Subject: North Loop Paving Project

North Loop Paving Project

The Pedestrian Advisory Committee supports the North Loop Paving project with the following recommendations:

- Traffic calming features should be considered for 5th Ave N, between N Washington Ave & N 5th St, in response to the removal of brick pavers.
- In accordance with the Heritage Street Plan, using best practices from other cities, wood pavers on 8th Ave N, between N Washington Ave & N 3rd St, should be replaced with like materials.
- Wayfinding, signage, and improved lighting should be installed in coordination with MNDOT to facilitate a better walking connection at N 4th St & 5th Ave N to the pedestrian bridge leading to Downtown West.
