater at the site, and the release received regulatory closure from the MPCA on January 16, 2009. The closure letter states "if future development of the site or surrounding area is planned, it should be assumed that petroleum contamination may be present." The same location is also identified as the LRT Construction Site (LEAK # 15468). According to the database report and the closure letter available on the MPCA's "What's in My Neighborhood?" online database, LEAK # 15468 involved the release of used oil to soil and groundwater in 2003 and the release was granted regulatory closure in April 2005. The closure letter contains the same general language as the closure letter for LEAK # 8324. Because it should be assumed that petroleum impacts remain in the general area of the spills, Wenck recommends that the east portion of the Subject Property is investigated for petroleum impacts. LEAK #8324 and LEAK # 15468 represent a material threat of release to the Subject Property, and are considered to represent a REC for the Subject Property. Another LUAST site is identified as the Hi-Lake Shopping Center located on adjoining property north (LEAK # 15708). According to the MPCA's "What's in My Neighborhood?" online database, two 6,000-gallon capacity USTs for gasoline and one 560-gallon capacity UST for used or waste oil were removed from the site, and a release was discovered in May 2004. Reportedly, impacted soils and groundwater remain on-site, and off-site contamination was reported. The release received regulatory closure from the MPCA in December 2006. Because LEAK # 15708 adjoins the Subject Property, and because off-site contamination was identified, the LUAST site represents a material threat of release to the Subject Property, and Wenck recommends that the north portion of the Subject Property be investigated for petroleum impacts. LEAK # 15709 is a REC for the Subject Property. The remaining thirty-two LUAST sites have been granted regulatory closure by the MPCA and are not located adjacent to the Subject Property. Based on regulatory status of each

Number of Sites	Regulatory Database	Comments
		site and the information provided in the GeoSearch Radius Report, these remaining listings are not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs for the Subject Property.
11	Petroleum Brownfields Program (PBF) site	The PBF database lists Petroleum Brownfield Program sites with Development Response Action Plans. Each of the PBF sites identified is associated with either an above referenced LUAST site or inactive VICP site discussed below.

Number of Sites	Regulatory Database	Comments
41	Site Response Section Database (SRS) /Voluntary Investigation and Cleanup Program (VICP) Sites	The closest VICP site is identified as the Hi-Lake Senior Apartments at 2230 East Lake Street (adjoining property north). According to the database report, the site (VP29740) is 1.50 acres in size and the site has not yet received regulatory closure. Wenck contacted Mr. Mark Umholtz, the technical analyst assigned to VP29740 to obtain more information about the database listing. According to Mr. Umholtz, soil and groundwater were investigated at the site, and two No Association Determination letters have been granted. The release was identified as VOCs in soil gas below the residential intrusion screening values (ISVs); PAHs, lead and mercury in soil below residential soil reference values (SRVs) but above background levels; and 1,2-dichloroethane in groundwater above health risk limits established by the Minnesota Department of Health. According to Mr. Umholtz, the party that voluntarily entered into the program is not seeking a No Further Action letter. The identified release on adjoining property north presents a material threat of release to the Subject Property, because of its proximity to the Subject Property. Therefore, VP29740 is considered to represent a REC for the Subject Property. The next closest VICP site is identified as the Hi-Lake Shopping Center and as Hi-Lake Shopping Center #2 at 2100 East Lake Street (approximately 0.08 miles west of the Subject Property). According to the MPCA's "What's in My Neighborhood?" online database, the site (VP19180 and VP19181) was involved in the VIC Program from June 2004 until June 2006. The sites are no longer listed as "active" meaning that MPCA staff are no longer billing time to the project. A No Association Determination was issued in August 2004. Wenck contacted Ms. Patrice Jensen, the MPCA Project Leader for VP19180 and VP19181, in order to obtain more information about the extent and magnitude of the identified release, but Ms. Jensen did not recall the investigation. Ms. Jensen referred Wenck to Mr. Gary Krueger of the MPCA. Mr. Krueger reviewed available files and stated that the VICP site is associated with a dry cleaning facility. Mr. Krueger was not able to view No Association Determination that identifies the nature and extent of the release. However, dry cleaning facilities are typically associated with solvent impacts to groundwater. Because the VICP site is located upgradient from the Subject Property with respect to the presumed direction of groundwater flow, it is considered to represent a material threat of release to the Subject Property. Therefore, VP19180 and VP19181 are considered to represent a REC for the Subject Property. Each of the other VICP sites identified is located at least 0.15 miles from the Subject Property. Based on their locations and the information provided in the GeoSearch Radius Report, these listings are not considered a threat to soil,

Number of Sites	Regulatory Database	Comments
		groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs, CRECs or HRECs for the Subject Property.
1	State Assessment Site (SAS)/Unpermitted Dump (UNPERMDUMPS) Sites	The UNPERMDUMPS site is identified as Smith Foundry at 1855 East 28th Street (approximately 0.34 miles northwest of the Subject Property). Because the site is not located upgradient from the Subject Property with respect to the presumed direction of groundwater flow, it is not considered to represent a threat to conditions at the Subject Property. Therefore, the site does not represent a REC, CREC or HREC for the Subject Property.
1	Open Solid Waste Facilities (SWF) site	The SWF site is identified as the Minneapolis Southside Transfer Station at 2850 20th Avenue South (approximately 0.25 miles northwest of the Subject Property). Because the site is not located upgradient with respect to the presumed direction of groundwater flow, it is not considered to represent a threat to conditions at the Subject Property. Therefore, the site does not represent a REC, CREC or HREC for the Subject Property.
3	Superfund (SF) sites	The closest SF site is identified as Ecolotech-Minneapolis at 2619 28th Avenue (approximately 0.61 miles northeast of the Subject Property). The other two SF sites are also located northeast of the Subject Property. Because the SF sites are not located upgradient with respect to the presumed direction of groundwater flow, and because of the distances of the sites from the Subject Property, they are not likely to affect conditions at the Subject Property. Therefore, the SF sites are not considered to represent RECs, CRECs or HRECs for the Subject Property.

Eight unmapped sites were identified in the GeoSearch™ Radius Report. Unmapped sites are those where address information is insufficient to allow the sites to be accurately mapped by GeoSearch™. Wenck was able to ascertain the approximate locations of each unmapped site and was able to determine that none were related to the Subject Property, immediately adjoining sites or properties within the search radii defined by the ASTM Phase I Standards. Based on location and/or database listings, these sites are not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs for the Subject Property.

Wenck reviewed the following regulatory files to determine the potential significance of these database listings relative to the Subject Property:

- The MPCA's "What's in My Neighborhood?" online database
- Closure letter for LEAK # 8324
- Closure letter for LEAK # 15468

Wenck also interviewed Mr. Mark Umholtz of the MPCA and Mr. Gary Krueger of the MPCA (see Section 6.0 of this report).

4.2 ADDITIONAL RECORDS SOURCES

Additional record sources may be consulted when, in the judgment of the Environmental Professional, such additional records are reasonably ascertainable, sufficiently useful, accurate and complete, and are generally obtained pursuant to good commercial and customary practice. Such records may include local brownfield lists, or other local lists similar to those federal, state and tribal lists. Such sources may include local health or environmental departments, fire departments, planning departments, building permit or inspection departments, and other local pollution, water quality or utility companies.

4.2.1 County Tax Information

Hennepin County tax records were researched for the Subject Property, and records were available from the Hennepin County tax assessor's website. The tax records provide publicly available information about the Subject Property, and they did not reveal any additional information with respect to the environmental condition of the Subject Property.

The Hennepin County tax information is included as Appendix C.

4.2.2 Building Records Review

Local building records were not obtained or reviewed for the Subject Property. According to reviewed sources of information, the Subject Property was historically used for residential and commercial purposes. A historical gas station and several shops were located on the north portion of the Subject Property. A commercial building used as a paint factory and later as a machine shop was historically located on the southeast portion of the Subject Property.

4.3 HISTORICAL USE INFORMATION

4.3.1 Aerial Photographs

Aerial photographs were reviewed from 1934, 1937, 1940, 1947, 1953, 1957, 1966, 1969, 1972, 1979, 1984, 1991, 1997, 2000, 2003, 2008 and 2013. The aerial photographs are presented in Appendix D.

Year	Description
1934-1969	In 1934 through 1969 aerial photographs the Subject Property appears to be mostly in residential use, but several stores are visible on the north portion of the Subject Property. Fire Insurance maps state that the stores were used as restaurants, barbershops, and drug stores. Several houses with detached garages are visible on the Subject Property. The 1934 to 1940 photographs identify a small rectangular building on the southeast portion of the Subject Property. A fire insurance map from 1930 identifies the building as a paint factory. By 1940 another rectangular building (identified as a store in a 1951 fire insurance map and as a bowling alley in a 1963 fire insurance map) was constructed on the northeast portion of the Subject Property. By 1947, and addition was constructed on the building on the southeast portion of the Subject Property. A fire insurance map from 1951 identifies the building on the southeast portion of the Subject Property as a machine shop. The building on the southeast portion of the Subject Property was razed by 1969. Surrounding properties appear to be in residential use to the south and west, and commercial use to the north and east. A railway is visible east of Hiawatha Avenue. The 1934 aerial photograph identifies the Pioneers and Soldiers Memorial Cemetery northwest of the Subject Property. South High School was constructed southwest of the Subject Property by 1969.
1972-1984	In the 1972 through 1984 aerial photographs the Subject Property appears to be vacant, undeveloped land. The previously existing dwellings and commercial buildings have been razed. A few trees are visible on the Subject Property. Surrounding properties appear generally as above.
1991-2013	In the 1991 through 2013 aerial photographs the Subject Property appears to be occupied by the currently existing building and paved parking and drive areas. It appears that the currently existing playground and basketball court was added by 2000. Surrounding properties appear generally as above, but significant commercial development and roadwork occurred near Hiawatha Avenue. The commercial building on adjoining property west was constructed between 1997 and 2000.

4.3.2 City Directories

City directories were researched for the Subject Property and surrounding properties. The streets researched were 22nd Avenue South, East 31st Street and East Lake Street, and directories were available for the years 1930, 1935, 1940, 1946, 1952, 1957, 1962, 1966-67, 1972, 1977, 1981-82, 1987, 1993, 1999, 2002, 2007 and 2012. The city directories are included as Appendix E. Listings for the address of the Subject Property (2225 East Lake Street) and the historical addresses of the Subject Property (2201-2239 and 2305 East Lake Street, 3007-3055 22nd Avenue South, 3000-3054 and 3013-3037 23rd Avenue South, 2216-2316 East 31st Street, and 3016-3048 Hiawatha Avenue) consist of the following:

Directory Year	Subject Property Listing
1930	Drug store at 2201 East Lake Street, Barber at 2209 East Lake Street, restaurant at 2209 1/2 East Lake Street, Shoe Repair at 2211 East Lake Street, Restaurant at 2217 East Lake Street, Barber at 2219 East Lake Street, and residential listings. 2300 East 31st Street (the location of the historical Northwestern Telephone Exchange Company building and paint factory building) is listed as vacant.

Directory Year	Subject Property Listing
1935	Restaurant at 2201 East Lake Street, grocery store at 2205 East Lake Street, Salvation Army at 2207 East Lake Street, barbershop/beauty shop at 2209 East Lake Street and George W. Pelkey Filling Station at 2221 East Lake Street. 2300 East 31st Street is listed as Golden Grain Cereal Company.
1940	Listings on East Lake Street appear generally the same as above, but 2207 and 2209 East Lake Street have been vacated, the filling station at 2221 East Lake Street is owned by Earl Douglass, and 2211 East Lake Street is listed as Union Fuel Company. According to Mr. John Evans, Supervisor for Hennepin County Department of Environmental Services, two 550-gallon USTs for gasoline and one 2,000-gallon UST for gasoline were permitted to Earl Douglass on July 9, 1940 and removed on July 15, 1954. The large commercial building observed on the northeast portion of the Subject Property in aerial photographs and fire insurance maps is identified as the Great Atlantic & Pacific Tea Company at 2305 East Lake Street. 2300 East 31st Street is listed as Minneapolis Plastic Molding Company/Pal Tool Company.
1946	Listings on East Lake Street include restaurants, a tire accessories store, toolmakers, and a barbershop. 2221 East Lake Street is no longer identified as a filling station, and 2211 is no longer identified as Union Fuel Company. A & P Food Stores (grocery store) is identified at 2305 East Lake Street. 2300 East 31st Street is listed as Minneapolis Plastic Molders Inc.
1952	Listings on East Lake Street include a bar at 2201 East Lake Street, Stempf Alignment Supply at 2205 East Lake Street, A C Gustafson & Sons Iron Works at 2207-09 East Lake Street, Tractor Transport, Inc. at 2225 East Lake Street, Burbank Motors Inc. (used cars) at 2229 East Lake Street and A & P Food Stores at 2305 East Lake Street. 2300 East 31st Street is listed as Bystrom Bros Inc. (screw machine products).
1957	Listings appear generally as above, but Joe Hackl (auto repair) is listed at 2225 East Lake Street, Joe Hackl Auto Sales (used cars) is listed at 2229 East Lake Street, and Hiawatha Bowling Alley is listed at 2305 East Lake Street. 2300 East 31st Street is listed as Harvey Machine Tool Inc.
1962	Listings appear generally as above, but Larson Tire & Repair is listed at 2207 East Lake Street, and Hiawatha Lake-Lake Auto Upholstery is listed at 2225 East Lake Street. 2300 East 31st Street is listed as General Automatic Products (screw machine products)/Wallar-Lovseth Machinery Inc. (machinists supplies).
1966-67	Listings appear generally as above, but Kilmartin's Tool House Inc. is listed at 2205 East Lake Street and Noope's Polish and Clean Up (auto cleaning and polishing) is listed at 2225 East Lake Street. 2300 East 31st Street is listed as Nursing Home Forms Company/Standard Forms Inc./Johansen Printing.
1972	There are no listings on East Lake Street or East 31st Street for the Subject Property.
1977	There are no listings on East Lake Street or East 31st Street for the Subject Property.
1981-82	There are no listings on East Lake Street or East 31st Street for the Subject Property.
1987	National Education Center at 2225 East Lake Street.

Directory Year	Subject Property Listing
1993	National Education Center (Brown institute Campus) at 2225 East Lake Street.
1999	Brown Institute (vocational school) at 2225 East Lake Street.
2002	Edison PPL Elementary School/Minneapolis Public Schools at 2225 East Lake Street.
2007	"Curriculum Lnstrctnl Sprt"/Minneapolis Public Schools at 2225 East Lake Street.
2012	Minneapolis Public Schools at 2225 East Lake Street.

Other listings in the vicinity of the Subject Property include: historical gas stations on adjoining property north (Tanker Gas Inc. at 2308 East Lake Street and M & H Gas Station at 2300 East Lake Street), and Pilgrim Cleaners at 2210 East Lake Street from 1962 until sometime between 1972 and 1977.

4.3.3 Historical Maps

Two USGS 15-minute series topographic maps of the St. Paul, Minnesota quadrangle, six USGS 7.5-minute series topographic maps of the St. Paul West quadrangle and one historical map dated 1854, 1896, 1951, 1967, 1972, 1977, 1993 and 2013 show the area of the Subject Property.

There are no structures or other items shown on the Subject Property on the 1854 historical map. The Subject Property is located in the NE 1/4 of the NW 1/4 of Section 1, Township 128 North, Range 24 West of the 4th Principle Meridian. A railway is identified east of the Subject Property and another railway is identified south of the Subject Property. Rice Lake (currently known as Hiawatha Lake) is identified south of the Subject Property.

The 1896 and 1951 USGS 15-minute series topographic maps show the Subject Property located in a developed portion of Minneapolis. A cemetery is identified northwest of the Subject Property, and the Mississippi River is identified east of the Subject Property. A rail yard is identified north of the Subject Property near the intersection of Hiawatha Avenue and East 28th Street.

