Subject: Fremont Ave Bridge Replacement

### **Fremont Ave Bridge Replacement**

The Pedestrian Advisory Committee offers qualified support of the proposed design for the Fremont Ave S bridge with the caveat of ADA compliant crossings at the south end of the bridge from east to west and maximum possible narrowing of the roadway. We strongly support the addition of ADA ramps to connect to the private walkway on the north side of the Greenway trench. We strongly support the continued exploration of shared street design that builds off the design at 29th Street at Aldrich Avenue.
