Terracon Project No. MP197429

Dear Mr. Anwar:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced Site. This assessment was performed in accordance with Terracon Proposal No. PMP197429 dated August 19, 2019.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,
Terracon Consultants, Inc.

Jamie L. Hoffman

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. PMP197429 dated August 19, 2019, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Jennifer A. Force, Environmental Professional. Jennifer A. Force performed the Site reconnaissance on September 19, 2019.

Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The Site consists of approximately 1.57 acres of land located at 250 4th Street South, 215 and 217 3rd Street South, and 309 2nd Avenue South in Minneapolis, Hennepin County, Minnesota (Parcel ID Nos. 2302924330051, 23029244330006, 2302924330009, and 2302924330008). The Site is developed with three, City-owned office buildings including the 5-story Public Services Building, the 2-story Community Services Building and the 3-story City of Lakes Building. The buildings were constructed in the 1950s. The City has occupied by Public Service and Community Services Buildings since the late 1950s/1960s, and the City has occupied the City of Lakes Building since 1989. The City uses the buildings for office space for the Community Planning and Economic Development, Development Review, Housing Services, Civil Rights, Human Resources, and Public Works Departments. The buildings also house the Utility Bill Payment and City Assessor's offices. Portions of the buildings are also used for storage, training and as a polling place.

Historical Information

The Site and surrounding area were originally developed prior to 1885 for residential, commercial, and industrial purposes. Historical uses and occupants of the Site include a planing mill and sash door and blind company, several residences, stores, a warehouse, a lumber yard, a hotel, auto sales, printing and engraving, a machine shop, milling machinery, an auto garage, and City of Minneapolis and State of Minnesota offices.

The north and east adjacent properties were historically used as auto filling stations. These properties are further discussed below.

Records Review

The Site is listed at various current and historical addresses in multiple databases, including Emergency Release Notification System (ERNS), Enforcement Compliance History Online (ECHO), Facility Index System (FINDS), Resource Conservation and Recovery Act (RCRA)

NonGenerator / No Longer Regulated (NLR), Financial Assurance, SPILLS, Material Licensing Tracking System (MLTS), MANIFEST, RCRA Conditionally Exempt Small Quantity Generator (CESQG), What's In My Neighborhood (WIMN), ASBESTOS, Underground Storage Tank (UST), EDR Historical Auto Station, and EDR Historical Cleaners. According to the database report, the ERNS and SPILLS listings are related to a release of freon to air from a leaky valve in 2004. Based on the fact the freon was released to air, this release does not appear to constitute a Recognized Environmental Condition (REC) for the Site.

The Site was also listed as a RCRA CESQG. CESQGs are defined as facilities that generate less than 100 kilograms of hazardous waste per calendar month and accumulate less than 1,000 kg of hazardous waste at any time. No violations were reported for the Site. Inclusion on the generator databases does not indicate that a release has occurred. Based on the nature of this listing and the absence of reported violations, the generation of hazardous waste on the Site does not appear to constitute a REC.

According to the database report, one UST is located on the Site, and one UST has been removed from the Site. A 4,000-gallon fuel oil tank was formerly located at 318 3rd Ave South on the eastern portion of the Site. According to the MPCA Tank and Leak Site Dashboard, the UST was registered in 2013; however, the removal date was not documented. An 8,000-gallon fuel oil UST is located at 309 2nd Ave South at the City of Lakes Building. According to the MPCA Tank and Leak Site Dashboard, the tank was registered in 1995, with an unknown installation date. Based on the absence of documentation of the removal of the 4,000-gallon fuel oil UST and the age of the 8,000-gallon fuel oil UST, undocumented releases to the subsurface may have occurred; therefore, the historical and current USTs constitute a REC for the Site.

Additionally, the Site was identified on the EDR Historical Auto Station and Historical Cleaners databases for several addresses for the years of 1925 to 1955. While the Site was not identified on databases that indicate a release has occurred, based on the age and length of these operations, it is possible that undocumented releases of petroleum products or petroleum/chlorinated solvents used in historical auto service or dry cleaning operations may have impacted the subsurface. The historical uses of the Site as an auto service station and potential dry cleaner constitute a REC for the Site. Additional UST records associated with a former auto station were identified in Health Department files for the Site and are discussed in Section 4.2.

The remaining database listings for the Site appear to be related to the previously discussed release, generator status, and UST presence on the Site. Review of these listings did not identify additional RECs.

In addition to the database report, several Fire and Building Department permits were identified for USTs and unspecified fuel oil tanks for oil burners located at several current and historical addresses for the Site. Records for the installation and maintenance of a gasoline filling station at 215 South 3rd Street were also obtained. These records included installation of two 550-gallon USTs dated May 1938 and removal of the USTs and piping in March 1961. Based on the age of

the UST removal, it is possible that releases of gasoline to the subsurface may have gone undocumented at the time of the decommissioning. The former onsite USTs constitute a REC for the Site.

According to Building Department records, an oil burner and associated 3,000-gallon fuel oil tank was installed inside the building at 324 3rd Avenue South in August 1956. Additional records for 300-312 3rd Avenue South indicate that a motor for "O.B."(possible oil burner) was installed in 1942. Records were also included for an oil burner with two 265-gallon fuel oil tanks at 207 3rd Street South, installed in February 1949. Records for the installation of an oil burner at 211 3rd St South in 1951 indicate the burner should be connected to the presently installed tank, of which there are no additional records. An oil burner permit was also identified for 215 3rd St South, which indicates that a 250-gallon fuel oil tank was installed in November 1936. An oil burner permit for 217 3rd St South dated November 1948 indicates connection to an existing tank, of which no further records were available. An oil burner permit for 309 2nd Ave South indicates a 20,000-gallon fuel oil tank was installed in July 1974. None of the oil burner permits indicate if the tanks were aboveground or underground. Based on the age and the unknown locations and/or status of the storage tanks, the numerous former fuel oil tanks constitute a REC for the Site.

Several adjacent properties were identified in the regulatory database search as historical cleaners, historical auto station, and/or as having a reported release. Based on topographic gradient, proximity to the Site, and/or vapor intrusion risk, adjacent properties to the north, south, and west of the Site were identified as RECs.