The 1967 through 1977 USGS 7.5-minute series topographic maps show the Subject Property generally as above. The Chicago, Milwaukee, St. Paul, and Pacific Railway is identified east of the Subject Property and a rail yard is identified north of the Subject Property. The cemetery northwest of the Subject Property is identified as Pioneers and Soldiers Cemetery.

The 1993 USGS 7.5-minute series topographic map specifically shows the currently existing building on the Subject Property, whereas previous maps identified the Subject Property as a "developed area" by shading the area pink. A dwelling is identified on adjoining property south.

The 2013 map identifies a school on the Subject Property. The surrounding area appears generally as above.

The historical maps are included as Appendix F.

4.3.4 Fire Insurance Maps

A search was conducted to determine if fire insurance maps and real estate atlases were available for the Subject Property. Fire insurance maps were created for insurance underwriters and often contain information regarding the uses of individual structures and the locations of fuel and/or chemical storage tanks that may have been on a particular property. Real estate atlases often contain similar information.

Fire insurance maps and real estate atlases were available for the Subject Property for the years 1892,1912, 1914, 1925, 1930, 1940, 1951, 1952, and 1963. Fire insurance map research documentation is included as Appendix G.

Year	Description
1892	The 1892 C. M. Foote & Co.® real estate atlas shows the Subject Property developed with several dwellings along 22nd Avenue South, 23rd Avenue South, and Hiawatha Avenue, and four buildings along East Lake Street that are possibly in use as stores. The Subject Property appears to include the north half of Block 6 of Griswold's 3rd Addition to the City of Minneapolis and the northeast portion of Block 2 of Griswold's 2nd Addition to the City of Minneapolis. A roundhouse associated with the Chicago, Milwaukee and St. Paul Railway Company is identified north of the Subject Property near the intersection of Hiawatha Avenue and East 28th Street (approximately 0.30 miles north of the Subject Property). Property south and west of the Subject Property appears to be in residential use.
1912	The 1912 Sanborn® fire insurance map shows the Subject Property generally as above. Several dwellings with detached garages are located throughout the Subject Property, and stores are identified along East Lake Street. A hotel is identified on adjoining property west. A foundry associated with Minneapolis Steel & Machinery Company is identified northeast of the Subject Property, beyond Hiawatha Avenue. Twin City Rapid Transit Company (street car barn and office) and several dwellings are identified on adjoining property north.
1914	1914 Sanborn® fire insurance map shows the Subject Property as above. Surrounding properties appear generally as above. A wood yard and carpet cleaning company is shown on the adjoining property north. Adjoining properties west and south are developed with residential properties and commercial properties located on the adjoining properties east.The roundhouse and associated rail yard has been expanded north of the Subject Property. The Twin City Rapid Transit Company on adjoining property north has also expanded its operations. Layman's Cemetery is identified northwest of the Subject Property.
1925	The 1925 Sanborn® fire insurance map shows the Subject Property generally as above, but a small commercial building in use by Northwestern Telephone Exchange Company was been constructed on the southeast portion of the Subject Property. A lumber company and associated lumber yard are identified east of the Subject Property, just south of the previously mentioned foundry. The surrounding area appears generally as above.
1930	The 1930 Sanborn® fire insurance map shows the Subject Property generally as above, but the building previously used by Northwestern Telephone Exchange Company has been renovated for use as a paint factory. Adjoining property northeast (and west of Hiawatha Avenue) contains a filling station. Other surrounding properties appear generally as above.
1940	The 1940 U.S. Works Projects Administration® real estate atlas shows the Subject Property generally as above, but a commercial building has been constructed on the northeast portion of the Subject Property. Surrounding properties appear generally as above.

Year	Description
1951, 1952	The 1951 and 1952 Sanborn® fire insurance maps show the Subject Property generally as above, but the paint factory has been renovated for use as a machine shop. The surrounding area appears generally as above.
1963	The 1963 Sanborn® fire insurance map shows the Subject Property generally as above, but the building on the northeast portion of the Subject Property is identified as as a bowling alley. The surrounding area appears generally as above.

4.4 PREVIOUS ENVIRONMENTAL REPORTS

Hennepin County did not provide Wenck with previous environmental reports prepared for the Subject Property.

5.0 Site Reconnaissance

5.1 SUBJECT PROPERTY OBSERVATIONS

Mr. Chad Rogers of Wenck conducted a site reconnaissance on August 13, 2014. Mr. Chad Rogers was accompanied during the site reconnaissance by Mr. Chad Carr, Manager of Real Estate & Business Operations for Minneapolis Public Schools, and by Mr. Mike Olson, building engineer at the Subject Property. Wenck staff visually observed the Subject Property to identify current land use, obtain evidence of past uses, and to identify surface characteristics of the Subject Property for the presence of recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions. Subject Property photographs are included in Appendix H.

The site reconnaissance consisted of visually observing the interior and exterior portions of the Subject Property. Wenck staff observed (from the Subject Property boundaries) the adjoining properties for evidence of RECs, CRECs, and HRECs, and for indications of past and current land use.

The Subject Property is currently in use as a school by Minneapolis Public Schools and is referred to as the Adult Education South Campus (photograph 1). Recent occupants of the building include Anishinabe Academy (a Native American education program) and Brown Institute (a college), so many of the employees still refer to the building as the "Brown building" or the "Anishinabe building." The building contains three floors. According to Mr. Olsen, the third floor was constructed approximately 4-5 years ago for use as classroom and science laboratory space by Brown Institute (see photograph 2 for a facility layout map of the third floor). The former science laboratory is now used as storage space and all laboratory chemicals have been removed (photographs 3 and 4). The laboratory is equipped with glass ventilation pipes (for the former hood vents), a science lab master gas shut-off valve, and an eye-wash station. Each floor contains a maintenance room with electrical panels, a dry-type transformer, and small quantities of household cleaning supplies (photograph 5). Each floor also has a storage room containing a water heater powered by natural gas, a mop sink, and small quantities of cleaning supplies (photograph 6). The storage room on the third floor that contains a water heater also contains a filtration device for the former laboratory hood ventilation system (see previously referenced photograph 6). The building also has five computer labs located throughout the building (photograph 7).

The exterior portion of the Subject Property is mostly in use as parking space (photographs 8 and 9). There is a fenced playground that is no longer in use just south of the building on the Subject Property (photograph 10). Near the playground is a cooling tower that is enclosed by a wood fence (photograph 11).

The building is served by utility electric, gas and telephone services. Municipal water and sanitary sewer system also serve the facility. Mr. Olson stated that the building is heated by natural gas HVAC units.

5.1.1 Materials Management

Wenck noted chemicals at the Subject Property consist of small quantities of general cleaning and maintenance chemicals, a 55-gallon drum of ethylene glycol for use in the building's cooling system, three containers of Fremont CE-411 microbiocide and two buckets of bromine oxidizer stored near the outdoor cooling tower, several buckets of Renown high gloss floor finish (REN02820-MS) on the first floor in the boiler room, and small quantities of gasoline and oil for lawn mowers stored in the intermodal container in the parking lot on the Subject Property.

The Farmer's Market leases use of a portion of the parking lot and stores its materials (tables, chairs, decorations, etc.) in an intermodal container on the Subject Property. No significant stains were observed

near the intermodal container. The refuse associated with the Farmer's Market is stored in a separate, enclosed area on the south portion of the Subject Property.

5.1.2 Solid and Hazardous Waste Management

Wenck noted that general refuse was stored in a trash receptacle for off-site disposal. The facility recycled plastic, cardboard, paper and electronic equipment.

Universal waste including light bulbs and batteries are stored in a designated area in the boiler room on the first floor of the building on the Subject Property.

5.1.3 Aboveground and Underground Storage Tanks (ASTs/USTs)

No evidence of ASTs or USTs was identified at the time of the site reconnaissance. No evidence of ASTs or USTs was revealed during the review of the radius map report.

According to Mr. John Evans, Supervisor for Hennepin County Department of Environmental Services, two 550-gallon USTs for gasoline and one 2,000-gallon UST for gasoline were permitted to Mr. Earl Douglass on July 9, 1940 and removed on July 15, 1954. Mr. Earl Douglas owned a portion of the north portion of the Subject Property that was associated with the address 2221 East Lake Street (as indicated by city directories). Mr. Evans also stated that fire department records list the presence of unspecified tank(s) at 2300 31st Street East (a portion of the Subject Property) from December 30, 1932 until the tank(s) were removed on April 3, 1963. According to Mr. Evans, the permittee is identified as Windsor Berverage (*sic*) Company.

5.1.4 Interior and Exterior Surface Observations

Wenck observed no evidence of soil subsidence, surface staining, pooled liquids, stressed vegetation, fill soil piles or debris piles on the Subject Property.

Mr. Mike Olson, building engineer at the Subject Property, stated that the parking lot has been patched several times over the last few years, and that its damage is due to age.

5.1.5 Pits, Sumps, Oil-Water Separators, and Floor Drains

Wenck did not observe the presence of pits, sumps, or oil-water separators at the time of the site reconnaissance. Floor drains were observed in the restrooms on the Subject Property, and one floor drain was observed in the boiler room on the first floor. According to interview information, the floor drains are connected to the city's sanitary sewer system. No evidence of significant stains was observed near the floor drains.

5.1.6 Wastewater and Stormwater Discharge Systems

The Subject Property is served by the municipal sanitary sewer system. Stormwater flows toward areas of lower elevation on the Subject Property and then to the stormwater sewer system associated with East Lake Street and Hiawatha Avenue.

5.1.7 Wells, Drywells, and Lagoons

Wenck did not observe the presence of wells, drywells, or lagoons at the time of the site reconnaissance.

5.1.8 Polychlorinated Biphenyls (PCBs) and Oil-Containing Equipment

Wenck observed one pad-mounted transformer on the south-central portion of the Subject Property at the time of the site reconnaissance. There was no indication on the transformer, such as a label, that may indicate that the transformer does not contain PCBs. The pad-mounted transformer did not show any evidence of leaks or spills at the time of the site reconnaissance.

Fluorescent lighting fixtures were observed throughout the facility. Ballasts associated with these fixtures may contain PCBs. In general, PCB ballasts can become significant when replacing or renovating within the facility, or can become a significant additional cost when demolishing a facility. No other potentially PCB-containing equipment was observed on the Subject Property at the time of the site reconnaissance.

One elevator is located in the Subject Property building. According to interview information, the hydraulics associated with the elevator are routinely inspected and no leaks have been reported.

6.0 Interviews

6.1 INTERVIEW WITH KEY SITE REPRESENTATIVE

Date of Interview	August 13, 2014
Name:	Mr. Michael (Mike) Olson
Affiliation	Facility Engineer
Year familiar with Subject Property	Over 8 years
Telephone Number	612-668-3822

Wenck interviewed Michael Olson regarding the historical and current use of the Subject Property. Mr. Olson provided Wenck with general information about the Subject Property, and he was unaware of any leaks or spills at the Subject Property. Mr. Olson was familiar with the arsenic impacts to soil in the general area of the Subject Property. Information provided by Mr. Olson was used throughout this report.

6.2 INTERVIEW WITH LOCAL GOVERNMENT OFFICIAL

Date of Interview:	August 19, 2014
Name:	Mr. Mark Umholtz
Affiliation:	MPCA Voluntary Investigation & Cleanup Program
Years familiar with Subject Property:	Generally familiar
Telephone Number:	651-757-2308

Wenck contacted Mr. Mark Umholtz, the technical analyst assigned to the VICP site located on adjoining property north (VP29740). Mr. Umholtz recalled that he recently reviewed and approved a construction contingency plan for the site, and he described the identified release at the site to Wenck. Information provided by Mr. Umholtz was used in Section 4.1.2 of this report.

6.3 INTERVIEW WITH LOCAL GOVERNMENT OFFICIAL

Date of Interview:	August 19, 2014
Name:	Mr. Gary Krueger
Affiliation:	MPCA Voluntary Investigation & Cleanup Program
Years familiar with Subject Property:	Generally familiar
Telephone Number:	651-757-2509

Wenck interviewed Mr. Gary Krueger of the MPCA regarding the VICP site located approximately 0.08 miles west of the Subject Property (VP19180 and VP19181). Mr, Krueger reviewed available files and stated that the VICP site is associated with a dry cleaning facility. Mr. Krueger was not able to view the No Association Determination that identifies the nature and extent of the release. Because dry cleaning facilities are typically associated with solvent impacts to groundwater, and because the VICP site is located upgradient from the Subject Property with respect to the presumed direction of groundwater flow, the VICP site is considered to represent a REC for the Subject Property. Information provided by Mr. Krueger was used in Section 4.1.2 of this report.

7.0 Evaluation

7.1 DATA GAPS

Historical information was reviewed back to 1854. Data gaps greater than five years exist from 1854 to 1892, from 1896 to 1912, from 1914 to 1925, and from 1940 to 1946.

The interviews, historical maps, city directories, aerial photographs, and fire insurance maps provide generally good corroborating information that allows an understanding of historical Subject Property use. A research summary is included as Appendix I.

Wenck considers the evaluation of the presence of recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions to be complete, based on the lack of identified changes in land use during the periods affected by any data gaps of more than five years. Therefore, we do not recommend additional investigation relative to the resolution of those data gaps, as we do not believe it would materially affect our conclusion.

7.2 REVEALED FINDINGS

Wenck Associates, Inc. (Wenck) was authorized by Mr. J. Michael Noonan of Hennepin County to conduct this Phase I Environmental Site Assessment (ESA) of the commercial property located at 2225 East Lake Street, Minneapolis, Hennepin County, Minnesota, the Subject Property. The Subject Property consists of 6.38 acres occupied by a commercial building with a footprint of approximately 24,000 square feet, paved parking and drive areas, landscaped areas and a playground. Access to the Subject Property is from East Lake Street, 22nd Avenue South and East 31st Street. The Subject Property location is depicted in Figure 1. A Site Detail Map of the Subject Property is included as Figure 2.

According to fire insurance maps, historical addresses of the Subject Property include 2201-2239 East Lake Street, 3007-3055 22nd Avenue South, 3000-3054 and 3013-3037 23rd Avenue South, 2216-2316 East 31st Street, and 3016-3048 Hiawatha Avenue.

According to fire insurance maps and aerial photographs, several stores were located on the north portion of the Subject Property (facing East Lake Street) from at least 1912 until at least 1969, and the Subject Property was mostly in residential use and contained several dwellings from at least 1892 until at least 1969. Then the dwellings and commercial buildings were razed. A small commercial building existed on the southeast portion of the Subject Property from at least 1925 until sometime between 1966 and 1969. The 1925 fire insurance map identifies the building as Northwestern Telephone Exchange Company. The building was later renovated for use as a paint factory and then as a machine shop. A larger commercial building existed on the northeast portion of the Subject Property from at least 1940 until sometime between 1969 and 1972. Fire insurance maps indicate that this building was used as a grocery store and a bowling alley. City directories indicate that a gas station occupied one of the store fronts on the north portion of the Subject Property from at least 1930 until at least 1940. From at least 1972 until 1986 the Subject Property was vacant, undeveloped land.

The Subject Property has been used as a school since 1986, when the currently existing building was constructed. Historical occupants of the building include Brown Institute, Edison PPL, and Anishinabe Academy. The building is currently occupied by the Minneapolis Public Schools Adult Education Center.

Observations at the time of the site reconnaissance did not indicate that a release or a material threat of release of petroleum products or potentially hazardous substances has occurred as a result of the Subject Property's use as a school.

According to the database report, the Subject Property is a portion of the South Minneapolis Neighborhood Soil Contamination site. Wenck has conducted investigation and remediation work in the area of the Subject Property, and is familiar with arsenic impacts that have been identified in soils in the general area of the Subject Property. Large quantities of pesticide were historically stored uncovered at a facility located approximately 1/4 mile northwest of the Subject Property. Wind forces caused the pesticide to spread and settle on soils throughout the area. Most of the investigations have occurred at residential properties near the Subject Property, and Wenck has not been provided with evidence of investigations on the Subject Property.

