How to keep COVID-19 from spreading at home

Do you live alone?

Yes → Isolate or quarantine by staying home and not allowing others in. Do not go to work, school or any other place, and do not use public transportation.

No →

Do you have a separate room to isolate in?

Yes → Stay in a separate room alone. Do not share any part of your home or any objects with anyone else.

No → If your family members or roommates were already exposed but are healthy, could they go stay with friends or family who were also exposed but healthy?

Yes → Ask them to stay there until your isolation or quarantine time ends.

No → Could you stay with a friend or family member who has a separate room and bathroom for you only?

Yes → Stay with them, being careful not to share any part of the house or objects with anyone else, until your isolation or quarantine time ends.

No → You and family members or roommates may all need to isolate and quarantine together for the full isolation and quarantine time.

Do you have a separate bathroom?

Yes → Use a separate bathroom that no one else uses.

No → If there is only one bathroom, clean every surface you touch every time.
