

Design Guidelines for Streets and Sidewalks

A C C E S S MINNEAPOLIS

Ten-Year Transportation Action Plan

February 22, 2008

Funding for this project was provided by the City of Minneapolis and its Partner Agencies:

- City of Minneapolis
 - Public Works
 - Community Planning and Economic Development
- Metropolitan Council
 - Metro Transit
- Hennepin County
- Minnesota Department of Transportation

Technical guidance for this project was provided by a Project Management Team and a Project Steering Committee, members of which are as follows:

Project Management Team members

Michael Abegg, Beth Elliott, John Griffith, Jim Grube, Rick Kjonaas, Connie Kozlak, Craig Lamothe, Steve Hay, Steve Mahowald, Michael McLaughlin, Susan Moe, Don Elwood, Katie Walker, Jon Wertjes, Charleen Zimmer

Project Steering Committee members

Michael Abegg, John Akre, Richard Anderson, Tim Brown, Douglas Davis, Caren Dewar, John DeWitt, Beth Elliott, Darrell Gerber, Bob Greenberg, Jim Grube, Adam Harrington, Margot Imdieke Cross, William Johnson, Janet Keysser, Rick Kjonaas, Steve Kotke, Connie Kozlak, Steve Hay, Michael McLaughlin, Susan Moe, Jan Morlock, Tom O'Keefe, Kerri Pearce Ruch, Maureen Scallen, Lea Schuster, Pat Scott, Tom Thorstenson, John VanHeel, Katie Walker, Doug Walter, Kent Warden, Jon Wertjes, Charleen Zimmer

Consultant Team

Iteris, Inc. | Meyer, Mohaddes Associates
Nelson\Nygaard Consulting Associates
Short Elliot Hendrickson Inc.
Richardson, Richter and Associates, Inc.

The Geographic Information System (GIS) Maps used in this report are provided “as is” and without any warranty as to their performance, merchantability, or fitness for any particular purpose. Data for these GIS Maps were provided by the City of Minneapolis, Hennepin County and the Metropolitan Council.

This publication is available in alternative formats upon request.

TABLE OF CONTENTS

TABLE OF CONTENTS	i
1 Introduction	1-1
1.1 Purpose of Document.....	1-1
1.2 Why Do We Need Design Guidelines and What Will be Different?.....	1-2
1.3 Applicability of Guidelines	1-3
1.3.1 Roadway Jurisdiction	1-3
1.3.2 Types of Projects	1-4
1.3.2.1 MSA New Construction and Reconstruction Projects.....	1-4
1.3.2.2 Non-MSA New Construction and Reconstruction Projects.....	1-4
1.3.2.3 Street Renovation Projects.....	1-4
1.3.2.4 Neighborhood Street Repaving Projects.....	1-7
1.3.2.5 Bicycle Improvement Projects.....	1-7
1.3.2.6 Pedestrian Improvement Projects	1-7
1.3.2.7 Stormwater Management and Utility Projects.....	1-7
1.3.2.8 Outside Agency Projects.....	1-7
1.3.3 Development Process.....	1-7
1.3.4 MSA Variance Requests and Tort Liability Issues.....	1-8
1.3.5 Organization of Report.....	1-9
2 Framework for Urban Street Design	2-1
2.1 Place Types	2-1
2.1.1 Activity Centers.....	2-1
2.1.2 Commercial Corridors	2-2
2.1.3 Community Corridors	2-2
2.1.4 Neighborhood Commercial Nodes.....	2-2
2.1.5 Transit Station Areas	2-5
2.1.6 Growth Center	2-5
2.1.7 Major Retail Centers	2-5
2.1.8 Industrial Employment Districts.....	2-5
2.1.9 Place Type Characteristics	2-5
2.1.9.1 Urban Form, Building Placement and Frontage Type.....	2-6
2.1.9.2 Building Height and Enclosure.....	2-6
2.1.9.3 Edge Treatments, Open Space, Trees and Streetscaping.....	2-6
2.2 Street Design Types.....	2-6
2.2.1 Commuter Street.....	2-9
2.2.2 Commerce Street.....	2-9
2.2.3 Activity Area Street.....	2-10
2.2.4 Community Connector	2-10
2.2.5 Neighborhood Connector	2-10
2.2.6 Industrial Connector	2-10
2.2.7 Parkway Street.....	2-15
2.2.8 Local Street	2-15