According to the database report, property approximately 0.30 miles north of the Subject Property was used as a railroad yard facility for approximately 80 years (from the 1880s until the 1950s/1960s). The database report states that the yard was primarily used for maintenance and repair activities. Fire insurance maps from 1892 and 1914 identify a roundhouse in the same general area. Roundhouses are typically associated with various types of impacts to soil and groundwater. However, because the roundhouse site is not located upgradient from the Subject Property with respect to the presumed direction of groundwater flow, it is not likely to affect conditions at the Subject Property.

The database report also identifies two LUAST incidents on adjoining property east (LEAK # 8324 and LEAK # 15468) and one LUAST incident on adjoining property north (LEAK # 15708). Wenck was able to review closure letters for each incident, and all closure letters state "if future development of the site or surrounding area is planned, it should be assumed that petroleum contamination may be present." Because the three LUAST sites adjoin the Subject Property, it is likely that petroleum impacts have affected conditions on the north and east portions of the Subject Property.

The database report also identifies two VICP sites with three identification numbers near the Subject Property. The closest VICP site is located on adjoining property north (VP29740) and has not received regulatory closure. Wenck contacted Mr. Mark Umholtz, the technical analyst assigned to VP29740 to obtain more information about the database listing. According to Mr. Umholtz, soil and groundwater were investigated at the site, and two No Association Determination letters have been granted. The release was identified as VOCs in soil gas below the residential intrusion screening values (ISVs); PAHs, lead and mercury in soil below residential soil reference values (SRVs) but above background levels; and 1,2-dichloroethane in groundwater above health risk limits established by the Minnesota Department of Health. According to Mr. Umholtz, the party that voluntarily entered into the program is not seeking a No Further Action letter. The identified release on adjoining property north presents a material threat of release to the Subject Property, because of its proximity to the Subject Property. The next closest VICP site is located approximately 0.08 miles west of the Subject Property (VP19180 and VP19181). According to the MPCA's "What's in My Neighborhood?" online database, the site was involved in the VIC Program from June 2004 until June 2006. The sites are no longer listed as "active" meaning that MPCA staff are no longer billing time to the project. A No Association Determination was issued in August 2004. Wenck contacted Ms. Patrice Jensen, the MPCA Project Leader for VP19180 and VP19181, in order to obtain more information about the extent and magnitude of the identified release, but Ms. Jensen did not recall the investigation. Ms. Jensen referred Wenck to Mr. Gary Krueger of the MPCA. Mr. Krueger stated that the VICP site is associated with a dry cleaning facility. Dry cleaning facilities are typically associated with solvent impacts to groundwater. Because the VICP site is located upgradient from the Subject Property with respect to the presumed direction of groundwater flow, it is considered to represent a material threat of release to the Subject Property.

Other sites revealed by the database report, including unmapped sites of regulatory interest, are not likely to affect conditions at the Subject Property based on their locations with respect to the presumed direction of groundwater flow and/or other information provided in the database report.

7.3 OPINIONS

We have reviewed the above findings and have come to the following opinions:

- The historical residential use of the Subject Property from at least 1892 until at least 1969 is not considered to represent a REC, CREC or HREC for the Subject Property, because there is no indication that a release or a material threat of release occurred to the Subject Property as a result of its residential use during that time.
- The historical commercial use of the southeast portion of the Subject Property by Northwestern Telephone Exchange Company and later by a paint factory and a machine shop from at least 1925 until sometime between 1966 and 1969 is considered to represent a REC for the Subject Property, because a material threat of release exists due to common industry practices during that time.
- The historical commercial use of the north portion of the Subject Property as a gas station from at least 1930 until at approximately 1954 is considered to represent a REC for the Subject Property, because a material threat of release exists due to common industrial practices and the likelihood of petroleum spills during that time.
- Other identified commercial uses of the Subject Property between 1892 and 1969 are not considered to represent a REC, CREC or HREC for the Subject Property, because there is no indication that a release or a material threat of release exists as a result of the other identified commercial uses.
- The potential presence of buried foundations from historical structures at the Subject Property is not considered to represent a REC, CREC or HREC for the Subject Property, but the potential presence of buried foundations is considered an item of environmental business risk. Wenck recommends that special care is taken to identify potential buried foundations during future construction and/or earthwork activities at the Subject Property.
- The historical status of the Subject Property as vacant, undeveloped land between 1969 and 1986 is not considered to represent a REC, CREC or HREC for the Subject Property, because there is no indication that a release or a material threat of release existed during that time.
- The past and current use of the Subject Property as an educational facility from 1986 until the present is not considered to represent a REC, CREC or HREC for the Subject Property, because there is no indication that a release or a material threat of release occurred during that time.
- The location of the Subject Property within the South Minneapolis Neighborhood Soil Contamination site is considered to represent a REC for the Subject Property, because a material threat of release of arsenic to soil exists at the Subject Property.
- The presence of two LUAST incidents on adjoining property east (LEAK # 8324 and LEAK # 15468) and one LUAST incident on adjoining property north (LEAK # 15708) are considered to represent RECs for the Subject Property, because a material threat of release exists at the Subject Property due to proximity.
- The presence of a VICP site on adjoining property north (VP29740) is considered to represent a REC for the Subject Property, because a material threat of release exists at the Subject Property due to proximity.
- The presence of a VICP site approximately 0.08 miles west of the Subject Property (VP19180 and VP19181) is considered to represent a REC for the Subject Property, because it is located upgradient with respect to the presumed direction of groundwater flow.
- Other mapped sites of regulatory interest revealed within the GeoSearch™ Radius Report are not considered RECs, HRECs, or CRECs. Based on the review of the revealed sites of regulatory interest, including unmapped site listings revealed within search radii defined by the Practice, we identified no material threat of release to the Subject Property from adjacent or upgradient properties, other than those mentioned above.
- The historical presence of a roundhouse approximately 0.30 miles north of the Subject Property is not considered to represent a REC, CREC or HREC for the Subject Property, because it is not located upgradient with respect to the presumed direction of groundwater flow.

7.4 CONCLUSIONS

Wenck performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Phase I Standards and in accordance with the All Appropriate Inquiry Rule (40 CFR Part 312) of the property and improvements of 2225 East Lake Street in Minneapolis, Hennepin County, Minnesota. Any exceptions to, or deletions from, the ASTM Phase I Standards are described in Section 2.2 and Section 2.3 of this report.

This ESA has revealed the following RECs relative to the Subject Property:

- The historical commercial use of the southeast portion of the Subject Property by Northwestern Telephone Exchange Company and later by a paint factory and a machine shop from at least 1925 until sometime between 1966 and 1969 is a REC for the Subject Property.
- The historical commercial use of the north portion of the Subject Property as a gas station from at least 1930 until at least 1940 is a REC for the Subject Property.
- The location of the Subject Property within the South Minneapolis Neighborhood Soil Contamination site is a REC for the Subject Property.
- The presence of two LUAST incidents on adjoining property east (LEAK # 8324 and LEAK # 15468) and one LUAST incident on adjoining property north (LEAK # 15708) are RECs for the Subject Property.
- The presence of a VICP site on adjoining property north (VP29740) is a REC for the Subject Property.
- The presence of a VICP site approximately 0.08 miles west of the Subject Property (VP19180 and VP19181) is a REC for the Subject Property.

This ESA has not revealed the presence of HRECs or CRECs relative to the Subject Property.

Although not considered to represent a REC, CREC or HREC for the Subject Property, this ESA has revealed the presence of the following item of environmental business risk at the Subject Property:

- The potential presence of buried foundations at the Subject Property is considered an item of environmental business risk. Wenck recommends that special care is taken to identify potential buried foundations during future construction and/or earthwork activities at the Subject Property.

8.0 Non-Scope Considerations

Assessments of potential environmental issues or conditions at the Subject Property that may relate to commercial real estate activities, but were not part of this scope of work include the following:

- Asbestos Survey
- Radon Gas Survey
- Lead-Based Paint Assessment
- Lead in Drinking Water Evaluation
- Wetland Delineation
- Regulatory Compliance Audit
- Cultural and Historic Resources Review
- Industrial Hygiene Review
- Health and Safety Assessment
- Ecological Resources Evaluation
- Endangered Species Survey
- Indoor Air Quality Evaluation
- Mold Investigation
- High Voltage Power Lines Assessment

This list is not intended to be all-inclusive and is not intended to imply significance of further investigation into these non-scope items.

11.0 Qualifications

Company Experience

WENCK ASSOCIATES, INC. is a full-service environmental consulting firm that specializes in providing comprehensive environmental, regulatory, and safety guidance for our client's real estate asset protection, redevelopment and development needs. Collectively, Wenck offers our clients over 25 years of experience, depth of technical and regulatory knowledge and expertise in the following service areas:

- Environmental Assessment Services (Phase I and II)
- Site Preparation/Planning Services
- Integrated Site Remediation and Risk-based Response Actions
- Storage Tank Removal, Replacement and Compliance
- Stormwater Management Plans and Permitting (NPDES requirements, etc)
- Wetlands Delineation and Mitigation
- Environmental Permitting and Compliance
- Asbestos and Lead Identification and Abatement
- Voluntary Cleanup Programs and Guidance on Public Funding Mechanisms for Brownfield Redevelopment
- Indoor Air Quality Assessment
- Facility Layout Review for Environmental and Safety Efficiency
- Environmental Impact Assessments (EIA) and Statements (EIS), Environmental Assessment Worksheets (EAW), Alternative Urban Areawide Review (AUAR)
- Traffic Engineering
- Pollution Prevention Plans
- Greenhouse Gas Services

Wenck strives to provide our clients with strategic, high quality and cost-effective services that are customized to their specific needs. For more extensive information on the services we provide please refer to www.wenck.com.

Individual Bios

Chad Rogers

Chad Rogers joined Wenck Associates, Inc. as part of the real estate transaction group. As an environmental analyst, he primarily focuses on conducting Phase I Environmental Site Assessments. He also has a background working with legal issues. Mr. Rogers holds a Juris Doctorate from William Mitchell College of Law and a Business Administration Degree from the University of St. Thomas.

Aaron Benker

Mr. Aaron Benker Mr. Benker has over 15 years experience in environmental consulting and is the Real Estate Resource Group Manager for Wenck Associates providing leadership in the real estate sector with emphasis on development, transactional and remedial projects. Mr. Benker has significant experience assisting a wide variety of clients navigating environmental programs and achieving regulatory compliance. Mr. Benker has managed and worked on projects in several states in the United States and also Canada.

Appendix A: AAI User Questionnaire

ALL APPROPRIATE INQUIRY USER QUESTIONNAIRE

Property Description/Address: 2225 LAKE STREET

This questionnaire must be completed by the person or entity for whose benefit the investigation is being conducted (the "User" of the report) and given to the environmental consultant. No investigation is required to complete this questionnaire: it should be completed with whatever information the User has at this time.

1. **Environmental cleanup liens.** Are you aware of any environmental cleanup liens on the property that are filed or recorded under federal, tribal, state or local laws?

☐ Yes Explain: _____

☒ No

2. **Activity and land use limitations (AULs).** Are you aware of any AULs, such as engineering controls (e.g., vapor controls, asphalt caps, etc.), land use restrictions or institutional controls (e.g., recorded notices of contamination) that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☐ Yes Explain: _____

☒ No

3. **Specialized knowledge or experience.** Do you have any specialized knowledge or experience related to the property or nearby properties that might indicate the presence or actual or potential contamination at the property? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge or the chemicals and processes used by this type of business?

☐ Yes Explain: _____

☒ No

4. **Relationship of the purchase price to fair market value.** (a) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? *Note: An appraisal is not required. Also, while the User must make this determination, the User is not required to disclose it.*

☒ Yes

☐ No Explain: _____
☐ Purchase price has not been determined.
☐ We have made or will make this determination, but do not wish to disclose it.

(b) If you conclude that there is a difference between the purchase price and fair market value, could the lower purchase price be attributable to contamination that is known or believed to be present at the property? *Note: Whether or not disclosed to the consultant, if the purchase price is*

less than fair market value, the User should document the explanation for the difference, in writing, and retain the explanation.

☐ Yes Explain: _____

☐ No

☐ We have made or will make this determination, but do not wish to disclose it.

5. <u>Commonly known or reasonably ascertainable information.</u> Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional identify conditions indicative of releases or threatened releases? Examples: Do you know of past uses of the property that could have resulted in contamination? Do you know of any spills or other chemical releases that have taken place at the property? Do you know of any environmental cleanups that have taken place at the property?

☐ Yes Explain: _____

■ No

6. <u>Obvious presence or likely presence of contamination.</u> Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

☐ Yes Explain: _____

■ No

Voluntary Investigation and Cleanup Program Sites (VICP)

MAP ID# 19 **Distance from Property: 0.17 mi. SE**

SITE INFORMATION

ID #: **VP23130**
EPA ID #: **NOT REPORTED**
NAME: **DICK - HALVORSON WAREHOUSE**
ADDRESS: **3118 SNELLING AVENUE SOUTH**
MINNEAPOLIS, MN 55406
STATE PROGRAM: **VIC**

SITE TYPE: **SOLVENT SITE**
SITE IS ACTIVE: **NO**
HAZARDOUS RANKING SCORE (HRS): **0.00000**
SITE SIZE: **0.79000 ACRES**
MAJOR WATERSHED: **MISSISSIPPI RIVER (TWIN CITIES)**
LAST UPDATE: **03/03/10**

PHYSICAL LOCATION:(See Below)

CURRENTLY CONSISTS OF A 19,200-SQ FT VACANT WAREHOUSE (1944 WITH ADDITION IN `51) WITH ASSOCIATED PARKING AND LANDSCAPED AREAS. A SECOND-LEVEL OFFICE SPACE INCLUDED. .

NOTES:(See Below)

OWNER SEEKS A NO AXN FOR SOIL/GW FOR RELEASES OF UNK SUSPECTED SOURCES, NO RELEASE CALLED INTO THE MN DUTY OFCR. PLANS ARE TO SELL THE PROPERTY FOR REDEVELOPMENT. LATER CORRESP SUGGESTS THAT THE NO AXN FOR GW WOULD NOT BE FEASIBLE UNLESS EXISTING DATA WOULD SUPPORT THIS ADDITIONAL MEDIA.

LAST UPDATE: **02/17/12**

PHYSICAL LOCATION:(See Below)
TWO PARCELS (1.9 AND 0.8 ACRES. 1-STRY, 24,000 SQ FT BLDG CONST IN `94. NATURAL GAS HEATING AND MUNICIPAL SERVICES. PARKING AND LAWN SURROUNDS.
NOTES:(See Below)
VP OWNS THE SITE, SEEKS A NOAXN FOR SUSPECTED SOIL CONTAM RELATED TO BURIED WASTE AND/OR URBAN FULL MATERIALS. MN DO RELEASE REPORT MADE 9/16/08.