The remaining facilities listed in the database report do not appear to represent RECs to the Site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the Site.

Site Reconnaissance

During the Site reconnaissance, Terracon observed the following features: four traction powered elevators, a dumbwaiter, five air compressors, ventilation hoods associated with the former public health laboratory, two autoclaves, a sign for an incinerator, a possible cleanout associated with an incinerator or possible coal chute,

Adjoining Properties

The Site is bordered to the north by 3rd Street South followed by a multi-story office building located at 255 2nd Avenue South; to the east by 3rd Avenue South followed by the Federal Courthouse (300 4th Street South); to the southeast by 4th Street South followed by Century Link parking garage (416 3rd Avenue South); to the southwest by an alley followed by a multi-story building undergoing renovation for use by a hotel (317 2nd Avenue South) followed by a multi-

story office building (331 2nd Avenue South); and to the west by 2nd Avenue South followed by multi-story office building (330 2nd Avenue South).

Significant Data Gaps

Significant Data Gaps were not identified.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-13 at 250 4th Street South 309 2nd Avenue South, Minneapolis, Hennepin County, Minnesota (the Site). The following RECs were identified in connection with the Site:

- **Current onsite UST:** An active, 8,000-gallon fuel oil UST is registered to the City of Lakes Building at 309 2nd Avenue South. The UST was registered in 1995 with an unknown installation date. Based on the age of the 8,000-gallon fuel oil UST, undocumented releases to the subsurface may have occurred.
- **Historical Site uses and petroleum use:** Historical Site uses have included an auto sales and testing facility, a machine shop, printers and engravers, a sign painter, an auto garage with plating, painting and polishing operations, dry cleaners and a gasoline filling station with USTs. Historic records also indicate a 4,000-gallon fuel oil UST was present on the eastern portion of the Site; it is unknown if the UST has been removed. In addition, at least eight fuel oil tanks were formerly located on the Site associated with oil burners at various Site addresses. Therefore, it is possible that undocumented releases of hazardous substance and/or petroleum products from historical Site operations may have impacted the soil, soil vapor and/or groundwater at the Site.
- **Potential buried debris**. Buildings were present where the current-day surface parking is located. The buildings were razed in the 1950s/early 1960s when the parking lot was established during a time when City ordnance allowed for use of demolition debris to be used to backfill basement areas. The debris, if present, has the potential to contain hazardous substances and/or petroleum products and is considered a REC.
- **Historical offsite auto fueling stations, dry cleaners and release:** Dry cleaners and auto repair/filling stations have historically been located on adjacent properties to the north, west and south of the Site. In addition, documented petroleum releases have occurred on adjacent properties. While the petroleum releases have received regulatory closure, closure was issued when soil vapor impacts were not evaluated. The potential for undocumented releases and documented releases to impact the Site is a REC.

Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon recommends conducting additional investigation to evaluate subsurface conditions associated with the identified RECs.

1.0 INTRODUCTION

1.1 Site Description

Site Name	City Office Buildings
Site Location/Address	250 4th Street South, 215 and 217 3rd Street South and 309 2nd Avenue South, Minneapolis, Hennepin County, Minnesota
Land Area	Approximately 1.57 acres
Site Improvements	The Site is developed with a five-story office building referred to as the Public Service Center (250 4th Street South), a two-story Community Services Building (217 3rd Street South, a three-story City of Lakes Building (309 2nd Avenue South), and surface parking lots (215 3rd Street South and 309 2nd Avenue South)
Future Use	Possible redevelopment
Purpose of the ESA	Sale of the Site

The location of the Site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The Site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal No. PMP197429 dated August 19, 2019, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the Site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the Site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to “the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.” By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the Site.

As requested by the client, the following additional services were performed:

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this Site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the Site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the Site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- The earliest historical record for the Site was an 1885 Sanborn Fire Insurance Map that depicted the Site as developed. Based on the complex history of the

Site and multiple redevelopments, the absence of information prior to the first development of the Site is not considered a significant data gap.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the Site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after Site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of City of Minneapolis. Use or reliance by any other party is prohibited without the written authorization of City of Minneapolis and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Master Services Agreement. The limitation of liability defined in the Master Services Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

1.6 Client Provided Information

Prior to the Site visit, Rebecca Law, client's representative, was asked to provide the following user questionnaire information as described in ASTM E1527-13 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client's Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the Site.		X	
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the Site.		X	
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the Site.			X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the Site.		X	
Obvious Indicators of Contamination at the Site.		X	

According to Ms. Law, a storage tank may still be present in the basement or underground at the City of Lakes Building on the Site. The storage tank is further discussed in Section 5.4 and includes a fuel oil above ground storage (AST) in the basement of the City of Lake Building. She also stated that a land use restriction titled "Amended and Restated Skyway Agreement" was identified in her search of Hennepin County Property Records; however, she was unable to locate the original Agreement, dated March 12, 1981. RECs were not identified in the client-provided information. A copy of the questionnaire is provided in Appendix C.

2.0 PHYSICAL SETTING

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 838 feet above sea level	USGS Topographic Map, Minneapolis South, MN Quadrangle, 1993 (Appendix A)
Topographic Gradient	Relatively flat area with general gradient towards the northeast	
Closest Surface Water	Mississippi River, approximately 1,500 feet northeast of the Site.	
Soil Characteristics		
Soil Type	Urban land-Udipsamments complex	Hennepin County, MN USDA-NRCS Web Soil Survey issued September 5, 2019
Description	Somewhat excessively drained cut and fill land with 0 to 2 percent slopes	

Physical Setting Information		Source
Geology/Hydrogeology		
Formation	Platteville and Glenville Formations	Steenberg, Julia R.; Bauer, Emily J; Chandler, V.W.; Retzler, Andrew J; Berthold, Angela J; Lively, Richard S. (2018). C-45, Geologic Atlas of Hennepin County, Minnesota. Minnesota Geological Survey. Retrieved from the University of Minnesota Digital Conservancy, http://hdl.handle.net/11299/200919.
Description	25 to 30 feet thick tan to gray limestone and dolostone overlying 3 to 7 feet of calcareous sandy shale	
Estimated Depth to First Occurrence of Groundwater	Approximately 30 to 40 feet below ground surface	Balaban, N.H.. (1989). C-04 Geologic atlas of Hennepin County, Minnesota. Minnesota Geological Survey. Retrieved from the University of Minnesota Digital Conservancy, http://hdl.handle.net/11299/58491.
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (primarily to the northeast).	

* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the Site cannot be directly ascertained.

3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the Site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10- to 15-year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the Site. Reviewed historical topographic maps, aerial photographs and Sanborn maps are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the Site and surrounding properties. EDR provided Sanborn maps as summarized below.

- Topographic map:
  - Minneapolis, Minnesota: **1896, 1901, 1958** (1:62,500)
  - Minneapolis South, Minnesota: **1952, 1967, 1972, 1977, 1993, 2013** (1;24,000)
- Aerial photograph:
  - USDA: **1937, 1940, 1957, 1969** (1"=500')
  - USGS: **1947, 1953, 1966, 1972** (1"=500')
  - MC: **1978, 1984, 1987** (1"=500')
  - USGS/DOQQ: **1991** (1"=500')
  - State\MN_1997: **1997** (1"=500')
  - USDA/NAIP: **2005, 2010, 2013, 2017** (1"=500')
- Sanborn Fire Insurance Maps: **1885, 1890, 1904, 1912, 1949, 1950, 1952, 1966,** and **1969**

Historical Maps and Aerial Photographs

Direction	Description
Site	The Site is developed with several buildings. Occupants include a planing mill and sash door and blind company, several residences, stores, a warehouse, and a lumber yard and warehouse (1885-1890). The eastern portion of the Site has been redeveloped with several stores, and the other onsite buildings are occupied by a hotel, *auto sales and testing, printing and engraving, a machine shop, a sign painters* and milling machinery (1912). Building configuration is the same as previous photographs; however, use is not apparent (1937-1947). The Site is still occupied by several *printing shops* and a hotel; however, the north-central buildings are occupied by an *auto garage with plating and painting operations located on the 2nd and 3rd floors* and the Public Works Meter Department and the southeastern building is occupied by the Public Health Department (1949-1957). The north-central building is no longer present. The Site buildings are occupied by the Public Health Center and the Minnesota Department of Employment Security (1966-1969). Building use is no longer apparent, and the Site resembles present-day configuration (1966-2017).
North	The north adjacent property is developed with several buildings. Occupants during this time include city offices, a bank, a printing shop, several residences, and a livery (1885-1890). The southeastern portion of the property is now occupied by a manufacturer's supply warehouse that includes a *machine shop and a foundry* (1912). The north adjacent property is developed with a hotel and surface parking. Four 500-gallon *underground gasoline storage tanks* are depicted in the south-central portion of the property (1937-1957). The north adjacent property appears to be used as surface parking (1966-1978). The north adjacent property appears to be developed with a single large structure that resembles present-day configuration (1984-2017).

Direction	Description
East	The east adjacent property is developed with several buildings. Occupants during this time include a carpentry shop, a boarding house, a *machine shop*, a pipe cutting company, several stores, and a planing and molding facility (1885-1890). Building configuration is different from previous maps, and occupants include a *machine shop*, a cabinet shop, several residences, a blacksmith pattern shop, and bicycle repair (1912). A *filling station* is present on the southwestern corner of the property (1937-1940). The filling station is still present along with an *auto greasing* facility; however, the remaining buildings are no longer present and two restaurants are located along the western portion of the property (1947-1952). The east adjacent property appears to be entirely occupied by parking structures (1957-1991). The parking structures are no longer present and have been replaced by a large commercial structure, resembling present-day configuration (1997-2017).
South	The south adjacent properties are developed with several buildings. Occupants during this time include a carpentry shop and several residences (1885-1890). Several additional buildings are present, and occupants include stores, residences, and offices for the Minneapolis St. Paul-Sault Ste. Marie Railroad (1912). The south adjacent properties are occupied by several stores, a Western Union office building, and a restaurant (1937-1957). The stores located on the southwestern portion of the property are no longer present and the property across S 4th Street is occupied by a parking garage (1966-1978). A new structure is present on the southwestern portion of the property, resembling present-day configuration (1984-2017).
West	The west adjacent property is developed with a store and several residences (1885). The west adjacent property is developed entirely with a structure called first the Northwestern Guaranty Loan Co Building, and later the Metropolitan Life Building (1890-1957). The structure is no longer present and the west adjacent property is occupied by a surface parking lot (1966-1978). The west adjacent property is occupied by a large structure, resembling present-day configuration (1984-2017).

The Site was historically occupied by businesses that likely used, stored and disposed of hazardous substance and/or petroleum products in their operations including an auto garage, printing and engraving shops, a machine shop, and a sign painter. The historical use of the Site is further discussed in Section 3.2. and constitute a REC for the Site

The north adjacent property was historically occupied by fueling operations with underground storage tanks (USTs). Although the north adjacent property was not identified in regulatory databases that would indicate a release had occurred, based on the age and length of operations, it is possible that an undocumented release may have occurred. Based on the proximity of the former fueling operations to the Site, the north adjacent property constitutes a REC for the Site. The north adjacent property is further discussed in Section 4.1.

The east adjacent property was historically occupied by a filling station and auto greasing facility and is further discussed in Section 4.1.

3.2 Historical City Directories

The Minneapolis Directory Company, Polk, Cole Information Services, and EDR Digital Archive city directories used in this study were made available through EDR (selected years reviewed: 1920-2014) and were reviewed at approximate five-year intervals, if readily available. Street listings were not available prior to 1920. The current street addresses for the Site were identified as 250 4th Street South, 217 3rd Street South, 309 2nd Avenue South, and 215 3rd Street South. Historical addresses included 201-299 3rd St S (odds), 300-398 3rd Ave S (evens), 238-250 4th St S (evens), and 301-313 2nd Ave S (odds).

Terracon's review of the city directories identified a former apparent auto service garage on the Site at 215 3rd St S from 1940 through 1955. A plating and polishing facility was also located on the Site at this address from 1930 to 1935. Based on the age and length of the auto service and plating/polishing operations, it is possible that undocumented releases to the subsurface may have occurred. The historical uses of the Site as an auto service garage and for plating and polishing operations constitute a REC for the Site.