2.2.9	Alley.....	2-15
2.2.10	Street Design Type Characteristics.....	2-15
2.2.10.1	Equivalent Functional Class	2-15
2.2.10.2	Through Lanes	2-16
2.2.10.3	Target Speed	2-16
2.2.10.4	Transit Facilities, Bicycle Facilities, Pedestrian Facilities, Freight..	2-19
2.2.10.5	Connection to the Freeway System.....	2-20
2.2.10.6	Medians and/or Turn Lanes	2-20
2.2.10.7	Curb Parking, Curb Extensions.....	2-20
2.2.10.8	Driveway Access	2-20
3	Design Process	3-1
3.1	Set Clear Outcome and Process Goals	3-1
3.2	Develop a Citizen View of the Street	3-2
3.3	Verify Place Types and Street Design Types	3-5
3.4	Agree on Scope of Design Process.....	3-6
3.5	Determine Modal Needs and Priorities.....	3-7
3.5.1	Pedestrian and Bicycle Needs	3-7
3.5.2	Transit Needs	3-7
3.5.3	Parking and Delivery Needs	3-8
3.5.4	Need for Trees, Landscaping and Stormwater Management.....	3-8
3.5.5	Traffic Needs	3-9
3.5.5.1	Forecasting Traffic Volumes.	3-9
3.5.5.2	Travel Pattern Analysis.....	3-10
3.6	Determine Options for Intersection Treatments and Traffic Management	3-11
3.6.1	Safety.....	3-12
3.6.2	Corridor Travel Time Impacts	3-12
3.6.3	Peak Period Impacts.....	3-12
3.7	Compare Trade-Offs and Select Best Cross-Section	3-13
3.7.1	Modal Priorities	3-13
3.8	Develop Detailed Design	3-14
4	Design Controls.....	4-1
4.1	Sources for General Design Guidance	4-1
4.2	Traffic Volumes	4-2
4.3	Design Vehicle.....	4-3
4.4	Target Speed.....	4-4
5	Design Guidance.....	5-1
5.1	Design Zones	5-1
5.1.1	Traffic Zone.....	5-1
5.1.2	Parking/Bicycle/Transit Zone	5-2
5.1.3	Pedestrian Zone	5-2
5.1.3.1	Frontage Zone	5-2
5.1.3.2	Through Walk Zone.....	5-2
5.1.3.3	Planting/Furnishing Zone.....	5-3
5.1.3.4	Edge Zone	5-3
5.2	Lane Widths – Sources for Design Guidance	5-3
5.2.1	AASHTO “Green Book”	5-3

5.2.2	ITE RP-036.....	5-3
5.2.3	Minnesota State-Aid.....	5-4
5.3	Design Guidelines for Lane Widths	5-4
5.3.1	Travel Lanes	5-4
5.3.2	Turn Lane Widths.....	5-6
5.3.3	Parking Lane Widths.....	5-6
5.3.4	Bicycle Lane Widths.....	5-15
5.3.5	Curb and Gutter Widths.....	5-15
5.3.6	Planted Medians.....	5-16
5.3.7	Snow Removal Issues.....	5-16
5.4	Pedestrian Zone.....	5-16
5.4.1	Desired Pedestrian Zone Dimensions.....	5-17
5.4.2	Sidewalks in Constrained Conditions	5-17
	5.4.2.1 Edge Zone	5-17
	5.4.2.2 Planting/Furnishing Zone.....	5-17
	5.4.2.3 Through Walk Zone.....	5-21
	5.4.2.4 Frontage Zone	5-21
5.4.3	Pedestrian Zone Dimensions on Bridges.....	5-21
5.4.4	Pedestrian Zone Dimensions at Transit Stops.....	5-22
5.5	Curb Extensions	5-22
5.6	Street Furniture, Lighting, Trees and Landscaping	5-23
5.7	Utilities.....	5-24
5.8	Intersections	5-24
5.8.1	Curb Return or Corner Radii.....	5-24
5.8.2	Dedicated Left and Right Turn Lanes.....	5-26
5.8.3	Channelized Right Turn Lanes	5-26
5.8.4	Roundabouts and Traffic Calming Strategies	5-27
5.8.5	Crosswalks.....	5-27
5.8.6	Bike Lanes at Intersections.....	5-28
5.9	Transit Stops	5-29
5.9.1	Curbside Bus Stops and Curb Extensions.....	5-29
5.9.2	Near Side and Far Side Bus Stops.....	5-29
5.9.3	Design of Transit Shelter/Bus Stop Area and Bus Landing Pads.....	5-29
6	Typical Cross-Sections.....	6-1
7	Street Lighting Policy and Program.....	7-1
8	Street Furniture.....	8-1
9	Street Trees and Landscaping	9-1
10	Pedestrian Facility Design.....	10-1
11	Bicycle Facility Design	11-1
12	BIBLIOGRAPHY.....	12-1
13	BUS STOP CHECKLIST	13-1