SITE DESCRIPTION:
THE SITE IS 2.8-ACRES AND CONSISTS OF 2 PARCELS HISTORICALLY SUPPORTED RAILROAD SERVICE OPERATIONS FOR OVER 50 YEARS. SINCE THE MID 1990'S, SITE DEVELOPMENT INCLUDES A 24,000 SQUARE-FOOT BUILDING WITH FULL-SERVICE GRAPHICS PRODUCTION OPERATIONS, AND ADJOINING PAVED PARKING AND LANDSCAPED AREAS. PLANS FOR NEXT YEAR ARE TO CONSTRUCT A 16,000 SQUARE FOOT-ADDITION TO THE NORTHEAST SIDE TO THE EXISTING BUILDING WITH AN ADJOINING STORM WATER RETENTION POND.
ENVIRONMENTAL INVESTIGATIONS CONDUCTED AT THE SITE INDICATE THE PRESENCE OF BURIED WASTE DEBRIS AND URBAN FULL MATERIALS TO DEPTHS OF 25 FEET BELOW GRADE. THE FILL WAS DESCRIBED AS INCLUDING WOOD, CINDERS, CLINKERS, BITUMINOUS RUBBLE, CONCRETE RUBBLE, ROOTS, RAILROAD TIES, AND NATURAL SOILS.
DETECTED IN THE SITE SOILS WERE: CONCENTRATIONS OF ARSENIC, LEAD AND MERCURY ABOVE THE MPCA'S SOIL LEACHING VALUES (SLVS) AND THE MPCA'S SOIL REFERENCE VALUES (SRVS) FOR INDUSTRIAL LAND USE; DIESEL RANGE ORGANIC (DRO) COMPOUNDS AT ELEVATED CONCENTRATIONS, BARIUM, CADMIUM, CHROMIUM AND SILVER AT LOW CONCENTRATIONS, POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS) AND PETROLEUM VOLATILE ORGANIC COMPOUNDS (VOCS) NEAR DETECTION-LIMIT CONCENTRATIONS.
PROPOSED DEVELOPMENT RESPONSE ACTIONS, PROJECTED FOR SPRING/SUMMER 2009, CONSIST OF THE FOLLOWING: EXCAVATION, REMOVAL AND PROPER DISPOSAL OF BURIED DEBRIS TO AVERAGE DEPTH OF 10 FEET AND 4 FEET BELOW GRADE FOR CONSTRUCTION OF THE NEW ADDITION AND POND, RESPECTIVELY (FOR ESTIMATED TOTAL OF 6,400 CUBIC YARDS) ; WASTE DEBRIS SEGREGATION FOR RECYCLING OR DEMOLITION DEBRIS DISPOSAL, AS APPROPRIATE; BACKFILLING THE BUILDING FOUNDATION EXCAVATION WITH CLEAN FILL FOLLOWED BY PLACEMENT OF A 15-MIL VAPOR BARRIER BENEATH THE ENTIRE FOOTPRINT OF THE BUILDING ADDITION; AND MONITORING WITH DOCUMENTATION OF SITE EXCAVATION AND CLEANUP CONFIRMATION. ALL EXCAVATED MATERIALS WILL BE CONTINUOUSLY OBSERVED BY THE ENVIRONMENTAL PROFESSIONAL, AND ANY SOIL STOCKPILEDING ON SITE WILL BE PLACED ON AND COVERED WITH 10-MIL POLYETHYLENEWITH PLASTIC SHEETING CONTAINMENT. SCREENING CRITERIA FOR IMPORT FILL IS LESS THAN DRO DETECTION LIMITS AND THE MPCA RESIDENTIAL SRVS AND TIER I SLVS; SCREENING CRITERIA FOR THE STORM WATER POND ARE THE MPCA'S TIER I SLVS FOR ALL PARAMETERS. CONFIRMATION SAMPLES WILL BE COLLECTED BASE AND SIDEWALLS OF THE ADDITION AND RETENTION POND EXCAVATION. CONTINGENCY PLAN MEASURES INCLUDE EVENTS SUCH AS THE ENCOUNTER WITH UNKNOWN TANKS, DRUMS, WELLS, OILY SUBSTANCES, AND/OR SUSPECT ASBESTOS CONTAINING MATERIALS.

SITE DESCRIPTION

THE SOUTH MINNEAPOLIS RESIDENTIAL SOIL CONTAMINATION SITE (THE SITE) IS LOCATED IN MINNEAPOLIS, HENNEPIN COUNTY, MINNESOTA. THE AREA ENCOMPASSED BY THE SITE INCLUDES RESIDENTIAL, COMMERCIAL, INDUSTRIAL, AND MUNICIPAL PROPERTIES. THE SITE IS LARGELY RESIDENTIAL, WITH MUCH OF THE HOUSING BUILT FROM THE EARLY 1900S THROUGH 1930S. THE GENERAL GEOGRAPHICAL COORDINATES FOR THE SITE ARE 44.952187 DEGREES NORTH 93.240479 DEGREES WEST.

IN MINNESOTA, THE LOW-INCOME PERCENTAGE IS 27% AND THE MINORITY PERCENTAGE IS 12%. TO MEET THE ENVIRONMENTAL JUSTICE (EJ) CONCERN CRITERIA, THE AREA WITHIN 1 MILE OF THE SITE MUST HAVE A POPULATION THAT IS TWICE THE STATE LOW-INCOME PERCENTAGE AND/OR TWICE THE STATE MINORITY PERCENTAGE. THAT IS, THE AREA MUST BE AT LEAST 54% LOW INCOME AND/OR 24% MINORITY. FOR THIS SITE THE LOW INCOME PERCENTAGE IS 52%, AND THE MINORITY PERCENTAGE IS 57%, AS DETERMINED BY LANDVIEW IV EJ ANALYSIS. THE SITE THEREFORE MEETS EPA'S EJ CRITERIA.

PREVAILING SUMMER WINDS WERE DETERMINED TO BE FROM THE SOUTHEAST TOWARD THE NORTHWEST; THEREFORE, THE RESIDENTIAL AREA LOCATED DIRECTLY DOWNWIND OF THE CMC HEARTLAND SITE (ALSO KNOWN AS THE CMC HEARTLAND LITE YARD PROPERTY) BECAME THE FOCUS OF THE INITIAL SAMPLING EFFORT. THE CMC HEARTLAND LITE YARD PROPERTY IS LOCATED AT THE NORTHWEST CORNER OF HIAWATHA AVENUE AND 28TH STREET. THE SITE INVESTIGATION WAS LATER EXPANDED TO INCLUDE ALL RESIDENTIAL PROPERTIES, SCHOOLS AND PARKS WITHIN THE APPROXIMATE 3/4-MILE RADIUS CENTERED ON THE FORMER CMC HEARTLAND SITE, BASED UPON THE RESULTS OF AN AIR DISPERSION MODEL.

THE SITE WAS ADDED TO THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY NATIONAL PRIORITIES LIST (NPL) ON SEPTEMBER 19, 2007. THE RISK POSED BY EXPOSURE OF RESIDENTS TO ARSENIC CONTAMINATED SOIL RESULTING FROM RELEASES FROM THE SITE WAS THE PRIMARY REASON FOR THE LISTING.

THE AREA ENCOMPASSED BY THE SITE INCLUDES RESIDENTIAL, COMMERCIAL, INDUSTRIAL, AND MUNICIPAL PROPERTIES. THE SITE IS LARGELY RESIDENTIAL, WITH MUCH OF THE HOUSING BUILT FROM THE EARLY 1900S THROUGH 1930S. A TYPICAL RESIDENTIAL BLOCK HAS APPROXIMATELY 30 PROPERTIES WITH AN AVERAGE LOT SIZE OF APPROXIMATELY 5,500 SQUARE FEET (0.1 ACRE). THE FORMER PLANT SITE PROPERTY HAS BEEN REDEVELOPED AS A

COMMERCIAL WAREHOUSE FACILITY AND INCLUDES A FAMILY CLINIC. LAND USE IN THE SITE AREA HAS BEEN FAIRLY CONSISTENT OVER THE YEARS, WITH RESIDENTIAL PROPERTIES REMAINING RESIDENTIAL. THE LAND USE IS NOT ANTICIPATED TO SIGNIFICANTLY CHANGE. THE CITY OF MINNEAPOLIS DOES HAVE AN ENFORCED ZONING PROGRAM.

THERE ARE NO PRIVATE DRINKING WATER WELLS WITHIN THE SITE AREA. THE MUNICIPALITY SUPPLIES ALL DRINKING WATER AND THE MISSISSIPPI RIVER IS THE SOURCE OF THE WATER. CITY OF MINNEAPOLIS, MINNESOTA CODE OF ORDINANCES CHAPTER 9, SECTION 1 REQUIRES ALL PROPERTIES WITHIN THE CITY TO CONNECT TO THE MUNICIPAL WATER SUPPLY. A SPECIAL WELL CONSTRUCTION AREA (SWCA) HAS BEEN ESTABLISHED BY THE MINNESOTA DEPARTMENT OF HEALTH (MDH) RELATED TO THE ARSENIC PLUME FROM THE FORMER CMC HEARTLAND SITE. THE SWCA, WHICH TOOK EFFECT ON APRIL 1, 2005, APPLIES TO THE CONSTRUCTION, REPAIR, AND SEALING OF ALL WELLS AND WILL REMAIN IN EFFECT UNTIL FURTHER NOTICE. THIS AREA INCLUDES THE AREA BOUNDED BY EAST 26TH STREET ON THE NORTH, 26TH AVENUE ON THE EAST. LAKE STREET ON THE SOUTH, AND BLOOMINGTON AVENUE SOUTH ON THE WEST, WITHIN THE CITY OF MINNEAPOLIS.

THE SWCA REQUIRES THAT: 1) PERMIT APPLICATIONS AND PLANS FOR WATER-SUPPLY WELLS AND MONITORING WELLS MUST BE SUBMITTED TO THE CITY OF MINNEAPOLIS, WHICH WILL THEN CONSULT WITH MDH. NOTIFICATIONS AND PLANS FOR DEWATERING WELLS MUST BE SUBMITTED TO THE MDH, WHICH WILL THEN CONSULT WITH THE CITY OF MINNEAPOLIS. THE SWCA REQUIRES THAT BOTH THE CITY OF MINNEAPOLIS AND THE MDH WILL CONSULT WITH THE MDA; 2) CONSTRUCTION OF A NEW WELL, OR MODIFICATION OF THE DEPTH OF AN EXISTING WELL, MAY NOT TAKE PLACE UNTIL PLANS HAVE BEEN REVIEWED AND APPROVED; 3) SPECIAL WELL CONSTRUCTION AND/OR MONITORING REQUIREMENTS MAY BE IMPOSED DEPENDING ON WELL LOCATION AND USE IN ORDER TO PROTECT PUBLIC HEALTH AND GROUNDWATER QUALITY AND TO PREVENT CONTAMINANT MIGRATION; 4) WATER SUPPLY WELLS WILL NOT BE APPROVED FOR COMPLETION IN THE TERRACE DEPOSITS, GLACIAL DRIFT, PLATTEVILLE LIMESTONE, OR ST. PETER SANDSTONE IN THE SWCA FOR ANY CONSUMPTIVE USES OR OTHER USES INVOLVING HUMAN CONTACT, INCLUDING DRINKING, COOKING, BATHING, MANUFACTURING OR PROCESSING OF FOOD, DRINK, OR PHARMACEUTICALS, OR TO SUPPLY WATER TO PLUMBING FIXTURES ACCESSIBLE TO HUMANS; 5) FOR ALL WATER-SUPPLY WELLS (INCLUDING REMEDIAL WELLS), DEWATERING WELLS, AND MONITORING WELLS, A SAMPLING PLAN AND SCHEDULE TO MONITOR ARSENIC CONCENTRATIONS MUST BE SUBMITTED AND APPROVED PRIOR TO START OF WELL CONSTRUCTION. APPROVALS MUST BE OBTAINED FROM THE APPROPRIATE LOCAL AND/OR STATE AGENCIES FOR ANY DISCHARGE OF WATER FROM THESE WELLS; 6) WELL CONSTRUCTION OR RECONSTRUCTION WILL NOT BE APPROVED IF THE MDH, IN CONSULTATION WITH THE MINNESOTA DEPARTMENT OF AGRICULTURE (MDA), CONCLUDES THAT THE PROPOSED CONSTRUCTION OR RECONSTRUCTION MAY INTERFERE WITH REMEDIATION EFFORTS, CAUSE FURTHER SPREAD OF CONTAMINATION, OR RESULT IN HUMAN EXPOSURE TO CONTAMINANTS AT CONCENTRATIONS EXCEEDING U.S.EPA MAXIMUM CONTAMINANT LEVELS (MCLS) OR MINNESOTA HEALTH RISK LIMITS (HRLS); 7) THE PERMANENT SEALING OF A WELL COMPLETED IN BEDROCK MAY NOT TAKE PLACE UNTIL AFTER THE MDH AND THE CITY OF MINNEAPOLIS (WATER-SUPPLY WELLS AND MONITORING WELLS) HAVE REVIEWED AND APPROVED THE PLANS FOR THE PROPOSED SEALING. IN ADDITION TO THE REQUIRED NOTIFICATION OR PERMIT, THE PLAN MUST INCLUDE THE FOLLOWING INFORMATION: STREET ADDRESS; ORIGINAL WELL DEPTH; CURRENT WELL DEPTH; CASING TYPE(S), DIAMETER(S), DEPTH(S); METHODS FOR IDENTIFYING AND SEALING ANY OPEN ANNULAR SPACE; METHODS FOR IDENTIFYING AND REMOVING ANY OBSTRUCTIONS; AND GROUT MATERIALS AND METHODS.

THE CHICAGO, MILWAUKEE, ST. PAUL, AND PACIFIC RAILROAD COMPANY (MILWAUKEE RAILROAD) OWNED THE PROPERTY LOCATED AT 2016 28TH STREET EAST, FORMERLY KNOWN AS THE CMC HEARTLAND SITE, BEGINNING IN 1880. THE MILWAUKEE RAILROAD DECLARED BANKRUPTCY IN 1985, AND AS A RESULT OF THE BANKRUPTCY, THE CMC HEARTLAND SITE PROPERTY WAS TRANSFERRED TO CMC HEARTLAND PARTNERS (CMC) ON NOVEMBER 8, 1993. 2800 HIAWATHA LLC, ON AUGUST 15, 2005, ACQUIRED THE FORMER CMC HEARTLAND SITE PROPERTY.

FROM 1938 TO 1969, READE MANUFACTURING COMPANY (READE) LEASED THE CMC HEARTLAND SITE PROPERTY FROM THE MILWAUKEE RAILROAD. FROM 1938 TO 1963, READE BLENDED, STORED, AND DISTRIBUTED ARSENICAL HERBICIDES AND PESTICIDES AT THE CMC HEARTLAND SITE PROPERTY. DURING THE 1940S, READE ALSO PRODUCED AN ARSENIC-BASED GRASSHOPPER INSECTICIDE. DURING READE'S OPERATIONS, ARSENIC TRIOXIDE WAS UNLOADED FROM

RAILROAD HOPPER CARS TO AN OPEN CONVEYOR BELT, RESULTING IN POWDERED ARSENIC TRIOXIDE BEING RELEASED INTO THE AIR AND ONTO THE CMC HEARTLAND SITE PROPERTY.

FROM 1963 TO 1968, U.S. BORAX SUBLEASED THE CMC HEARTLAND SITE PROPERTY FROM READE. U.S. BORAX MANUFACTURED, SHIPPED, AND STORED BORATE-BASED HERBICIDES. ALTHOUGH U.S. BORAX DID NOT RECEIVE NEW SHIPMENTS OF POWDERED ARSENIC TRIOXIDE, ITS OPERATIONS AT THE CMC HEARTLAND SITE PROPERTY DISTURBED AND DISPERSED ARSENIC CONTAMINATION STILL PRESENT FROM READE'S OPERATIONS. IN JANUARY 1968, A STORAGE TANK CONTAINING LIQUID SODIUM ARSENITE (NAASO2) RUPTURED, RELEASING APPROXIMATE 3,000 GALLONS OF LIQUID SODIUM ARSENITE FROM A 25,000-GALLON STORAGE TANK ONTO AN AREA APPROXIMATELY 1,000 SQUARE METERS THAT WAS SUBSEQUENTLY COVERED WITH APPROXIMATELY 6 INCHES OF SAND. IN THE PERIOD AFTER 1968, ROLLINS OIL COMPANY AND SUBSEQUENTLY BITUMINOUS ROADWAYS, AN ASPHALT ROAD CONSTRUCTION COMPANY, OCCUPIED THE PROPERTY.