Other historical occupants of the Site include private residences, a telegraph company, and offices for the City Department of Public Works and Health Department, which do not appear to constitute RECs for the Site.

3.3 Site Ownership

Based on a review of information obtained from the Hennepin County assessor's records, the current Site owner is the City of Minneapolis. Previous owners were not identified.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the Site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the Site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.6 Interviews Regarding Current and Historical Site Uses

The following individuals were interviewed regarding the current and historical use of the Site.

Interviews

Interviewer	Name / Phone #	Title	Date/Time
Jennifer Force	Chris Carlson / (612) 673-3021	Building Services Supervisor	September 19, 2019 / 1:30 pm

Terracon interviewed Mr. Carlson at the time of the Site reconnaissance. Mr. Carlson accompanied Terracon during the Site visit and provided access to the interior spaces of the Site buildings and described the day-to-day operations. Mr. Carlson indicated that he has been familiar with the site for about 10 years. Mr. Carlson indicated the City uses the buildings for offices and storage space. The City of Lakes Building was initially constructed in 1959 and was used by the State of Minnesota Unemployment Offices until 1989, when the City began to use the building. The Public Services Center was constructed in 1957 for the City and was formerly occupied by the City's Health Department and included doctor's and dentist's offices and a laboratory. The laboratory shut-down in 2010 and the laboratory space on the 5th floor of the building is used as storage space. The City began to occupy the Community Services Building in the 1960s and the City formerly used the building as a public safety building. Mr. Carlson was not aware of any past or current environmental issues associated with the historical operations. Additional responses from Mr. Carlson are discussed in Section 5.4.

3.7 Prior Report Review

Terracon requested the client provide any previous environmental or geotechnical reports they are aware of for the Site. Previous reports were not provided by the client to Terracon for review.

4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the Site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the Site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the Site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate Site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

Federal Databases

Database	Description	Distance (miles)	Listings
CERCLIS	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	1
CERCLIS / NFRAP	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	1
ERNS	Emergency Response Notification System	Site	1
IC / EC	Institutional Control/Engineering Control	Site	0
NPL	National Priorities List	1	0
NPL (Delisted)	National Priorities Delisted List	0.5	0
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1	2
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	3
RCRA Non-CORRACTS/ TSD	RCRA Non-Corrective Action Activity	0.5	0

State/Tribal Databases

Database	Description	Distance (miles)	Listings
AST	Above Ground Storage Tanks	0.1	12
Brownfields	Brownfields Program Sites	0.5	93
HWS	State Hazardous Waste Site	0.5	4
IC	Institutional Controls Sites	Site	0
LUST	Leaking Underground Storage Tanks	0.5	74
PLP	Permanent List of Priorities	1	2
SWF/LF	Solid Waste Facilities/Landfills	0.5	4
UST	Underground Storage Tanks	Site and adjoining properties	3
VIC	Voluntary Investigation and Cleanup Program	0.5	82

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

The following table summarizes the Site-specific information provided by the database and/or gathered by this office for identified facilities within the above-specified radii within 500 feet of the Site. Facilities are listed in order of proximity to the Site. Additional discussion for selected facilities follows the summary table.

Listed Facilities

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Children's Dental Services / City of Minneapolis Public Service Center / Minnesota Health Department 250 South 4th St	Site	ERNS, ECHO, FINDS, RCRA NonGen / NLR, Financial Assurance, SPILLS, MLTS, MANIFEST, RCRA-CESQG, WIMN	No, see discussion below.
City of Lakes Building 309 2nd Ave S	Site	ASBESTOS	No, see discussion below.
Enterprise Laundry 247 S 3rd Ave	Site	EDR Hist Cleaner	REC, see discussion below.
Minneapolis City of / Dept of Public Works 309 2nd Ave S	Site	Financial Assurance, MANIFEST, RCRA-CESQG, SPILLS, UST, WIMN, ECHO, FINDS	REC, see discussion below
Minneapolis Standard Garage 215 S 3rd St	Site	EDR Hist Auto	REC, see discussion below.
Pressing Club Inc 244 S 4th	Site	EDR Hist Cleaner	REC, see discussion below.
Wallen Roy R 249 S 3rd Ave	Site	EDR Hist Auto	REC, see discussion below.
Jim Misencik (Parking Lot) 318 3rd Ave S	Site	Financial Assurance, UST, WIMN	REC, see discussion below.
City Valet Service 312 2nd Ave S	West adjacent property / cross-gradient	EDR Hist Cleaner	REC, see discussion below.

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Minneapolis City of Jobs & Training Bldg 312 2nd Ave S	West adjacent property / cross-gradient	RCRA NonGen / NLR	No, see discussion below.
Hays Arth D 214 S 3rd St	North adjacent property / down-gradient	EDR Hist Auto	REC, see discussion below.
317 Building 317 2nd Ave S	South adjoining property / up-gradient	LUST, RCRA-SQG, UST	REC, see discussion below.
Tip Top Renovators 206 S 4th	South adjoining property / up-gradient	EDR Hist Cleaner	REC, see discussion below.
Minnesota Community Development Agency / World Com / MCI Dba Verizon Business 331 2nd Ave S	South adjoining property / up-gradient	AST, UST	No, see discussion below.
US West Parking Ramp 225 S 4th St	South adjacent property / up-gradient	LUST, SRS	REC, see discussion below.
Miller Davis Co 219 S 4th St	South adjacent property / up-gradient	BROWNFIELDS, RCRA NonGen / NLR, SRS, VIC	No, see discussion below.
Government Center 300 S 4th St Ste 1012	East adjacent property / cross-gradient	LAST, LUST, SRS	REC, see discussion below.
Towle Building 330 2nd Ave S	Approximately 110 feet WNW / cross-gradient	LAST, LUST, SRS	No, based on distance and cross-gradient location relative to the Site.
312 Partnership Llc Property 312 S 3rd St	Approximately 230 feet ENE / down- to cross-gradient	LUST, SRS	No, based on distance and cross-gradient location relative to the Site.
Qwest Communications - Minneapolis Main 200 S 5th St	Approximately 275 feet SW / up-gradient	LAST, LUST, SRS	No, based on distance.
318 3rd Street South Property 318 3rd St S	Approximately 280 feet E / cross-gradient	BROWNFIELDS, Financial Assurance, SRS, SRS, VIC, WIMN	No, based on distance and cross-gradient location relative to the Site.
Old Republic Title Building 400 2nd Ave S	Approximately 280 feet W / cross- to up-gradient	LUST, SRS	No, based on distance.
Milwaukee Road Depot - Block D Washington and 2nd St	Approximately 300 feet NE / down-gradient	SRS, VIC	No, based on distance and cross-gradient location relative to the Site.

