Cost-burdened households by neighborhood

Concentration of cost-burdened households

The proportion of cost-burdened households¹ in Minneapolis is 38.2%, based on American Community Survey 2011-2015 estimates. A household is considered "cost-burdened" if housing costs exceed 30% of household income. Housing costs typically are defined as rent or mortgage payments.

- Among the 84 residential neighborhoods, the proportion of cost-burdened households ranges from 19.1% to 70.7%.
- In 16 neighborhoods (almost one of five), the majority of households are cost-burdened.

Concentration of residents of color

The proportion of residents of color in Minneapolis is 24.3%.

- Among the residential neighborhoods, the proportion of residents of color ranges from 9.8% to 91.3%.
- In 21 neighborhoods (one of four), residents of color comprise the majority, with proportions ranging from 50.3% to 91.3%.

Correlations between concentration of cost-burdened households, poverty, and residents of color

The measure of cost-burdened households by neighborhood is strongly correlated with the neighborhood percentage of residents living below 200% of poverty (94%; a correlation of 100% is perfect correlation). The correlation between the neighborhood percentages of cost-burdened households and residents of color is also quite high at 73%.

- Of the 16 neighborhoods with a majority of cost-burdened households, 10 neighborhoods have majorities of both cost-burdened households and residents of color.
- Of the 6 majority cost-burdened household neighborhoods with majority white populations, most include a high number of housing units for university students.
- Of the 11 neighborhoods with a majority of residents of color and a minority of cost-burdened households, the proportion of cost-burdened households ranges from 29.2% to 49.0%.

The table on page 2 provides data for all 84 residential neighborhoods, coded as follows:

¹ Housing expenditures that exceed 30 percent of household income have historically been viewed as an indicator of a housing affordability problem. The conventional 30 percent of household income that a household can devote to housing costs before the household is said to be "burdened" evolved from the United States National Housing Act of 1937. https://www.census.gov/housing/census/publications/who-can-afford.pdf