ARSENIC CONTAMINATION WAS DISCOVERED BY THE MINNESOTA DEPARTMENT OF TRANSPORTATION (MNDOT) IN 1994 DURING A RECONSTRUCTION OF THE HIAWATHA AVENUE CORRIDOR ADJACENT TO THE CMC HEARTLAND SITE PROPERTY. AFTER THE ARSENIC CONTAMINATION WAS IDENTIFIED IN 1994, AN ADDITIONA L INVESTIGATION WAS PERFORMED AT THE PROPERTY. BY 1996, BITUMINOUS ROADWAYS HAD PLACED ONE TO TWO FEET OF CRUSHED ASPHALT OVER THE CMC HEARTLAND SITE PROPERTY TO KEEP FURTHER DUST FROM BLOWING OFF THE PROPERTY AND TO MINIMIZE HUMAN EXPOSURE TO SURFACE SOIL. REMEDIAL ACTIONS WERE PERFORMED UNDER THE OVERSIGHT OF THE MDA SUPERFUND PROGRAM AT THE CMC HEARTLAND SITE IN 2004 AND 2005. THE PROPERTY HAS SUBSEQUENTLY BEEN REDEVELOPED. AT PRESENT, THE FORMER CMC HEARTLAND SITE PROPERTY IS OWNED BY 2800 HIAWATHA, LLC AND IS OCCUPIED BY THE HIAWATHA BUSINESS CENTER, AN APPROXIMATE 60,000 SQUARE FOOT LIGHT INDUSTRIAL BUILDING.

AS THE RESULT OF THE INVESTIGATION AT THE CMC HEARTLAND SITE, THE MINNESOTA DEPARTMENT OF HEALTH (MDH) RECOMMENDED IN 1999 THAT SOIL SAMPLING BE PERFORMED IN RESIDENTIAL AREAS NEAR THE CMC HEARTLAND SITE PROPERTY DUE TO THE ELEVATED ARSENIC CONCENTRATIONS. PREVAILING SUMMER WINDS WERE DETERMINED TO BE FROM THE SOUTHEAST TOWARD THE NORTHWEST; THEREFORE, THE RESIDENTIAL AREA LOCATED DIRECTLY DOWNWIND OF THE CMC HEARTLAND SITE PROPERTY BECAME THE FOCUS OF THE INITIAL SAMPLING EFFORT. INVESTIGATIONS IN THE RESIDENTIAL NEIGHBORHOOD PERFORMED BY THE MDH AND MDA IDENTIFIED ARSENIC IMPACTS IN THE SHALLOW SOILS. THE MDA REQUESTED ASSISTANCE FROM EPA IN 2004 AFTER SAMPLING EFFORTS IN THE RESIDENTIAL NEIGHBORHOOD IDENTIFIED PROPERTIES WITH ELEVATED ARSENIC CONCENTRATIONS.

IN 1994, THE MNDOT PERFORMED AN INVESTIGATION OF THE ENTIRE HIAWATHA AVENUE CORRIDOR FOR RECONSTRUCTION. HIAWATHA AVENUE RUNS ALONG THE EASTERN SIDE OF THE CMC HEARTLAND SITE AND THE INVESTIGATION INCLUDED THE EASTERNMOST PART OF THE CMC HEARTLAND SITE. ORGANOCHLORINE PESTICIDES AND ELEVATED LEVELS OF ARSENIC WERE DETECTED IN SOME BORINGS ALONG HIAWATHA AVENUE NEAR THE CMC HEARTLAND SITE.

IN JULY 1995, MNDOT JOINED MDA'S VOLUNTARY CLEANUP PROGRAM, NOW CALLED THE AGVIC PROGRAM, TO FURTHER INVESTIGATE THE ARSENIC CONTAMINATION IN THE HIGHWAY CORRIDOR. THE INVESTIGATION INDICATED THAT THE ARS ENIC CAME FROM THE CMC HEARTLAND SITE.

IN DECEMBER 1995, CMC COMPLETED AN INVESTIGATION THAT INDICATED THE FORMER READE MANUFACTURING COMPANY WAS LIKELY THE PRIMARY SOURCE FOR THE ARSENIC IN THE HIAWATHA AVENUE CORRIDOR NEAR THE SITE. A SUBSEQUENT INVESTIGATION FOCUSED ON THE SOIL NEAR THE LOCATION OF THE FORMER MANUFACTURING BUILDING.

IN DECEMBER 2000, THE MDH FINALIZED THE HEALTH CONSULTATION REPORT FOR THE CMC HEARTLAND SITE. THE HEALTH CONSULTATION EVALUATED ENVIRONMENTAL CONDITIONS BASED ON PREVIOUS INVESTIGATIONS, EVALUATED HEALTH EFFECTS, AND DEVELOPED RECOMMENDATIONS FOR REDUCING OR ELIMINATING EXPOSURE TO THE

CONTAMINANTS. IN THE MDH HEALTH CONSULTATION, INFORMATION WAS PROVIDED ON A WELL RECEPTOR SURVEY FOR THE AREA WITHIN ONE MILE OF THE CMC HEARTLAND SITE. THE WELL RECEPTOR SURVEY IDENTIFIED 39 WELLS INCLUDING TWELVE (12), PUBLIC SUPPLY WELLS, SEVEN (7) COMMERCIAL, THREE (3) INDUSTRIAL USE WELLS, FIFTEEN (15) MONITORING WELLS, AND TWO (2) TEST WELLS.

MDH RECOMMENDATIONS IN THE HEALTH CONSULTATION INCLUDED ADDITIONAL CHARACTERIZATION OF SOIL AND GROUNDWATER, SITE ACCESS AND SOIL MANAGEMENT IMPROVEMENTS AND INSTITUTIONAL CONTROLS.

THE MDH RECOMMENDED SOIL SAMPLING IN RESIDENTIAL AREAS DUE TO ELEVATED CONCENTRATIONS OF ARSENIC AT THE CMC HEARTLAND SITE. IN JUNE 2001, MDA IN CONJUNCTION WITH MDH CONDUCTED A LIMITED SAMPLING EVENT AT RESIDENTIAL PROPERTIES TO THE WEST (CROSSWIND) AND NORTHWEST (DOWNWIND) OF THE CMC HEARTLAND SITE. RESULTS OF THE 2001 MDA SAMPLING EVENT INDICATED ARSENIC CONCENTRATIONS (24 TO 210 MILLIGRAMS PER KILOGRAM [MG/KG]) IN SOIL AT 6 OF THE 11 DOWNWIND PROPERTIES SAMPLED.

BASED ON THE LIMITED SAMPLING DATA, MDA AND MDH ESTABLISHED 4 TO 5 MG/KG AS THE PRELIMINARY BACKGROUND ARSENIC CONCENTRATION IN THE SAMPLING AREA. BASED ON THE JUNE 2001 SAMPLING EVENT AND NEIGHBORHOOD CONCERNS, MDA AND MDH DETERMINED THAT MORE EXTENSIVE SAMPLING TO THE NORTHWEST AND WEST OF THE CMC HEARTLAND LITE YARD PROPERTY WAS WARRANTED. AS A RESU LT, MDA CONDUCTED A SECOND STUDY IN THE NEIGHBORHOOD IN 2003.

IN 2002, THE GREEN INSTITUTE PERFORMED AN INVESTIGATION AT THREE GARDEN PROPERTIES AS PART OF A PROPERTY TRANSFER INVESTIGATION. DURING THE INVESTIGATION, ELEVATED ARSENIC WAS DETECTED IN THE FOUR SURFACE SOIL SAMPLES COLLECTED FROM GARDEN 8, WHICH IS LOCATED AT 2426 17TH AVENUE SOUTH. CONCENTRATIONS RANGED FROM 24 MG/KG TO 38 MG/KG.

DURING A SUPPLEMENTAL INVESTIGATION IN SEPTEMBER 2002, AN ADDITIONAL 13 SAMPLES (7 SAMPLES TO A DEPTH OF 3 INCHES AND 6 SAMPLES TO A DEPTH OF 3 FEET) WERE COLLECTED FROM GARDEN 8 AND RESULTS RANGED FROM 1.8 MG/KG TO 34 MG/KG. A REMEDIAL ACTION PLAN TO EXCAVATE THE ARSENIC-IMPACTED SOIL FROM GARDEN 8 AND DISPOSE OF THE MATERIAL OFFSITE WAS APPROVED BY THE MINNESOTA POLLUTION CONTROL AGENCY ON APRIL 23, 2003.

IN APRIL 2003, A PHASE II ENVIRONMENTAL SITE ASSESSMENT (ESA) WAS PERFORMED FOR THE POWDERHORN RESIDENTS GROUP FOR REDEVELOPMENT OF THE VILLAGE IN PHILLIPS, GENERALLY LOCATED BETWEEN BLOOMINGTON AVENUE AND 17TH AVENUE SOUTH ON THE SOUTH SIDE OF 24TH STREET EAST. SAMPLES WERE COLLECTED DURING THE PHASE II FROM THREE DEPTH INTERVALS (0 TO 3 INCHES, 1.5 TO 2.0 FEET, AND 3.5 TO 4.0 FEET) AT 11 LOCATIONS USING A PROBE. ARSENIC WAS DETECTED AT CONCENTRATIONS FROM NON-DETECT TO 328 MG/KG. A RESPONSE ACTION PLAN WAS SUBSEQUENTLY PREPARED TO EXCAVATE ARSENIC-IMPACTED SOIL AND DISPOSE OF OFFSITE. THE RESPONSE ACTION PLAN WAS APPROVED BY THE MPCA ON OCTOBER 30, 2003.

HENNEPIN COUNTY RAILROAD AUTHORITY (HCRRA) SAMPLED THE RAILROAD CORRIDOR NEAR THE SOUTHWEST COMER CMC HEARTLAND SITE IN 2000. SOIL SAMPLES WERE COLLECTED AT FIVE LOCATIONS ALONG THE RAILROAD CORRIDOR AND ANALYZED FOR ARSENIC. IN 3 OF THE 5 SAMPLES, ARSENIC WAS DETECTED AT OR ABOVE THE MPCA RESIDENTIAL SOIL REFERENCE VALUE (SRV) OF 12 MG/KG. THE SRV IS CONSIDERED A SCREENING LEVEL, I.E. IT IS USED TO INDICATE WHETHER FURTHER INVESTIGATION IS WARRANTED, AND IS NOT CONSIDERED AN ACTION LEVEL. THE 3 LOCATIONS AT OR ABOVE THE RECREATIONAL SRV WERE LOCATED NEAREST THE CMC HEARTLAND SITE AND DEFINED THE WESTERN BOUNDARY OF THE RAILROAD CORRIDOR FOR INVESTIGATION IN 2003.

IN MAY 2003, GEOMATRIX PERFORMED AN INVESTIGATION FOR HCRRA IN THE SECTION OF THE FORMER RAILROAD CORRIDOR WITH ARSENIC CONCENTRATIONS ABOVE THE RECREATIONAL SRV AS DELINEATED IN 2000. THE FORMER RAILROAD CORRIDOR WAS BEING REDEVELOPED INTO A RECREATIONAL PEDESTRIAN/BIKE PATHWAY. A DIRECT-PUSH RIG WAS USED TO COLLECT DISCRETE SAMPLES FROM DEPTH INTERVALS OF 0.5-FEET, 1-FOOT AND 2-FEET BGS AT 40

LOCATIONS. A TOTAL OF 33 SAMPLES COLLECTED FROM 25 LOCATIONS HAD EXCEEDANCES OF THE RECREATIONAL SRV, WITH A MAXIMUM DETECTION OF 85 MG/KG.

TO ADDRESS ARSENIC CONCENTRATIONS GREATER THAN THE RECREATIONAL SRV, A RESPONSE ACTION PLAN WAS PREPARED TO EXCAVATE APPROXIMATELY 500 CUBIC YARDS (CY) OF IMPACTED SOIL FOR OFFSITE DISPOSAL AND PLACEMENT OF 12 INCHES OF CLEAN SOIL COVER.

IN SEPTEMBER 2003, A MORE EXTENSIVE SAMPLING EVENT WAS PERFORMED BY MDA IN THE PHILLIPS NEIGHBORHOOD TO ATTEMPT TO ATTRIBUTE THE ELEVATED ARSENIC CONCENTRATIONS IN THE PHILLIPS NEIGHBORHOOD TO WIND DEPOSITION OF IMPACTED SOIL FROM THE CMC HEARTLAND SITE. THE SAMPLING DESIGN WAS DEVELOPED TO OBTAIN STATISTICALLY VALID DATA WITH A GRID OVERLAIN ON THE PHILLIPS NEIGHBORHOOD WITH THE MAJORITY OF THE SAMPLES FALLING ON RESIDENTIAL PROPERTIES.

DELTA ENVIRONMENTAL CONSULTANTS, INC. (DELTA) COLLECTED SOIL SAMPLES FROM A TOTAL OF 242 LOCATIONS AND 167 PROPERTIES. AN ADDITIONAL 12 REPLICATE SAMPLES WERE COLLECTED FOR QUALITY CONTROL AND 23 CO-LOCATED SAMPLES FOR AN INDICATION OF SPATIAL VARIABILITY. EACH SAMPLE WAS A COMPOSITE USING A "FIVE ON DICE" PATTERN. ARSENIC CONCENTRATIONS GREATER THAN OR EQUAL TO THE MPCA UNRESTRICTED LAND USE STANDARD (10 MG/KG) WERE DETECTED IN 35 SAMPLES FROM 27 PROPERTIES. ARSENIC WAS DETECTED IN 11 SAMPLES AT CONCENTRATIONS GREATER THAN 100 MG/KG AND FOUR OF THOSE SAMPLES CONTAINED ARSENIC CONCENTRATIONS EXCEEDING 20 0 MG/KG.

FOLLOWING THE SEPTEMBER 2003 SAMPLING EVENT, THE MDA REQUESTED EPA ASSISTANCE TO DETERMINE IF A TIME CRITICAL REMOVAL ACTION WAS WARRANTED. THE EPA AGREED TO PERFORM AN ADDITIONAL INVESTIGATION, ENFORCEMENT ACTION, AND TUNE CRITICAL REMOVAL ACTION. IN MAY AND JUNE 2004, TETRA TECH EM INC. (TETRA TECH) CONDUCTED SAMPLING UNDER CONTRACT TO EPA TO EVALUATE SOIL QUALITY ON RESIDENTIAL PROPERTIES. THE GOAL OF THE SAMPLING WAS TO IDENTIFY ARSENIC-IMPACTED PROPERTIES AND PROVIDE ADDITIONAL DELINEATION OF PREVIOUSLY IDENTIFIED ARSENIC IMPACTS. SAMPLES WERE COLLECTED FROM 192 PROPERTIES, PRIMARILY IN THE VICINITY OF PROPERTIES PREVIOUSLY IDENTIFIED AS HOTSPOTS, FROM A DEPTH OF 0 TO 3 INCHES BGS. SEVERAL SAMPLES WERE ALSO COLLECTED ABOUT 3/4 OF A MILE WEST AND NORTHWEST OF THE SITE AREA IN AN ATTEMPT TO DEFINE A CLEAN BOUNDARY AROUND THE PERIMETER OF THE PHILLIPS NEIGHBORHOOD WHERE ARSENIC IMPACTS HAD BEEN DETECTED.

THE EPA, IN CONSULTATION WITH THE AGENCY FOR TOXIC SUBSTANCES AND DISEASE REGISTRY (ATSDR), DETERMINED THAT AN ARSENIC CONCENTRATION EQUAL TO OR GREATER THAN 95 MG/KG IN SURFACE SOILS POSED AN ACUTE RISK TO HUMAN HEALTH AND WARRANTED EMERGENCY REMOVAL ACTIONS. BASED ON THE RESULTS FROM MULTIPLE SAMPLING EVENTS CONDUCTED IN THE PHILLIPS NEIGHBORHOOD, 30 PROPERTIES WERE IDENTIFIED THAT EXCEEDED THE 95 MG/KG CRITERIA. TO MITIGATE THIS THREAT EPA EXCAVATED THE TOP 12 INCHES OF SOIL FROM THE YARD, AND THE TOP 18 INCHES OF SOIL FROM PLAY AREAS AND GARDENS.