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
The Flour Exchange 310 4th Ave S	Approximately 300 feet ESE / cross-gradient	BROWNFIELDS, MN LS, SRS, VIC	No, based on distance and cross-gradient location relative to the Site.
Mikulay Company Inc. 301 Washington Ave S	Approximately 300 feet NE / down-gradient	BROWNFIELDS, LUST, SRS, VIC	No, based on distance and down-gradient location relative to the Site.
Baker Investments 1 Llp Property/Family Justice Center 409 Marquette Ave	Approximately 360 feet W / cross-gradient	LUST, SRS	No, based on distance and cross-gradient location relative to the Site.

The Site is listed at various current and historical addresses in multiple databases, including Emergency Release Notification System (ERNS), Enforcement Compliance History Online (ECHO), Facility Index System (FINDS), Resource Conservation and Recovery Act (RCRA) NonGenerator / No Longer Regulated (NLR), Financial Assurance, SPILLS, Material Licensing Tracking System (MLTS), MANIFEST, RCRA Conditionally Exempt Small Quantity Generator (CESQG), What's In My Neighborhood (WIMN), ASBESTOS, Underground Storage Tank (UST), EDR Historical Auto Station, and EDR Historical Cleaners. According to the database report, the ERNS and SPILLS listings are related to a release of freon to air from a leaky valve in 2004. Based on the fact the freon was released to air, this release does not appear to constitute a REC for the Site.

The Site was also listed as a RCRA CESQG. CESQGs are defined as facilities that generate less than 100 kilograms of hazardous waste per calendar month and accumulate less than 1,000 kg of hazardous waste at any time. No violations were reported for the Site. Inclusion on the generator databases does not indicate that a release has occurred. Based on the nature of this listing and the absence of reported violations, the generation of hazardous waste on the Site does not appear to constitute a REC.

According to the database report, one, active UST is located on the Site, and one UST has been removed from the Site. An active, 8,000-gallon fuel oil UST is registered to the City of Lakes Building at 309 2nd Ave S. According to the MPCA Tank and Leak Site Dashboard, the tank was registered in 1995, with an unknown installation date. A 4,000-gallon fuel oil tank was formerly located at 318 3rd Ave South on the east side of the Site. According to the MPCA Tank and Leak Site Dashboard, the UST was registered in 2013; however, the removal date was not documented. Based on the absence of documentation of the removal of the 4,000-gallon fuel oil UST and the age of the 8,000-gallon fuel oil UST, undocumented releases to the subsurface may have occurred; therefore, the historical and current USTs constitute a REC for the Site.

Additionally, the Site was identified on the EDR Historical Auto Station and Historical Cleaners databases for several addresses for the years of 1925 to 1955. While the Site was not identified on databases that indicate a release has occurred, based on the age and length of these operations, it is possible that undocumented releases of petroleum products or petroleum/chlorinated solvents used in historical auto service or dry cleaning operations may have impacted the subsurface. The historical uses of the Site as an auto service station and potential dry cleaner constitute a REC for the Site. Additional UST records associated with a former auto station were identified in Health Department files for the Site and are discussed in Section 4.2.

The remaining database listings for the Site appear to be related to the previously discussed release, generator status, and UST presence on the Site. Review of these listings did not identify additional RECs.

City Valet Service/ Minneapolis City of Jobs & Training Bldg

The City Valet Service facility, located adjacent to the west of the Site across 2nd Ave S at 312 2nd Ave S, is listed on the EDR Historical Cleaners proprietary database. According to a review of city directories, the City Valet Service facility was identified as a clothing cleaner in operation from at least 1935 through 1960. Although the facility is not listed on databases that indicate a release has occurred, there is potential for undocumented releases of petroleum or chlorinated solvents used in former dry cleaning operations to the subsurface. While the former dry cleaner is located in a cross-gradient location relative to the Site, it is within 100 feet of the Site and undocumented releases to the subsurface could represent a vapor intrusion concern. Therefore, the historical dry cleaning operations on the west adjacent property constitute a REC for the Site.

The City of Minneapolis Jobs and Training facility, located adjacent to the west of the Site across 2nd Ave S at 312 2nd Ave S, is listed on the RCRA NonGen/NLR database. According to the database report, no violations were reported. Based on the nature of this listing and the absence of reported violations, the generation of hazardous waste on the property does not appear to constitute a REC. No additional RECs were identified in connection with the City of Minneapolis Jobs and Training facility.

Hays Arth D

The Hays Arth D facility, located adjacent to the north of the Site across S 3rd St at 214 S 3rd St, is listed on the EDR Historical Auto Stations proprietary database. According to Sanborn maps and the database report, the north adjacent property appeared to be a fueling station with USTs from at least 1930 through 1952. Although the facility is not listed on databases that indicate a release has occurred, there is potential for undocumented releases of petroleum used in former fueling operations to the subsurface. While the former fueling station is located in a down-gradient location relative to the Site, it is within 100 feet of the Site and undocumented releases to the subsurface could represent a vapor intrusion concern. Therefore, the historical fueling operations on the north adjacent property constitute a REC for the Site.

317 Building

The 317 Building, adjoining the Site to the south at 317 S 2nd Ave, is listed on several databases, including Leaking UST (LUST), RCRA Small Quantity Generator (SQG), and UST. According to the MPCA Tank and Leak Site Dashboard, two closed LUST files exist and one removed 550-gallon diesel UST was formerly located at the south adjoining property. Leak Site ID LS0009733 consisted of Nos. 1 & 2 fuel oil and was discovered in October 1996. Leak Site ID LS0009170 consisted of diesel fuel and was discovered in April 1996. Remedial activities consisted of thermally treating approximately 8 cubic yards of soil. Both LUST files received closure in November 1996. Documentation of confirmation sampling was not available. Additional files were requested from the MPCA; however, at the issuance of this report, the MPCA had not responded. At the time of the regulatory closure, vapor intrusion risks were not often considered in evaluation of LUST facilities. Based on the absence of documentation regarding the remediation/excavation activities, the age of the regulatory closure, the proximity of the facility to the Site, and its up-gradient location relative to the Site, the releases on the south adjoining property constitute a REC for the Site.