ON AVERAGE, 106 CY OF ARSENIC-IMPACTED SOIL WAS REMOVED FROM EACH PROPERTY. POST-EXCAVATION SOIL SAMPLES TO DOCUMENT THE RESIDUAL ARSENIC CONCENTRATIONS IN EACH YARD WERE COLLECTED. THE PROPERTIES WERE BACKFILLED TO PRE-EXISTING GRADE WITH CLEAN TOPSOIL AND SEEDED WITH GRASS SEED FOLLOWING THE COMPLETION OF EXCAVATION.

IN AUGUST 2005, EPA SAMPLED 540 ADDITIONAL PROPERTIES IN THE PHILLIPS NEIGHBORHOOD TO ENSURE THAT 100 PERCENT OF THE RESIDENTIAL PROPERTIES MOST LIKELY TO BE IMPACTED BY WIND DEPOSI TION FROM THE FORMER CMC HEARTLAND SITE WERE EVALUATED FOR POTENTIAL IMPACTS. ANOTHER 60 PROPERTIES WERE ALSO SAMPLED TO IDENTIFY IF AREAS IN OTHER WIND DIRECTIONS SURROUNDING THE CMC HEARTLAND SITE COULD HAVE BEEN IMPACTED. THAT SAMPLING IDENTIFIED ANOTHER 31 PROPERTIES WITH ARSENIC CONCENTRATIONS ABOVE 95 MG/KG. REMOVAL ACTIVITIES PERFORMED WERE CONSISTENT WITH 2004 AND COMMENCED ON SEPTEMBER 20, 2005.

RESULTS FROM THE 2006 AND 2007 RESIDENTIAL SOIL SAMPLING DURING THE REMEDIAL INVESTIGATION DISCUSSED BELOW BROUGHT THE TOTAL NUMBER OF PROPERTIES REQUIRING REMOVAL ACTIONS TO 197. AS OF SPRING 2008, 163 PROPERTIES HAD SOIL REMOVALS COMPLETED. THE REMAINING 34 PROPERTIES ARE ANTICIPATED TO BE COMPLETED BY THE END OF 2008.

IN DECEMBER 2005, THE EPA FIELD ENVIRONMENTAL DECISION SUPPORT (FIELDS) GROUP PERFORMED AN INVESTIGATION TO SEE IF IT COULD FINGERPRINT THE SOURCE(S) OF THE ARSENIC CONTAMINATION, AND TO EVALUATE SPATIAL RELATIONSHIPS WITH OTHER METALS. TWENTY-TWO (22) SAMPLES COLLECTED IN MULTIPLE DIRECTIONS FROM THE CMC HEARTLAND SITE WERE ANALYZED FOR TARGET ANALYTE LIST (TAL) METALS. FROM THE 22 SAMPLES, 10 SAMPLES WITH HIGHER ARSENIC CONCENTRATIONS WERE CLUSTERED TOGETHER IN A STATISTICALLY SIGNIFICANT "HOT SPOT." THE 22 METALS WERE EVALUATED WITHIN AND OUTSIDE THE "HOT SPOT" TO DETERMINE IF THERE WAS A CORRELATION BETWEEN ARSENIC AND OTHER METALS. NO CORRELATION, OR "FINGERPRINT", BETWEEN ARSENIC AND THE 22 METALS ANALYZED WERE IDENTIFIED.

FROM 1996 THROUGH 2004, THE FORMER CMC HEARTLAND SITE (CMC HEARTLAND LITE YARD PROPERTY) WAS COVERED WITH 1 TO 2 FEET OF CRUSHED ASPHALT AND CLEAN FILL TO PREVENT DUST FROM BLOWING OFFSITE UNTIL A PERMANENT CLEANUP WAS CONDUCTED. REMEDIAL ACTIONS WERE PERFORMED AT THE FORMER CMC HEARTLAND SITE IN 2004 AND INVOLVED EXCAVATION, STABILIZATION, AND OFF-SITE DISPOSAL OF ARSENIC-IMPACTED SOIL. SITE CLEANUP STANDARDS OF 20 MG/KG TOTAL ARSENIC AND 525 MG/KG TOTAL LEAD WERE ESTABLISHED FOR THE SOILS WITHIN 4 FEET OF PLANNED FINISHED DEVELOPMENT GRADES TO PREVENT DIRECT-CONTACT EXPOSURE TO CONTAMINATED SOIL AND TO ALLOW FOR COMMERCIAL DEVELOPMENT OF THE PROPERTY.

MORE THAN 24,000 CY OF CONTAMINATED SOIL WAS REMOVED FROM THE "HOT SPOT" ON THE SITE AND LAYBACK. THE "HOT SPOT" WAS AN AREA WITH ELEVATED ARSENIC CONCENTRATIONS FROM GROUND SURFACE TO THE WATER TABLE LOCATED APPROXIMATELY 24 FEET BGS THAT MAY HAVE RESULTED FROM A PREVIOUS SPILL OR THE AREA OF HIGHEST USE AND/OR STORAGE. AN ADDITIONAL 18,200 CY OF SHALLOW SOIL WAS EXCAVATED WITHIN THE UPPER 4 FEET OF PLANNED DEVELOPMENT GRADE OUTSIDE THE "HOT SPOT." OUTSIDE THE CMC HEARTLAND SITE, 10,200 CY OF SHALLOW SOIL WAS REMOVED FROM THE NORTHWEST HENNEPIN COUNTY RAILROAD AUTHORITY (HCRRA) CORRIDOR AND 3,000 CY WAS REMOVED FROM THE SOUTH HCRRA STOCKPILES. DEPENDING ON CONCENTRATIONS, THE EXCAVATED SOILS WERE STABILIZED AND DISPOSED OF OFFSITE AS INDUSTRIAL WASTE OR DISPOSED OF OFFSITE AS INDUSTRIAL WASTE WITHOUT STABILIZATION. A LIMITED QUANTITY OF SOIL WAS REUSED ONSITE WITH THE APPROVAL OF THE MDA.

CLEAN FILL WAS IMPORTED AND PLACED TO RESTORE THE EXCAVATED AREAS TO PLANNED DEVELOPMENT GRADES WITH A PERMANENT 4 FOOT COVER ON THE CONTAMINATED SOILS LEFT IN PLACE; SOILS GREATER THAN 4 FEET DEEP ON A PROPERTY USED FOR COMMERCIAL PURPOSES ARE GENERALLY CONSIDERED INACCESSIBLE. ALTHOUGH SOME SOILS REMAIN ONSITE, WHICH DO NOT MEET THE SOIL CLEANUP GOAL OF 20 MG/KG FOR ARSENIC, THESE SOILS ARE COVERED BY 4 FEET OF CLEAN FILL AND CRUSHED BITUMINOUS ASPHALT, RESTRICTING ACCESS AND PROTECTING HUMAN HEALTH.

THE REMOVAL OF "HOT SPOT" SOILS WAS ESTIMATED TO RESULT IN A 95 PERCENT REDUCTION IN LOADING TO THE GROUNDWATER. INSTITUTIONAL CONTROLS RESTRICT ACCESS TO RESIDUAL CONTAMINATED SOILS AND GROUNDWATER LEFT ON THE CMC HEARTLAND SITE.

IN OCTOBER 2005, THE MDA APPROVED THE 2005 GROUND WATER MONITORING PLAN PREPARED BY PEER ON BEHALF OF CMC UNDER THE AGVIC PROGRAM. THE 2005 GROUND WATER MONITORING PLAN INCLUDES 5 YEARS OF GROUNDWATER QUAL ITY MONITORING, INCLUDING SEMIANNUAL SAMPLING AND TESTING FOR DISSOLVED ARSENIC. AFTER THE 5 YEARS OF MONITORING, THE ENTIRE DATA SET WILL BE EVALUATED AND A DECISION MADE FOR FUTURE GROUNDWATER MONITORING, CORRECTIVE ACTIONS, OR OTHER ALTERNATIVES. A GROUNDWATER ARSENIC PLUME EXTENDING APPROXIMATELY 1,800 FEET WEST-SOUTHWEST OF THE FORMER CMC HEARTLAND SITE HAS BEEN MONITORED SINCE 1996.

THE HIGHEST OBSERVED ARSENIC CONCENTRATION IN GROUNDWATER (320,000 MICROGRAMS PER LITER (PG/L) MEASURED IN MONITORING WELL MW-9 IN 1996) WAS DETECTED IN THE OVERBURDEN NEAR THE FORMER "HOT SPOT." REMEDIAL ACTIONS WERE PERFORMED IN 2004 AND THE FORMER "HOT SPOT" SOILS WERE EXCAVATED WHICH WAS ANTICIPATED TO RESULT IN A REDUCTION OF THE ARSENIC LOADING TO THE GROUNDWATER. AS OF MAY 2006, THE MONITORING WELL NETWORK CONSISTS OF 14 WELLS SCREENED IN THE OVERBURDEN, ONE WELL IN THE PLATTEVILLE LIMESTONE, AND THREE WELLS IN THE ST. PETER SANDSTONE. IN MAY 2006, THE HIGHEST DISSOLVED ARSENIC CONCENTRATION WAS OBSERVED IN AN OVERBURDEN WELL DOWNGRADIENT OF THE FORMER "HOT SPOT" AT 16,000 PARTS PER BILLION (PPB).

THERE ARE NO PRIVATE DRINKING WATER WELLS WITHIN THE SITE AREA. THE MUNICIPALITY SUPPLIES ALL DRINKING WATER AND THE MISSISSIPPI RIVER IS THE SOURCE OF THE WATER. CITY OF MINNEAPOLIS, MINNESOTA CODE OF ORDINANCES CHAPTER 9, SECTION 1 REQUIRES ALL PROPERTIES WITHIN THE CITY TO CONNECT TO THE MUNICIPAL WATER SUPPLY. A SPECIAL WELL CONSTRUCTION AREA (SWCA) HAS BEEN ESTABLISHED BY THE MDH RELATED TO THE ARSENIC PLUME FROM THE FORMER CMC HEARTLAND SITE. THE SWCA, WHICH TOOK EFFECT ON APRIL 1, 2005, APPLIES TO THE CONSTRUCTION, REPAIR, AND SEALING OF ALL WELLS AND WILL REMAIN IN EFFECT UNTIL FURTHER NOTICE. THIS AREA INCLUDES THE AREA BOUNDED BY EAST 26TH STREET ON THE NORTH, 26TH AVENUE ON THE EAST. LAKE STREET ON THE SOUTH, AND BLOOMINGTON AVENUE SOUTH ON THE WEST, WITHIN THE CITY OF MINNEAPOLIS.

IN 2006, CONCURRENT WITH THE INVESTIGATION ACTIVITIES DESCRIBED IN SECTION 12.8, EPA PERFORMED SUPPLEMENTAL INVESTIGATION ACTIVITIES. THESE ACTIVITIES INCLUDED HIGH-DENSITY, PROPERTY SPECIFIC SAMPLING FOR ARSENIC USING X-RAY FLUORESCENCE (XRF) AND MICROSCOPY AND PETROGRAPHY ANALYSES FOR EVALUATION OF THE FORMS OF ARSENIC PRESENT. THE GOAL OF THE XRF WAS TO EVALUATE THE APPLICATION OF XRF FOR USE IN FIELD MEASUREMENTS OF ARSENIC AND TO EVALUATE SMALL-SCALE, PROPERTY SPECIFIC VARIABILITY.

THE POTENTIALLY RESPONSIBLE PARTIES (PRPS) WHICH HAVE BEEN IDENTIFIED FOR THIS SITE ARE CMC HEARTLAND PARTNERS (CMC), FORMER OWNER; U.S. BORAX (BORAX), FORMER OPERATOR; READE MANUFACTURING (READE), FORMER OPERATOR; AND REACTIVE METALS & ALLOY CORPORATION (REMACOR), POTENTIAL SUCCESSOR TO READE.

CERCLA SECTION 104(E) INFORMATION REQUESTS WERE ISSUED TO BORAX, CMC, READE AND REMACOR ON MAY 26, 2004, IN ORDER TO OBTAIN INFORMATION ABOUT THEIR VARIOUS OPERATIONS AT THE LITE YARD SITE. GENERAL NOTICE LETTERS WERE ISSUED TO READE, BORAX AND CMC ON JUNE 21, 2004. BORAX DECLINED TO CONDUCT A REMOVAL ACTION AT THE SITE, ASSERTING THAT IT WAS NOT RESPONSIBLE FOR ALL OR MOST OF THE CONTAMINATION THAT DISPERSED BEYOND THE LITE YARD PROPERTY. CMC STATED THAT THEY WOULD ONLY CONDUCT THE ACTION IF BORAX ALSO CONSENTED TO PARTICIPATE. THE READE MANUFACTURING COMPANY THAT OPERATED AT THE LITE YARD IS NOW DEFUNCT. THE EXISTING READE AND REMACOR COMPANIES DO NOT APPEAR TO BE VIABLE, LIABLE ENTITIES.

ON SEPTEMBER 3, 2004, EPA ISSUED A UNILATERAL ADMINISTRATIVE ORDER (UAO) TO BOTH BORAX AND CMC. THE UAO REQUIRED BORAX AND CMC TO CLEAN UP ARSENIC CONTAMINATION AT ALL IDENTIFIED RESIDENCES WITH ARSENIC LEVELS AT OR ABOVE 95 MG/KG. BORAX AND CMC DECLINED TO PERFORM THE TIME-CRITICAL REMOVAL ACTION UNDER THE UAO FOR THE SAME REASONS THEY PROVIDED IN RESPONSE TO THE GENERAL NOTICE LETTERS.

GENERAL NOTICE LETTERS WERE AGAIN ISSUED TO BOTH CMC AND BORAX ON JANUARY 24, 2005, REQUESTING THAT CMC HEARTLAND AND BORAX NEGOTIATE TO PERFORM A REMEDIAL INVESTIGATION/FEASIBILITY STUDY AN D ADDITIONAL REMOVAL ACTIONS. BOTH COMPANIES DECLINED TO PERFORM THE WORK. CMC SUBSEQUENTLY FILED FOR BANKRUPTCY ON APRIL 28, 2006. EPA FILED A PROOF OF CLAIM IN THAT BANKRUPTCY, SEEKING PAYMENT OF PAST AND FUTURE CLEANUP COSTS FOR THIS SITE.

A RECORD OF DECISION ADDRESSING SITE-WIDE OPERABLE UNIT 00 WAS COMPLETED IN SEPTEMBER 2008.

SITE HISTORY **- NO SITE HISTORY INFORMATION AVAILABLE -**

ACTIONS

TYPE: **NP - PROPOSAL TO NATIONAL PRIORITIES LIST**
START DATE: **NR**
COMPLETION DATE: **09/27/2006**
ACTION TYPE DEFINITION:
SITE PROPOSED FOR INCLUSION ON THE NATIONAL PRIORITY LIST BASED ON THE HAZARD RANKING SYSTEM (HRS) SCORE FOR THE SITE.

TYPE: **IC - ISSUE REQUEST LETTERS (104E)**
START DATE: **NR**
COMPLETION DATE: **05/26/2004**
ACTION TYPE DEFINITION:
EPA ISSUES LETTERS UNDER THE AUTHORITY OF SECTION 104(E) TO GATHER INFORMATION RELATED TO (1) THE IDENTIFICATION, NATURE, AND QUANTITY OF MATERIALS; (2) THE NATURE OR EXTENT OF A RELEASE OR THREATENED RELEASE OF A HAZARDOUS SUBSTANCE, POLLUTANT, OR CONTAMINANT; OR (3) THE ABILITY OF A PERSON TO PAY FOR OR TO PERFORM A CLEANUP.

TYPE: **UA - UNILATERAL ADMIN ORDER**
START DATE: **NR**
COMPLETION DATE: **09/03/2004**
ACTION TYPE DEFINITION:
ADMINISTRATIVE ORDER ISSUED BY EPA UNILATERALLY (UNDER SECTION 106 OF SARA). UNILATERAL ORDERS CAN COMPEL POTENTIALLY RESPONSIBLE PARTIES (PRPS) TO CONDUCT REMOVAL, REMEDIAL INVESTIGATION/FEASIBILITY STUDY, REMEDIAL DESIGN/REMEDIAL ACTION, AND MAY INCLUDE COST RECOVERY. COMMONLY ABBREVIATED UAO.

TYPE: **RV - REMOVAL - TIME CRITICAL**
START DATE: **10/19/2004**
COMPLETION DATE: **10/09/2008**
ACTION TYPE DEFINITION:
RESPONSE ACTION THAT REQUIRES EXPEDITIOUS ATTENTION TO REDUCE IMMINENT AND SUBSTANTIAL DANGERS TO HUMAN HEALTH, WELFARE, OR THE ENVIRONMENT OR AN EMERGENCY RESPONSE REQUIRED WITHIN HOURS OR DAYS TO ADDRESS ACUTE SITUATIONS INVOLVING ACTUAL OR POTENTIAL THREAT TO HUMAN HEALTH, THE ENVIRONMENT, OR REAL OR PERSONAL PROPERTY DUE TO THE RELEASE OF A HAZARDOUS SUBSTANCE. CHARACTERIZATION OF A REMOVAL ACTION AS REMOVAL, NOT IMMEDIATE REMOVAL OR PLANNED REMOVAL, STARTED AT THE BEGINNING OF FY 1987. THIS CODE NOW TAKES THE PLACE OF IMMEDIATE REMOVAL (IR) AND PLANNED REMOVAL (PR).

TYPE: **RP - NON-NATIONAL PRIORITIES LIST POTENTIALLY RESPONSIBLE PARTY SEARCH**
START DATE: **06/21/2004**
COMPLETION DATE: **10/09/2008**
ACTION TYPE DEFINITION:
THE NON-NPL POTENTIALLY RESPONSIBLE PARTY (PRP) SEARCH IS TO IDENTIFY PRPS AT NON-NPL OR REMOVAL ACTION SITES.

TYPE: **RO - RECORD OF DECISION**
START DATE: **NR**
COMPLETION DATE: **09/05/2008**
ACTION TYPE DEFINITION:
THE FINAL RECORD OF DECISION (ROD) IS SIGNED BY THE APPROPRIATE AGENCY INDICATING THAT THE AGENCY HAS CHOSEN THE REMEDY FOR SITE REMEDIATION. ROD SIGNATURE IS SIGNIFIED BY THE COMPLETE DATE.

TYPE: **RD - REMEDIAL DESIGN**
START DATE: **07/01/2008**
COMPLETION DATE: **05/12/2009**

ACTION TYPE DEFINITION:

THE PROCESS OF FULLY DETAILING AND SPECIFYING THE SELECTED REMEDY IDENTIFIED IN THE ROD OR EDD.

TYPE: **RA - REMEDIAL ACTION**

START DATE: **05/26/2009**

COMPLETION DATE: **09/12/2012**

ACTION TYPE DEFINITION:

THE IMPLEMENTATION OF A PERMANENT RESOLUTION TO ADDRESS A RELEASE OR POTENTIAL RELEASE OF A HAZARDOUS SUBSTANCE FROM A SITE.

TYPE: **NX - COMBINED PRELIMINARY ASSESSMENT/SITE INSPECTION**

START DATE: **NR**

COMPLETION DATE: **12/15/2004**

ACTION TYPE DEFINITION:

A COMBINED PA/SI IS DESIGNED TO REDUCE REPETITIVE TASKS AND COSTS. THE RESULTS OF A COMBINED PA/SI CAN BE DOCUMENTED IN ONE REPORT AS LONG AS THE REPORT CONTAINS ALL THE ELEMENTS THAT WOULD HAVE BEEN ADDRESSED UNDER SEPARATE PA AND SI REPORTS.

TYPE: **CM - PRELIMINARY CLOSE-OUT REPORT PREPARED**

START DATE: **NR**

COMPLETION DATE: **09/27/2011**

ACTION TYPE DEFINITION:

A REPORT PREPARED BY THE REMEDIAL PROGRAM MANAGER (RPM) VERIFYING THAT PHYSICAL CONSTRUCTION OF THE REMEDY IS COMPLETE, INDICATING MINOR PUNCH LIST ITEMS THAT REMAIN AND OUTLINING A SCHEDULE OF THE OUTSTANDING ACTIVITIES.

TYPE: **IC - ISSUE REQUEST LETTERS (104E)**

START DATE: **NR**

COMPLETION DATE: **05/26/2004**

ACTION TYPE DEFINITION:

EPA ISSUES LETTERS UNDER THE AUTHORITY OF SECTION 104(E) TO GATHER INFORMATION RELATED TO (1) THE IDENTIFICATION, NATURE, AND QUANTITY OF MATERIALS; (2) THE NATURE OR EXTENT OF A RELEASE OR THREATENED RELEASE OF A HAZARDOUS SUBSTANCE, POLLUTANT, OR CONTAMINANT; OR (3) THE ABILITY OF A PERSON TO PAY FOR OR TO PERFORM A CLEANUP.

TYPE: **NF - FINAL LISTING ON NATIONAL PRIORITIES LIST**

START DATE: **NR**

COMPLETION DATE: **09/19/2007**

ACTION TYPE DEFINITION:

SITE MOVED FROM PROPOSED LIST TO FINAL NATIONAL PRIORITY LIST.

TYPE: **IC - ISSUE REQUEST LETTERS (104E)**

START DATE: **NR**

COMPLETION DATE: **05/26/2004**

ACTION TYPE DEFINITION:

EPA ISSUES LETTERS UNDER THE AUTHORITY OF SECTION 104(E) TO GATHER INFORMATION RELATED TO (1) THE IDENTIFICATION, NATURE, AND QUANTITY OF MATERIALS; (2) THE NATURE OR EXTENT OF A RELEASE OR THREATENED RELEASE OF A HAZARDOUS SUBSTANCE, POLLUTANT, OR CONTAMINANT; OR (3) THE ABILITY OF A PERSON TO PAY FOR OR TO PERFORM A CLEANUP.

TYPE: **HR - HAZARD RANKING SYSTEM PACKAGE**

START DATE: **NR**

COMPLETION DATE: **09/27/2006**

ACTION TYPE DEFINITION:

A NUMERIC ESTIMATE OF THE RELATIVE SEVERITY OF A HAZARDOUS SUBSTANCE RELEASE OR POTENTIAL RELEASE BASED ON: (1) THE RELATIVE POTENTIAL OF SUBSTANCES TO CAUSE HAZARDOUS SITUATIONS; (2) THE LIKELIHOOD AND RATE AT WHICH THE SUBSTANCES MAY AFFECT HUMAN AND ENVIRONMENTAL RECEPTORS; AND (3) THE SEVERITY AND MAGNITUDE OF POTENTIAL EFFECTS. THE SCORE IS COMPUTED USING THE HAZARD RANKING SYSTEM (HRS).

TYPE: **DS - DISCOVERY**

START DATE: **NR**

COMPLETION DATE: **12/15/2004**

ACTION TYPE DEFINITION:

THE PROCESS BY WHICH A POTENTIAL HAZARDOUS WASTE SITE IS BROUGHT TO THE ATTENTION OF THE EPA. THE PROCESS CAN OCCUR THROUGH THE USE OF SEVERAL MECHANISMS SUCH AS A PHONE CALL OR REFERRAL BY ANOTHER GOVERNMENT AGENCY.

TYPE: **CO - COMBINED REMEDIAL INVESTIGATION/FEASIBILITY STUDY**

START DATE: **03/18/2005**

COMPLETION DATE: **09/05/2008**

ACTION TYPE DEFINITION:

THE PROCESS OF DATA COLLECTION AND ANALYSES OF THE SITE PROBLEM, IDENTIFICATION OF PRELIMINARY REMEDIAL ALTERNATIVES, AND RECOMMENDATION OF A COST-EFFECTIVE REMEDY. THERE CAN BE MULTIPLE REMEDIAL INVESTIGATION/FEASIBILITY STUDIES (RI/FS) CONDUCTED AT A SITE.

TYPE: **NJ - NOTICE LETTERS ISSUED**

START DATE: **NR**

COMPLETION DATE: **06/21/2004**

ACTION TYPE DEFINITION:

EPA ISSUES NOTICE LETTERS TO POTENTIALLY RESPONSIBLE PARTIES INFORMING THEM OF THEIR POTENTIAL LIABILITY UNDER CERCLA AND INVITING THEM TO DISCUSS INVOLVEMENT AT THE SITE.

Environmental Records Definitions - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem

VERSION DATE: 04/28/14

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BRS Biennial Reporting System

VERSION DATE: 12/31/11

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 09/06/13

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

DOCKETS EPA Docket Data

VERSION DATE: 12/22/05

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

EC Federal Engineering Institutional Control Sites

VERSION DATE: 01/14/14

This database includes site locations where Engineering and/or Institutional Controls have been identified as part

of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

ERNSMN Emergency Response Notification System

VERSION DATE: 12/31/12

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSMN Facility Registry System

VERSION DATE: 08/04/13

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR05 Hazardous Materials Incident Reporting System

VERSION DATE: 01/10/14

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 5. Region 5 includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

ICIS Integrated Compliance Information System (formerly DOCKETS)

VERSION DATE: 08/01/12

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System

VERSION DATE: 08/01/12

In 2006, the Integrated Compliance Information System (ICIS) - National Pollutant Discharge Elimination System (NPDES) became the NPDES national system of record for select states, tribes and territories. ICIS-NPDES is an information management system maintained by the United States Environmental Protection Agency's Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. ICIS-NPDES is designed to support the NPDES program at the state, regional, and national levels.

MLTS Material Licensing Tracking System

VERSION DATE: 01/30/13

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

NPDESR05 National Pollutant Discharge Elimination System

VERSION DATE: 04/01/07

Information in this database is extracted from the Water Permit Compliance System (PCS) database which is used by United States Environmental Protection Agency to track surface water permits issued under the Clean Water Act. This database includes permitted facilities located in EPA Region 5. This region includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin. The NPDES database was collected from December 2002 until April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data.

PADS PCB Activity Database System

VERSION DATE: 06/01/13

The PCB Activity Database System (PADS) is used by the United States Environmental Protection Agency to monitor the activities of polychlorinated biphenyls (PCB) handlers.

PCSR05 Permit Compliance System

VERSION DATE: 08/01/12

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 5. This region includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

RCRASC RCRA Sites with Controls

VERSION DATE: 01/14/14

This list of Resource Conservation and Recovery Act sites with institutional controls in place is provided by the U.S. Environmental Protection Agency.

SFLIENS CERCLIS Liens

VERSION DATE: 06/08/12

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

SSTS Section Seven Tracking System

VERSION DATE: 12/31/09

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/31/12

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/31/06

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and

importer site.

NLRRCRAG No Longer Regulated RCRA Generator Facilities

VERSION DATE: 04/10/14

This database includes RCRA Generator facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly generated hazardous waste.
Large Quantity Generators: Generate 1,000 kg or more of hazardous waste during any calendar month; or Generate more than 1 kg of acutely hazardous waste during any calendar month; or Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or Generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.
Small Quantity Generators: Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.
Conditionally Exempt Small Quantity Generators: Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

RCRAGR05 Resource Conservation & Recovery Act - Generator Facilities

VERSION DATE: 04/10/14

This database includes sites listed as generators of hazardous waste (large, small, and exempt) in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). This database includes sites located in EPA Region 5. This region includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.
Large Quantity Generators: Generate 1,000 kg or more of hazardous waste during any calendar month; or Generate more than 1 kg of acutely hazardous waste during any calendar month; or Generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month; or Generate 1 kg or less of acutely hazardous

waste during any calendar month, and accumulate more than 1kg of acutely hazardous waste at any time; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.
Small Quantity Generators: Generate more than 100 and less than 1000 kilograms of hazardous waste during any calendar month and accumulate less than 6000 kg of hazardous waste at any time; or Generate 100 kg or less of hazardous waste during any calendar month, and accumulate more than 1000 kg of hazardous waste at any time.
Conditionally Exempt Small Quantity Generators: Generate 100 kilograms or less of hazardous waste per calendar month, and accumulate 1000 kg or less of hazardous waste at any time; or Generate one kilogram or less of acutely hazardous waste per calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste; or Generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, or acutely hazardous waste during any calendar month, and accumulate at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste.

HISTPST Historical Gas Stations

VERSION DATE: 07/01/30

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

BF Brownfields Management System

VERSION DATE: 04/15/14

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment.

CERCLIS Comprehensive Environmental Response, Compensation & Liability Information System

VERSION DATE: 10/25/13

CERCLIS is the repository for site and non-site specific Superfund information in support of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This United States Environmental Protection Agency database contains an extract of sites that have been investigated or are in the process of being investigated for potential environmental risk.

LUCIS Land Use Control Information System

VERSION DATE: 09/01/06

The LUCIS database is maintained by the U.S. Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

NFRAP No Further Remedial Action Planned Sites

VERSION DATE: 10/25/13

This database includes sites which have been determined by the United States Environmental Protection Agency, following preliminary assessment, to no longer pose a significant risk or require further activity under CERCLA. After initial investigation, no contamination was found, contamination was quickly removed or contamination was not serious enough to require Federal Superfund action or NPL consideration.

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities

VERSION DATE: 04/10/14

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

ODI Open Dump Inventory

VERSION DATE: 06/01/85

The open dump inventory was published by the United States Environmental Protection Agency. An “open dump” is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

RCRAT Resource Conservation & Recovery Act - Treatment, Storage & Disposal Facilities

VERSION DATE: 04/10/14

This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste in the RCRAInfo system. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

DNPL Delisted National Priorities List

VERSION DATE: 10/25/13

Environmental Records Definitions - FEDERAL

This database includes sites from the United States Environmental Protection Agency's Final National Priorties List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

DOD Department of Defense Sites

VERSION DATE: 12/01/05

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

FUDS Formerly Used Defense Sites

VERSION DATE: 02/01/13

The 2011 Formerly Used Defense Sites (FUDS) inventory includes properties previously owned by or leased to the United States and under Secretary of Defense Jurisdiction, as well as Munitions Response Areas (MRAs). The remediation of these properties is the responsibility of the Department of Defense. This data is provided by the U.S. Army Corps of Engineers (USACE), the boundaries/polygon data are based on preliminary findings and not all properties currently have polygon data available. DISCLAIMER: This data represents the results of data collection/processing for a specific USACE activity and is in no way to be considered comprehensive or to be used in any legal or official capacity as presented on this site. While the USACE has made a reasonable effort to insure the accuracy of the maps and associated data, it should be explicitly noted that USACE makes no warranty, representation or guaranty, either expressed or implied, as to the content, sequence, accuracy, timeliness or completeness of any of the data provided herein. For additional information on Formerly Used Defense Sites please contact the USACE Public Affairs Office at (202) 528-4285.

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities

VERSION DATE: 04/10/14

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NPL National Priorities List

VERSION DATE: 10/25/13

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

PNPL Proposed National Priorities List

VERSION DATE: 10/25/13

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities

VERSION DATE: 04/10/14

This database includes hazardous waste sites listed with corrective action activity in the RCRAInfo system. The Corrective Action Program requires owners or operators of RCRA facilities (or treatment, storage, and disposal facilities) to investigate and cleanup contamination in order to protect human health and the environment. The United States Environmental Protection Agency defines RCRAInfo as the comprehensive information system which provides access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS).

RODS Record of Decision System

VERSION DATE: 07/01/13

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

Environmental Records Definitions - STATE (MN)

AIRS Permitted Air Facilities

VERSION DATE: 04/09/14

This database contains facilities with air permits issued by the by the Minnesota Pollution Control Agency. These permits identify the units at each facility that generate air pollutants and, where applicable, the limits on those emissions. In some cases a permit may also authorize construction or modification of a facility.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 02/11/14

This listing of clandestine methamphetamine laboratories is provided by the Minnesota Department of Health. Each meth lab, spill or dump is a potential hazardous waste site, requiring assessment and remediation by experienced and qualified personnel. Former meth lab sites are being cleaned (or remediated) in many Minnesota communities. In these communities, the cleanups are being guided by city and county ordinances, local housing laws, and Minnesota Statute 145A, the Public Health Nuisance Statute.