Tip Top Renovators

The Tip Top Renovators facility, adjoining the Site to the south at 206 S 4th St, is listed is listed on the EDR Historical Cleaners proprietary database. According to a review of city directories and the database report, the Tip Top Renovators facility was identified as a clothing cleaner in operation from at least 1930 through 1946. Although the facility is not listed on databases that indicate a release has occurred, there is potential for undocumented releases of petroleum or chlorinated solvents used in former dry cleaning operations to the subsurface. Based on the proximity of the facility and its up-gradient location relative to the Site, the historical dry cleaning operations on the south adjoining property constitute a REC for the Site.

Minnesota Community Development Agency / World Com / MCI Dba Verizon Business

The south adjoining facility located at 331 2nd Ave S is identified under several entity names on several databases, including AST and UST. According to the MPCA Tank and Leak Site Dashboard, a 1,000-gallon diesel UST and a 1,500-gallon diesel AST are located on the property. The UST was reportedly installed in 1998. The facility was not identified in databases that indicate a release has occurred. Based on the installation date of the UST and the absence of a reported release, the diesel storage on the south adjoining property does not appear to constitute a REC for the Site.

US West Parking Ramp

The US West Parking Ramp, located adjacent to the south of the Site across S 4th St at 225 S 4th St, is listed in several databases, including LUST and Site Remediation Section (SRS). According to the MPCA Tank and Leak Site Dashboard, a release of Nos. 1&2 fuel oil was reported in December 1994 and regulatory closure was granted in May 1995. At the time of the regulatory closure, vapor intrusion risks were not often considered in evaluation of LUST facilities. Based on the absence of documentation regarding the remediation/excavation activities, the age of the regulatory closure, the proximity of the facility to the Site, and its up-gradient location relative to the Site, the releases on the south adjoining property constitute a REC for the Site.

Miller Davis Co

The Miller Davis Co facility, located adjacent to the south of the Site across S 4th St at 219 S 4th St, is listed in several databases, including BROWNFIELDS, RCRA NonGen / NLR, SRS, and Voluntary Investigation and Cleanup (VIC). According to the WIMN database, the facility was granted regulatory closure in March 2018 after a Remedial Action Plan (RAP) Implementation report was received and reviewed by the MPCA. Additional information on the release was not available. Based on its recent regulatory closure, the release does not appear to constitute a REC for the Site.

Government Center

The Government Center facility, located adjacent to the east of the Site across 3rd Avenue S at 300 S 4th St, is listed on several databases, including LUST, UST, and SRS. According to the database report and the WIMN website, the facility received regulatory closure for a LUST in 1999. According to Sanborn maps, the closest USTs on the property were approximately 100 feet from the Site. At the time of the regulatory closure, vapor intrusion risks were not often considered in evaluation of LUST facilities. Based on the absence of documentation regarding the remediation/excavation activities, the age of the regulatory closure, and the proximity of the facility to the Site, the releases on the south adjoining property constitute a REC for the Site..

The remaining facilities listed in the database report do not appear to represent RECs to the Site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the Site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the Site. The report listed 5 facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the Site or adjacent properties. These facilities are listed in the database report in Appendix D.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Minneapolis Health Department / HIG	Terracon subcontracted Historical Information Gatherers (HIG) to request files regarding the Site from the Minneapolis Health Department. The Health Department provided records that indicate that two 550-gallon gasoline USTs were removed from the Site in 1961 at the 215 S 3rd St address. The USTs are further discussed below.

Agency Contacted/ Contact Method	Response
Minneapolis Fire Department / HIG	Terracon subcontracted HIG to request files regarding the Site from the Minneapolis Fire Department. Records for the installation and maintenance of a gasoline filling station at 215 S 3rd St were provided. These records included installation of two 550-gallon USTs dated May 1938 and removal of the USTs and piping in March 1961. Based on the age of the UST removal, it is possible that releases of gasoline to the subsurface may have gone undocumented at the time of the decommissioning. The former onsite USTs constitute a REC for the Site.
Minneapolis Building Department / HIG	Terracon subcontracted HIG to request files regarding the Site from the Minneapolis Building Department. According to Building Department records, an oil burner and associated 3,000-gallon fuel oil tank was installed inside the building at 324 3rd Avenue South in August 1956. Additional records for 300-312 3rd Avenue South indicate that a motor for "O.B." (possible oil burner) was installed in 1942 and that these buildings were demolished in 1955. Records were also included for an oil burner with two 265-gallon fuel oil tanks at 207 3rd Street South, installed in February 1949. Records for the installation of an oil burner at 211 3rd St South in 1951 indicate the burner should be connected to the presently installed tank, of which there are no additional records. An oil burner permit was also identified for 215 3rd St South, which indicates that a 250-gallon fuel oil tank was installed in November 1936. An oil burner permit for 217 3rd St South dated November 1948 indicates connection to an existing tank, of which no further records were available. An oil burner permit for 309 2nd Ave South indicates a 20,000-gallon fuel oil tank was installed in July 1974. None of the oil burner permits indicate if the tanks were aboveground or underground. Based on the age and the unknown locations and/or status of the storage tanks, the numerous former fuel oil tanks constitute a REC for the Site.
Minnesota Department of Health Well Index / online database https://mnwellindex.web.health.state.mn.us/	A storm shaft was identified near the southwestern corner of the Site along South 2nd Avenue. The storm shaft is not used for domestic drinking water.

5.0 SITE RECONNAISSANCE

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

Site Reconnaissance	
Field Personnel	Jennifer A. Force
Reconnaissance Date	September 19, 2019
Weather Conditions	Sunny, 75 degrees Fahrenheit
Site Contact/Title	Chris Carlson / Building Services Supervisor

Building Description				
Building Identification	**Building Use**	**Approx. Construction Date**	**Number of Stories**	**Approx. Size (ft²)**
Public Service Center	City offices	1957	5 with basement	121,200
City of Lakes Building	City offices	1959	3 with basement	56,800
Community Services Building	City offices, polling place and training rooms	1950s	2 with basement	18,000
Site Utilities				
Drinking Water	City of Minneapolis			
Wastewater	City of Minneapolis			
Electric	Xcel Energy			
Natural Gas	Centerpoint Energy			

5.2 Overview of Current Site Occupants

The Site is currently occupied by three, city-owned office buildings and an associated surface parking lot. The Public Services Building is occupied by the City's Community Planning and Economic Development and Development Review Department, Housing Services, Human

Resources and Utility Bill Payment offices. Portions of the Public Services Building are also used for storage. The City of Lakes Building is currently occupied by the City's Public Works and Civil Service and Human Resources Departments and the City Assessor's offices. The Community Services Building is currently vacant, but is used for training and as a polling place.

5.3 Overview of Current Site Operations

The Site is used for City offices and storage.

5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	X
	Air compressors	X
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	X
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	X
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas or mineral production	
	Other processes or equipment	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	X
	Drums, barrels and/or containers ≥ 5 gallons	X
	MSDS or SDS	

Category	Item or Feature	Observed or Identified
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins and/or dry wells	X
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	
	Interior floor drains	X
Electrical Transformers/ PCBs	Transformers and/or capacitors	
	Other equipment	
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Leachate and/or waste seeps	
	Trash, debris and/or other waste materials	X
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
	Surface water discoloration, odor, sheen, and/or free floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	

Site Operations, Processes, and Equipment

Elevators

Two electric traction elevators are located in the Public Services Building and two electric traction elevators are located in the City of Lakes Building. The elevators in the Public Services Building were modified in 1999, and the elevators in the City of Lakes Building were modified in 2017. A hoist driven dumbwaiter is also located in the Community Service Building. Based on Site observations, releases were not observed associated with these elevators.

Air compressors

Five air compressors were observed during the Site walk. One air compressor was located on a concrete slab in the basement of the Public Service Center. De minimus oil staining was observed on the concrete below the compressor. A second air compressor was located on a concrete slab in the basement of the City of Lakes Building. Three air compressors were located in the basement in an office area of the Community Services Building. Only de mimimis staining was observed below the air compressor in the Public Service Center. Based on the competent flooring below the air compressor, the staining is not considered a REC.

Ventilation hoods and/or Incinerators

Two laboratory hoods were observed on the 5th floor of the Public Service Building. The hoods were used when Minneapolis Public Health occupied the space until 2010. The hoods were disconnected when the building was reroofed in 2015. Two autoclaves are also located with the former laboratory space. During the Site walk through, a sign for an incinerator was located on the door to the mechanical room in the Public Service Building; however, an incinerator, associated cleanout or chimney were not observed in the mechanical room.

During the Site walk through, an apparent cleanout for an incinerator or chimney or coal chute was observed in the basement of the City of Lakes Building. The cover was not able to be removed; however, it appears the cleanout/chute is connected to the exterior of the building, as rainwater had pooled on the concrete floor below the covering. The exterior wall where the apparent cleanout/chute could not be observed because it was fenced off as part of the adjacent construction Site. Mr. Carlson was not aware of the structure's purpose.

Heating and/or cooling systems

The Public Services Building and Community Services Building are heated by steam provided by NRG District Energy. The City of Lakes Building is heated by a boiler system that is powered by natural gas, but uses fuel oil as a back-up or secondary source. An associated fuel oil AST is located in the basement of the building and is discussed below. All three buildings are cooled by chiller systems.

Aboveground Chemical or Waste Storage

Aboveground storage tanks

One, approximately 300-gallon, steel, fuel oil AST was observed in the basement of the City of Lakes Building. Staining or indications of a release were not observed, and the AST is not considered a REC.

Drums, barrels, and/or containers ≥ 5 gallons

Several containers measuring greater than 5 gallons of hazardous substances and/or petroleum products were observed on the Site including:

- Approximately 7, 20-gallon steel drums of refrigerant were observed in the basement of the City of Lakes Building.

- Approximately four, 5 to 10-gallon plastic containers of water treatment chemicals for the chiller system were observed in the basement of the Public Service Center.
- Approximately 10 to 12, plastic 55-gallon drums of water treatment chemicals for the chiller or boiler systems were observed in the basements of the City of Lakes Building and the Public Services Building.
- One, 55-gallon steel drum of ethylene glycol was observed in the basement of the City of Lakes Building.
- Approximately six, 5-gallon buckets of paint were observed on the 5th floor of the Public Services Building.

Staining or indications of a release were not observed near the containers and the containers are not considered a REC.

Underground Chemical or Waste Storage, Drainage or Collection Systems

Sumps, cisterns, French drains, catch basins and/or dry wells

A sump was observed in the basement of the City of Lakes Building and appears to be connected to the sanitary sewer and is likely connected to interior floor drains in the basement. Mr. Carlson was unaware of the purpose of the sump.

Interior Floor Drains

Interior floor drains, which are connected to the sanitary sewer, were located in all three of the Site buildings. Staining or indications of a release were not observed near the floor drains.

Releases or Potential Releases

Trash, debris and/or other waste materials

Trash bins serviced by the City of Minneapolis for solid waste and recycling were observed along in the surface parking lot between the buildings. Staining or evidence of releases was not observed near the dumpsters.

6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from Site boundaries) are summarized below.

Adjoining Properties

Direction	Description
North	3rd Street South followed by a multi-story office building located at 255 2nd Avenue South
East	3rd Avenue South followed by the Federal Courthouse (300 4th Street South)

Direction	Description
South	4th Street South followed by a Century Link parking garage (416 3rd Avenue South) on the southeast and an alley followed by a multi-story building undergoing renovation for use by a hotel (317 2nd Avenue South) followed by a multi-story office building (331 2nd Avenue South) on the southwest
West	2nd Avenue South followed by a multi-story office building (330 2nd Avenue South)

RECs were not observed with the adjoining properties.