FEEDLOT Feedlots

VERSION DATE: 04/09/14

Feedlots may be small farms or large-scale commercial livestock operations. They are places where animals are confined for feeding, breeding or holding. The Minnesota Pollution Control Agency (MPCA) and its county partners place requirements on how manure is managed at feedlots, so that it does not contaminate nearby surface water and groundwater.

PCASPILLS Spills Listing

VERSION DATE: 04/01/14

The Minnesota Pollution Control Agency's Emergency Response Team maintains this listing of reported petroleum product, hazardous substance, and/or other spills.

SWUP Solid Waste Utilization Projects

VERSION DATE: 04/09/14

According to the Minnesota Pollution Control Agency, a solid waste utilization project uses certain wastes in a new way to recycle the material instead of putting it into a landfill. An example is using tires to create furniture. The beneficial use of waste products saves landfill capacity for materials that do not have alternative uses. By using solid waste, individuals and organizations can reduce disposal costs, or even generate profit through the sale of materials that have a beneficial use.

TIERII Tier Two Facility Listing

VERSION DATE: 12/31/12

The Minnesota Department of Public Safety's Emergency Planning and Community Right-to-Know Act Program (EPCRA) maintains this listing of Tier Two facilities which store hazardous chemicals on-site. These facilities subject to EPCRA reporting submit Tier II forms which provide information such as the Material Safety Data Sheet (MSDS) chemical or common name, emergency contact information, approximate amount of chemical stored, along with the location of the chemical at the facility.

WDP Water Discharge Permits

VERSION DATE: 04/09/14

This Minnesota Pollution Control Agency (MPCA) database includes the following types of water permits: Construction Stormwater Permits, Construction Stormwater Site Subdivisions, Industrial Stormwater Permits, MS4 Projects, and Wastewater Dischargers. A construction stormwater permit is designed to limit pollution during and after construction by controlling the erosion associated with construction activities. A construction stormwater site subdivision is a site where a construction project with an existing stormwater permit has been sub-divided into smaller parcels. Industrial stormwater permits are designed to limit the amount of harmful contaminants that reach surface water and groundwater, by requiring good practices for storing and handling materials. A Municipal Separate Storm Sewer System (MS4) is a system of conveyances - such as gutters, ditches, city streets and storm drains - which is used as a path for stormwater. Regulated MS4s cover large areas, and are owned or operated by a public entity such as a city, county, township, watershed district or university. A wastewater discharger is a facility that generates or treats wastewater for discharge onto land or into water.

BULKSTORAGE Bulk Storage Permits

VERSION DATE: 03/24/14

The Minnesota Department of Agriculture's Licensing Information System (LIS) lists individuals or companies who hold licenses, certificates and/or permits required by state law and regulated by the Department. This database only contains those LIS licenses related to anhydrous ammonia storage facilities and bulk pesticide/ fertilizer storage facilities. Please note the data is real time and therefore constantly changing.

CLEANERS Registered Drycleaning Facilities

VERSION DATE: 10/05/10

The Minnesota Pollution Control Agency maintains this listing of registered dry cleaning facilities.

IC Sites with Institutional Controls

VERSION DATE: 03/26/14

Institutional controls are defined by Minnesota Statute, Section 115B.02, subdivision 9a, as legally enforceable restrictions, conditions, or controls on the use of real property, ground water, or surface water located at or adjacent to a facility where response actions are taken that are reasonably required to assure that the response actions are protective of public health or welfare or the environment. Institutional controls include restrictions,

conditions, or controls enforceable by contract, easement, restrictive covenant, statute, ordinance, or rule, including official controls such as zoning, building codes, and official maps. An affidavit required under section 115B.16, subdivision 2, or similar notice of a release recorded with real property records is also an institutional control.

PBRLF Permitted By Rule Landfills

VERSION DATE: 04/09/14

According to the Minnesota Pollution Control Agency, a landfill that is permitted by rule is not required to obtain an individual solid waste permit if it meets certain eligibility criteria. However, it must comply with waste management rules and regulations. Landfills may be permitted by rule if they have a small capacity and/or operate for a short period of time.

UAST Registered Storage Tanks

VERSION DATE: 04/01/14

The Registered Storage Tanks Database provides information on aboveground and underground storage tanks registered with the Minnesota Pollution Control Agency. Owners of USTs and ASTs with a capacity of 500 gallons or more which contain petroleum or hazardous substances must notify the MPCA of the existence of these tanks. Tanks not subject to notification include farm and residential motor fuel tanks less than 1,100 gallons; heating oil tanks less than 1,100 gallons; flow-through process tanks; septic tanks; and agricultural chemical tanks.

AGSPILLS Agricultural Spills Listing

VERSION DATE: 03/17/14

This list of reported spill incidents is provided by the Minnesota Department of Agriculture (MDA). The MDA is the lead agency for response to, and cleanup of, agricultural chemical contamination (pesticides and fertilizers) in Minnesota. The MDA has grouped these spills into three categories: Old Emergencies, Small Spills and Investigations, and Investigations Boundaries. Old Emergencies represent emergencies which were closed prior to March 1, 2004. These files and the locations plotted have not been reviewed for accuracy and completeness. Smalls Spills and Investigations represent the location of small spills and investigations, which were closed after March 1, 2004. Investigation Boundaries represent the approximate extent of large spills and other types of facility investigations. Facility Investigations are further subdivided into the following program areas: Awaiting Prioritization Investigation files of known or potential agricultural chemical contamination that are waiting to be prioritized; Prioritized Investigation files of known or potential agricultural chemical contamination that have been prioritized and are awaiting activation; Comprehensive Facility Investigation / MERLA Investigation files of known or potential agricultural chemical contamination that have been activated in MDA's Comprehensive Facility Investigation Program or are active Superfund sites under MDA's oversite; AgVIC Investigation files of known or potential agricultural chemical contamination that have enrolled in the MDA's Agricultural Voluntary Investigation and Cleanup (AgVIC) Program; and Agricultural Chemical Emergency Response Investigation files that were reported as emergency spills of agricultural chemicals and are large enough in size to be represented by a polygon.

CAFO Concentrated Animal Feeding Operations

VERSION DATE: 04/07/14

A Concentrated Animal Feeding Operation (CAFO) is any feeding operation with a capacity of 1,000 or more animal units according to federal animal unit calculations. The Minnesota Pollution Control Agency can also define a facility with less than 1,000 animal units as a CAFO on a case-by-case basis, depending on site conditions, and if manure or process wastewater is directly discharged to waters of the state. Facilities that are CAFOs must comply with both federal regulations and state rules. Two or more feedlots under common ownership are considered a single facility if they adjoin each other or use the same manure storage or disposal system.

CLF Closed Landfills

VERSION DATE: 04/09/14

The Minnesota Pollution Control Agency Closed Landfill Program (CLP) is a voluntary program established by the legislature in 1994 to properly close, monitor, and maintain Minnesota's closed municipal sanitary landfills. Any MPCA-permitted mixed-municipal solid waste landfill that stopped accepting mixed municipal solid waste (MMSW) by April 9, 1994, and demolition debris before May 1, 1995, can qualify for application to this program.

CONTINGENCIES Agricultural Contingency Sites

VERSION DATE: 03/17/14

The Minnesota Department of Agriculture (MDA) Incident Response Unit (IRU) is the state lead agency for the investigation and remediation of incidents involving agricultural chemicals (pesticides and fertilizer). This MDA IRU database includes sites with a soil or ground water contingency, deed restriction, local ordinance, restrictive covenant or deed affidavit in place. The accuracy of these sites can be variable. In most cases, the site boundaries should be considered as only representing the vicinity of the soil or ground water contingency area or plume.

LUAST Registered Leaking Storage Tanks

VERSION DATE: 04/01/14

The Minnesota Pollution Control Agency maintains this listing of leaking aboveground and underground storage tanks. Tank owners are required to immediately report a leak or spill of more than five gallons of petroleum, or any amount of a hazardous substance, from any tank or piping. All leaks and spills from USTs and ASTs and associated piping must be cleaned up to protect the environment and public health.

PBF Petroleum Brownfields Program Sites

VERSION DATE: 04/09/14

This listing of Petroleum Brownfield sites, including those with Development Response Action Plans dated between 2008 and 2012, is provided by the Minnesota Pollution Control Agency (MPCA). The Petroleum

Brownfields Program (formerly VPIC) provides the technical assistance and liability assurance needed to facilitate and expedite the development, transfer, investigation and/or cleanup of property that is contaminated with petroleum. Even after cleanup or MPCA file closure most properties will have contamination remaining. State law requires that persons properly manage contaminated soil and water they uncover or disturb - even if they are not the party responsible for the contamination. Property owners, purchasers or developers of property where contaminated soil or water might be encountered may include provisions - called "response actions" - in development plans describing how petroleum contaminated soil and water will be managed if encountered. For some properties, special construction might be needed to prevent the further spreading of the contamination and/or to prevent petroleum vapors from entering buildings or utility access shafts.

PVICP Potential Voluntary Investigation and Cleanup Program Sites

VERSION DATE: 03/27/14

This listing of Potential Voluntary Investigation and Cleanup Program sites is provided by the Minnesota Pollution Control Agency. These potential sites have not yet entered into the VIC Program until an application has been received at the MPCA.

SAS State Assessment Sites

VERSION DATE: 04/09/14

State Assessment sites are places that Minnesota Pollution Control Agency (MPCA) Site Assessment staff have investigated because of suspected contamination. The sites investigated include abandoned industrial properties, small commercial businesses and publicly-owned land. (Note that petroleum-contaminated sites are investigated by MPCA Tanks and Leaks staff.) These sites may be referred to the Site Assessment program by the Voluntary Investigation and Cleanup (VIC) program, the Petroleum Remediation program, Minnesota Duty Officer reports or citizen complaints. Site Assessment staff do an initial assessment, and then determine if further action is needed. If a site poses a threat to human health or the environment, it is referred to CERCLIS, Superfund, RCRA Cleanup or VIC.

SRS Site Response Section Database

VERSION DATE: 03/27/14

The Minnesota Pollution Control Agency (MPCA) is involved in remediation activities through various programs. Remediation is the process of cleaning up pollution in the soil, water or air. The pollution can result from an accidental spill or from activities that occur over a long time. This MPCA database includes remediation sites from the Superfund, Voluntary Investigation and Cleanup, Brownfields, Resource Conservation and Recovery Act, Tanks, Landfills, and Emergency Response Programs.

SWF Open Solid Waste Facilities

VERSION DATE: 04/09/14

Open landfills are regulated by Minnesota Rules 7001 and 7035. They actively accept, under the terms and conditions of a Minnesota Pollution Control Agency permit, certain types of wastes for disposal. They are part of

a larger and integrated collection of open solid waste management facilities that process, transfer and receive waste for disposal in Minnesota. Open landfills fall into several categories, which include: demolition, industrial, mixed municipal and municipal waste combustor ash.

UNPERMDUMPS Unpermitted Dump Sites

VERSION DATE: 04/09/14

Unpermitted dump sites are landfills that never held a valid permit from the Minnesota Pollution Control Agency (MPCA). Generally, these dumps existed prior to the permitting program established with the creation of the MPCA in 1967. These dumps are not restricted to any type of waste, but were often old farm or municipal disposal sites that accepted household waste. State assessment staff have investigated many of these dump sites.

VICP Voluntary Investigation and Cleanup Program Sites

VERSION DATE: 03/27/14

The Voluntary Investigation and Cleanup (VIC) Program site listing is provided by the Minnesota Pollution Control Agency. This program encourages timely property transactions by reducing potential health or environmental risks from contamination and promoting the redevelopment of these properties.

CSTF Contaminated Soil Treatment Facilities

VERSION DATE: 04/09/14

Contaminated soil treatment facilities are places that the Minnesota Pollution Control Agency (MPCA) has approved or permitted to take petroleum-contaminated soils from leak sites and provide treatment through a number of different processes. The processes include thermal treatment (usually by roasting soils at high temperatures), composting, or thin-spreading soils and allowing natural microorganisms to biodegrade the petroleum.

SF Superfund Site Information Listing

VERSION DATE: 03/27/14

The Minnesota Pollution Control Agency's Superfund Program identifies, investigates and determines appropriate cleanup plans for abandoned or uncontrolled hazardous waste sites where a release or potential release of a hazardous substance poses a risk to human health or the environment. Superfund does not deal with Resource Conservation and Recovery Act (RCRA) sites or petroleum storage tank releases.

Environmental Records Definitions - TRIBAL

USTR05 Underground Storage Tanks On Tribal Lands

VERSION DATE: 11/04/13

This database, provided by the United States Environmental Protection Agency (EPA), contains underground storage tanks on Tribal lands located in EPA Region 5. Region 5 includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

LUSTR05 Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 11/06/13

This database, provided by the United States Environmental Protection Agency (EPA), contains leaking underground storage tanks on Tribal lands located in EPA Region 5. Region 5 includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

ODINDIAN Open Dump Inventory on Tribal Lands

VERSION DATE: 11/08/06

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

INDIANRES Indian Reservations

VERSION DATE: 01/01/00

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

Appendix I: Research Summary

HIG Research Summary

Site Location:

Commercial Property
2225 East Lake Street
Minneapolis, MN

HIG Project #:

146537

Research Summary Completed:

8/1/2014

Historical Information Gatherers

Conducted For:

Wenck Associates, Inc.
1802 Wooddale Drive, Suite 100
Woodbury, MN

This Research Summary identifies the products and services ordered from Historical Information Gatherers, Inc. (HIG) for the above referenced site location.

Aerial Photographs

Aerial Photographs taken in the years listed below were provided for the site location. Title blocks on each page list the year and scale of each aerial photograph.

1934, 1937, 1940, 1947, 1953, 1957, 1966, 1969, 1972, 1979, 1984, 1991, 1997, 2000, 2003, 2008, 2013

City Directory Pages

A search was conducted for directories that include coverage of the site area. This included researching one or more of the following: HIG's City Directory Collection, the Allen County (Indiana) Public Library's city directory collection, the Library of Congress Business Reference Services Collection and other miscellaneous online sources.

The following directories for the general site area were identified. The directories were reviewed at approximate 5 year intervals, subject to availability. A comma between date ranges indicates a gap of 10 years or more in the directories available for review.

Minneapolis (1930-2012)

The streets and address ranges researched were either requested at the time of ordering or were selected by HIG. For each street researched, the date range of the publications that included listings for the site and/or surrounding properties is provided below. Each city directory page provided includes the publication name and date at the top of the page.

22nd Avenue South (1930-2012)
31st Street East (1930-2012)
Lake Street East (1930-2012)

Other historical maps provided: 1854

Current parcel map provided.

Topographic Maps

USGS Topographic Maps published in the years listed below were provided for the site location. Title blocks on each page list the map title, year and scale of the publication.

1896, 1951, 1967, 1972, 1977, 1993, 2013

GeoSearch (GS) Database Report

The Preliminary GS Database Report was delivered via email shortly after ordering to provide the approximate locations of database listings in the site area. A final Database Report was issued after verification and correction of database listing locations.

FIM+ Report and Maps

HIG researched available fire insurance maps, real estate atlases and similar maps indicating land use or ownership for the site area.

FIM+ Maps were identified for the site location. Copies of maps that are in the public domain and available to HIG were provided. Title blocks on the maps include the date and name of the publication. Please see the FIM+ Report for details about the various map collections researched and options to review additional maps online, at a local library or in special collections.

Disclaimer & Waiver of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty that the information provided is complete for its intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

Copyright 2014 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction of the Site Specific HIG Data in any media or format, in whole or in part, is prohibited without prior written permission from Historical Information Gatherers.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.