7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, additional services (e.g. asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

DECLARATION

I, Jennifer A. Force, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jennifer A. Force
Senior Project Geologist

APPENDIX C
HISTORICAL DOCUMENTATION AND USER QUESTIONNAIRE

Client/User Required Questionnaire

Terracon

Person Completing Questionnaire	Name: REBECCA LAW Phone: 612-673-5064 Company: City of Minneapolis Email: REBECCA.LAW@MINNEAPOLISMN.GOV
Site Name	Office Buildings
Site Address	309 2nd Avenue South, 215 and 217 3rd Street South and 250 4th Street South, Minneapolis, MN
Point of Contact for Access	Name: CHRIS CARLSON Phone: 612-673-3021 Company: City of MPLS Email: CHRIS.CARLSON@MINNEAPOLISMN.GOV
Access Restrictions or Special Site Requirements?	___No X Yes (If yes, please explain) PLEASE ARRANGE VISIT WITH CHRIS
Confidentiality Requirements?	X No ___Yes (If yes, please explain)
Current Site Owner	Name: Company: City of MPLS Phone: Email:
Current Site Operator	Name: Company: City of MPLS Phone: Email:
Reasons for ESA (e.g., financing, acquisition, lease, etc.)	Potential Sale of Real Estate
Anticipated Future Site Use	Redevelopment / Potential Demolition
Relevant Documents?	Please provide Terracon copies of prior Phase I or II ESAs, Asbestos Surveys, Environmental Permits or Audit documents, Underground Storage Tank documents, Geotechnical Investigations, Site Surveys, Diagrams or Maps, or other relevant reports or documents.

ASTM User Questionnaire

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must respond to the following questions. Failure to provide this information to the environmental professional may result in significant data gaps, which may limit our ability to identify recognized environmental conditions resulting in a determination that "all appropriate inquiry" is not complete. This form represents a type of interview and as such, the user has an obligation to answer all questions in good faith, to the extent of their actual knowledge.

1) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.25)?
X No ___Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)

2) Did a search of recorded land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.26)?
___No X Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)

3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)?
___No X Yes (If yes, explain below)

4) Do you have actual knowledge of a lower purchase price because contamination is known or believed to be present at the site (40 CFR 312.29)?
X No ___Yes ___Not applicable (If yes or Not applicable, explain below)

5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)?
___No X Yes (If yes, explain below)

6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of contamination at the site (40 CFR 312.31)?
___No X Yes (If yes, explain below)

Comments or explanations:
SEE ATTACHED SUPPLEMENT

Please return this form with the signed authorization to proceed. Proposal No. PMP197429

Supplement to Terracon Phase I Questionnaire – 8/29/2019 by Rebecca Law

City of Lakes Building – 309 2nd Ave S

- Built for State of Minnesota agency. City of Minneapolis purchased it in 1991 from the State.
- There might still be a storage tank, either in the basement or underground. Chris Carlson (612-673-3021 can supply more info.
- Except for an elevator upgrade, there has been minimal investment for the past 19 years. Assume that every major system is well past its end of life.

Public Service Center – 250 4th St S

- Except for new roof, there has been minimal investment for the past 19 years. Assume that every major system is well past its end of life.

Community Services Building – 215 and 217 3rd St S

- Minimal investment over the past 19 years. Assume that every major system is well past its end of life.

FOR ALL THREE BUILDINGS

- No Condition Assessment Reports or Deferred Maintenance Plans exist in City records.
- No prior Phase I or Phase II reports exist in City records.
- No Environmental Permits or Audits, Geotechnical Investigations, or Site Surveys exist in City records.
- There are old asbestos reports in paper format (approximately 4 inches thick). You are welcome to review those files in our office at Room 223 City Hall. However, we believe those reports have little value today due to technology improvements in asbestos detection. We are sure that all three buildings have multiple materials containing asbestos and recommend a new Asbestos Survey be done.
- I did not order Title Insurance Commitments but I did perform on-line searches of the Hennepin County Property Records of all four parcels (Community Services Building contains two parcels) and found nothing related to environmental issues. On land use restrictions, the only relevant recorded document is the "Amended and Restated Skyway Agreement" (Document Nos. 5736822 and 2146717). However, I could not locate a copy of the 3/12/1981 Unrecorded Agreement referenced in that Skyway Agreement.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Interest/Information System

US EPA Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRA NonGen / NLR:
Date form received by agency: 10/16/1990
Facility name: MINNEAPOLIS CITY OF JOBS & TRAINING BLDG
Facility address: 312 2ND AVE S
MINNEAPOLIS, MN 55401
EPA ID: MND985694280
Contact country: US
EPA Region: 05
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:
Owner/operator name: MINNEAPOLIS CITY OF JOBS & TRAINING BLDG
Owner/operator address: 312 2ND AVE S
MINNEAPOLIS, MN 55401
Owner/operator country: US
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 07/26/1999
Owner/Op end date: 05/14/1999

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: D000
. Waste name: Not Defined

Violation Status: No violations found

FINDS:

Registry ID: 110003844886

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

MINNEAPOLIS CITY OF JOBS & TRAINING BLDG (Continued) **1000466269**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification:	Conditionally Exempt Small Quantity Generator
Description:	Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less

NORWEST OPERATIONS CENTER (Continued) **1004726549**

of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Owner/Operator Summary:

Owner/operator name:	NORWEST OPERATIONS CENTER
Owner/operator address:	255 2ND AVE S MINNEAPOLIS, MN 55401
Owner/operator country:	US
Owner/operator telephone:	612-667-0412
Legal status:	Private
Owner/Operator Type:	Operator
Owner/Op start date:	07/26/1999

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Hazardous Waste Summary:

. Waste code:	D001
. Waste name:	IGNITABLE WASTE
. Waste code:	D002
. Waste name:	CORROSIVE WASTE
. Waste code:	D006
. Waste name:	CADMIUM
. Waste code:	D007
. Waste name:	CHROMIUM
. Waste code:	D008
. Waste name:	LEAD
. Waste code:	D035
. Waste name:	METHYL ETHYL KETONE
. Waste code:	F001

NORWEST OPERATIONS CENTER (Continued) **1004726549**

. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
